Columbia University in the City of New York

GENERAL STATEMENT

Historical.—On October 31, 1754, Letters Patent were issued incorporating THE GOVERNORS OF THE COLLEGE OF THE PROVINCE OF NEW YORK IN THE CITY OF NEW YORK IN AMERICA and providing for the establishment of a College to be known as King's College "for the Instruction and Education of Youth in the Learned Languages and in the Liberal Arts and Sciences." The conclusion of the announcement issued in the same year reads: "A serious, virtuous, and industrious Course of Life being first provided for, it is further the Design of this College, to instruct and perfect the Youth in the Learned Languages, and in the Arts of Reasoning exactly, of Writing correctly, and Speaking eloquently; and in the Arts of Numbering and Measuring, of Surveying and Navigation, of Geography and History, of Husbandry, Commerce, and Government; and in the Knowledge of all Nature in the Heavens above us, and in the Air, Water, and Earth around us, and the various Kinds of Meteors, Stones, Mines, and Minerals, Plants and Animals, and of every Thing useful for the Comfort, the Convenience, and Elegance of Life, in the chief Manufactures relating to any of these things: And finally, to lead them from the Study of Nature, to the Knowledge of themselves, and of the God of Nature, and their Duty to Him, themselves, and one another; and every Thing that can contribute to their true Happiness, both here and hereafter." The educational work of the College was at once begun under the presidency of Dr. Samuel Johnson with a class of eight students and the first Commencement was held on June 21, 1758. The first college building, erected on a portion of the "King's Farm," at what is now the corner of Park Place and Church Street was completed in 1760. The Revolutionary War, during which this building was taken for military purposes, compelled a suspension of activities. King's College numbers among its students and graduates Alexander Hamilton, John Jay, Robert R. Livingston, Gouverneur Morris and John Stevens.

In 1784, the Legislature of the State of New York passed an act incorporating the "REGENTS OF THE UNIVERSITY OF THE STATE OF NEW YORK," vesting the property of King's College in the Regents, and changing the name of the College to Columbia College. In 1787, this act was repealed, and an act was passed confirming the Royal Charter of 1754 and vesting the property and franchises of King's College in "The Trustees of Columbia College in the City of New York."

In 1810, the charter was again amended in certain particulars at the request of the Trustees, and re-enacted, but the corporate title remained the same until 1912 when by order of the Supreme Court of the State of New York it was changed to "The Trustees of Columbia University in the City of New York." In 1897 the University removed from 49th Street and Madison Avenue, where it had been situated since 1857, to its present location on Morningside Heights.¹

¹ The attention of those interested in the historical development of the University is called to *The History of Columbia University, 1754-1904* (pp. xiii + 493). \$1.50. Columbia University Press, Lemcke and Buechner, New York, agents.

Buildings and Grounds.—The general plan of the buildings of the Corporation on Morningside Heights comprises two groups, one of which occupies the site on the northerly side of 116th Street, extending to 120th Street, and the other, the site on the southerly side of 116th Street, extending to 114th Street, bounded on the east by Amsterdam Avenue and on the west by Broadway.¹

The UNIVERSITY LIBRARY, erected 1895–97, the gift of Seth Low, LL.D., of the Class of 1870 and President of the University from 1889 to 1901, is the central feature of the buildings comprising the northerly group which together form a large quadrangle. This group includes on the east: EAST HALL, which contains several of the administrative offices of the University; KENT HALL (205 ft. x 53 ft.) erected in 1910 from funds largely provided by Charles Bathgate Beck of the Class of 1877, College, and 1879, Law, occupied by the School of Law and the Faculty of Political Science; PHILOSOPHY HALL (145 ft. x 57 ft.) erected in 1910, the gift of an anonymous donor, occupied by the Faculty of Philosophy; ST. PAUL'S CHAPEL (140 ft. x 32 ft. x 112 ft., with 1050 sittings), erected 1904, the gift of Olivia E. P. Stokes and Caroline Phelps Stokes as a memorial to their parents; AVERY LIBRARY (150 ft. x 50 ft.), erected 1911, the gift of Samuel P. Avery, containing the Avery Architectural Library and the School of Architecture; and FAYERWEATHER HALL (150 ft. x 57 ft.), erected in 1896 from the bequest of Daniel B. Fayerweather, occupied by the departments of physics and astronomy. On the north, the group further includes: SCHERMERHORN HALL (205 ft. x 80 ft.), erected 1896, the gift of William C. Schermerhorn of the Class of 1840, occupied by the departments of geology, mineralogy, botany and zoölogy; the unfinished UNIVERSITY HALL, occupying the central position on the northern boundary of the campus, which contains the offices of the Bursar, Registrar, Dean of the Graduate Schools, Director of University Admissions, and Director of Summer Session and Extension Teaching, and, next to the LIBRARY, the largest of the University buildings, containing the Gymnasium, the power plant, which provides light, heat and power to all of the buildings, and the University Commons; and HAVEMEYER HALL (205 ft. x 80 ft.), erected 1896, the gift of the family of Frederick Christian Havemeyer, occupied by the School of Chemistry. On the west, the northerly group includes: the SCHOOL OF ENGINEERING building (150 ft. x 57 ft.), erected 1896, occupied by the departments of civil, electrical, mechanical and highway engineering; EARL HALL (99½ ft. x 58 ft.), erected 1900, the gift of William Earl Dodge, the home of the religious, philanthropic and social interests of the students; the SCHOOL OF MINES building (145 ft. x 57 ft.), erected 1904, the gift of Adolph Lewisohn, used for mining and metallurgy; and the FACULTY CLUB, a building like EAST HALL acquired by the University at the purchase of the site.

The southerly group of buildings, occupying the ground lying immediately in front of the LIBRARY popularly known as South Field, includes, on the east: HAMILTON HALL (208 ft. x 55 ft.), erected 1906, the gift of John Stewart Kennedy, the home of Columbia College; and the two residence halls, HARTLEY HALL and LIVINGSTON HALL, both erected 1904. On the west, the group includes: the SCHOOL OF JOURNALISM (208 ft. x 55 ft.), erected 1912, provided by the gift and bequest of Joseph Pulitzer; and a third residence hall, FURNALD HALL, erected 1913.

The University Library is of Indiana limestone. The other buildings, in conformity to the general design, are constructed of overburned brick and lime-

stone, set, as is also the Library, upon a base of granite. A model of all the University buildings (20 ft. x 35 ft.), now existing and as projected and showing the buildings in detail and in their relation to each other, is on view in the basement of Kent Hall.

To the east of the northerly group of buildings, in the block bounded by Amsterdam Avenue, Morningside Drive, 116th and 117th Streets, the property of the University, are the CROCKER RESEARCH LABORATORY, the greenhouses belonging to the departments of botany and agriculture, and the RESIDENCE OF THE PRESIDENT OF THE UNIVERSITY; and on the north side of 117th Street the DEUTSCHES HAUS, the gift of Edward D. Adams, and the MAISON FRANÇAISE, the gift of A. Barton Hepburn, centers respectively of German and French interests in the University.

Barnard College is situated on Broadway, immediately west of the University site, and occupies the land extending from 116th to 120th Street. The buildings comprise MILBANK HALL (119 ft. x 65 ft.), and BRINCKERHOFF HALL (166 ft. x 55½ ft.), both erected 1896, the gifts, respectively, of Mrs. A. A. Anderson and Mrs. Van Wyck Brinckerhoff, FISKE HALL (166 ft. x 55½ ft.), erected in 1897, the gift of Mrs. Josiah M. Fiske, and BROOKS HALL (122 ft. x 43 ft.), erected 1907, the Barnard College hall of residence.

The buildings of Teachers College are on the North side of 116th Street, directly opposite the University site. They consist of the MAIN BUILDING (169 ft. x 132 ft.), erected 1894; the adjoining MILBANK BUILDING (146 ft. x 52 ft.), erected 1897; the MACY MANUAL ARTS BUILDING (146 ft. x 74 ft.), erected 1896; the HOUSEHOLD ARTS BUILDING (153 ft. x 57 ft.), erected 1909; and the THOMPSON BUILDING (110 ft. x 84 ft.), erected 1904. The HORACE MANN SCHOOL (202 ft. x 100 ft.), erected 1901, the school of observation of Teachers College, forms a constituent part of the group on the Broadway side. WHITTIER HALL (202 ft. x 100 ft.), erected 1901, adjoining Teachers College on the east, is the residence hall for women students and officers.

The Medical School of the University, the College of Physicians and Surgeons, is on Fifty-ninth Street, between Ninth and Tenth Avenues. The group of buildings comprises the SOUTH BUILDING (141 ft. x 43½ ft.), erected 1886, the MIDDLE BUILDING (56 ft. x 54½ ft.), erected 1886, both the gift of William H. Vanderbilt; the NORTH BUILDING (94 ft. x 43½ ft.), erected 1886; the INSTITUTE OF ANATOMY (88½ ft. x 45 ft.), the VANDERBILT CLINIC (99½ ft. x 60 ft.), both erected 1896 with funds provided by the gift of Cornelius, William K., Frederick W., and George W. Vanderbilt; and the SLOANE HOSPITAL FOR WOMEN (145 ft. x 98 ft.), erected 1886-1911, the gift of Mr. and Mrs. William D. Sloane.

The COLLEGE OF PHARMACY (75 ft. x 100 ft.), erected in 1894, is in West Sixty-eighth Street, between Broadway and Columbus Avenue.

The entire University occupies 50.629 acres of ground in New York City, and has, in addition, a Summer Camp of Surveying and Geodesy, covering 585 acres, in Morris, Conn.

Organization.—The title to all corporate property is vested in a board of twenty-four Trustees, whose term of office is for life, and who form a self-perpetuating body, exercising the power of appointment as to all officers of instruction and administration and general oversight and control of the affairs of the University. In 1909 provision was made for the nomination by the Alumni of six of the twenty-four Trustees.

THE PRESIDENT has charge of the educational administration of the University and is Chairman of the University Council and of every faculty established

by the Trustees. The Treasurer of the corporation elected by the Trustees has charge of the financial administration of the University. The other principal administrative officers are the Deans of the several faculties and the Directors of the Summer Session and Extension Teaching, and of the Schools of Architecture and of Journalism, who under the general supervision of the President have immediate charge of the educational work of the University, the Provost of the University, the Acting Librarian, the Chaplain, the Comptroller, the Secretary of the University, the Registrar, the Bursar, and the Superintendent of Buildings and Grounds.

THE UNIVERSITY COUNCIL is a representative body consisting of the President, the Deans, certain other administrative officers, and two members elected from each of the several faculties. Subject to the reserved power of control by the Trustees, it is the function of the Council (a) to control the award of the higher degrees, to secure the correlation of courses with a view to increase the efficiency and to enlarge the range of University work, to encourage original research, and to adjust all questions involving more than one faculty; (b) to make recommendations, both to the Trustees and to the several faculties, concerning the educational administration of the University, and to advise the President upon such matters as he may bring before it; (c) to appoint all Fellows and University Scholars and, within the limits of the Statutes, to make rules for their government.

THE FACULTIES of the University are composed of the members of the corps of instruction of professorial rank. It is the function of the Faculties (a) to fix the requirements of admission, the program of studies, and the conditions of graduation; (b) to establish rules for ascertaining the proficiency of students, and for the assignment of honors; and (c) to fix the times of graduation. The Faculties, in their turn, are made up of the various Departments of Instruction, which in the case of larger Departments have an organization of their own under an administrative head. For purposes of administration the Departments are further grouped together in a number of Divisions.

Schools and Colleges.—The Schools and Colleges composing the University are as follows:

COLUMBIA COLLEGE, the oldest part of the University and in a sense the mother of the rest, offers a program of Studies leading to the degrees of Bachelor of Arts and Bachelor of Science. Emphasis is placed upon the quality of the student's work rather than upon the time spent in residence, and this combined with the close co-ordination of the work of the Summer Session and Extension Teaching with that of the College makes it possible for a well-prepared candidate to complete the requirements for the bachelor's degree in three years. The program provides not only for those students who wish to devote their entire time to undergraduate work, but for those who desire during their collegiate residence to prepare themselves for advanced standing in some professional course of study. As a preliminary to any professional courses the University strongly recommends at least two years of collegiate work, and candidates for professional degrees who are not already college graduates are advised to take advantage of the opportunities offered through Columbia College for a combination of general and professional studies which will lead to the bachelor's degree in arts or science, in addition to a professional degree in law, medicine, mining, engineering, chemistry or architecture, in six years.

BARNARD COLLEGE, founded in 1889, is a separate corporation and has separate buildings. As an undergraduate college for women, however, it bears the same relation to the educational system of Columbia University as does

Columbia College for men. The requirements for admission and the standard of scholarship are of the same grade. The degree of Bachelor of Arts or Bachelor of Science is conferred upon its graduates by the University on the recommendation of the Faculty of Barnard College.

THE GRADUATE FACULTIES of the University, consisting of the co-ordinated non-professional faculties of Political Science, of Philosophy, and of Pure Science, offer advanced courses of study and investigation leading to appropriate degrees in law, medicine, philosophy, education, philology and letters, history, economics and social science, public law, mathematics and natural science, mines, engineering, chemistry, and pharmacy. Women students are admitted to all graduate courses except in law, medicine, mines, engineering and chemistry. Advanced courses and opportunities for original research leading primarily to the degrees of Master of Arts and Doctor of Philosophy are offered by:

THE FACULTY OF POLITICAL SCIENCE, established in 1880, in history, political philosophy, economics, social science, public law and comparative jurisprudence.

THE FACULTY OF PHILOSOPHY, established in 1890, in philosophy, education, psychology, anthropology, classical philology, English, comparative literature, the Germanic, the Romance, and the Oriental languages.

THE FACULTY OF PURE SCIENCE, established in 1892, in mathematics, astronomy, physics (mathematical and experimental), chemistry, mineralogy, geology, zoology, botany, psychology, physiology, anatomy, bacteriology, embryology, biological chemistry, pathology, and engineering.

THE SCHOOL OF LAW, established in 1858, offers a course of three years in the principles and practice of private and public law, leading to the degree of Bachelor of Laws.

THE COLLEGE OF PHYSICIANS AND SURGEONS, founded in 1807, offers a course of four years in the principles and practice of medicine and surgery, leading to the degree of Doctor of Medicine.

THE SCHOOL OF MINES, founded in 1863, offers a three years' course of special professional study in mining and metallurgical engineering, leading to the degrees of Engineer of Mines and Metallurgical Engineer.

THE SCHOOL OF ENGINEERING, set off from the School of Mines in 1896, offers a three years' course of special professional study in civil engineering, sanitary engineering, electrical engineering, and mechanical engineering, leading to the degrees of Civil Engineer, Electrical Engineer, and Mechanical Engineer.

THE SCHOOL OF CHEMISTRY, also set off from the School of Mines in 1896, offers a three years' course of special professional study, leading to the degrees of Chemist and Chemical Engineer.

THE SCHOOL OF ARCHITECTURE, founded as a department in 1896 and as a separate School in 1914, offers courses of study leading to the degree of Bachelor of Architecture.

THE SCHOOL OF JOURNALISM, founded in 1912 through the gift of the late Joseph Pulitzer, offers a four-year course in letters, science, and practical Journalism leading to the degree of Bachelor of Literature.

TEACHERS COLLEGE, founded in 1888 and chartered in 1889, was included in the University in 1898. It is a separate corporation, but takes academic rank in the University system as a professional school for teachers. It offers through the Faculty of Education the following courses of study: (a) graduate courses leading to the doctor's or master's diploma; and simultaneously to the doctor's and master's degrees; (b) professional courses, each of two years,

based upon two years of collegiate study, leading to the bachelor's diploma for teachers and supervisors in kindergartens or elementary schools, or for specialists in fine arts, household arts, industrial arts, music, nurse's education and physical education, and to the degree of Bachelor of Science; and through the Faculty of Practical Arts a four years' program of study, based on a secondary school education, uniting liberal with technical training and leading also to the degree of Bachelor of Science.

THE COLLEGE OF PHARMACY is, similarly, a separate corporation. It offers University courses leading to the degrees of Pharmaceutical Chemist, Bachelor of Science in Pharmacy, and Doctor of Pharmacy.

The University maintains a SUMMER SESSION, of six weeks' duration, in which are offered courses that are accepted in partial fulfilment of the requirements of certain academic degrees and diplomas.

Through its system of EXTENSION TEACHING, the University offers to men and women, especially to those engaged in teaching, who can give only a portion of their time to study, an opportunity to pursue subjects included in a liberal education and to take courses, if they so desire, toward a diploma or an academic degree.

Departments and Divisions.—The several departments of study maintained by the University, including the College of Physicians and Surgeons, Barnard College, Teachers College, the College of Pharmacy, grouped in Divisions, are as follows:

ANCIENT AND ORIENTAL LANGUAGES AND LITERATURES: Classical Philology, Chinese, Indo-Iranian Languages, Semitic Languages.

ARCHITECTURE.

BIOLOGY: Anatomy, Bacteriology, Botany, Physiology, Pathology, Biological Chemistry, Zoölogy.

CHEMISTRY AND CHEMICAL ENGINEERING.

EDUCATION (TEACHERS COLLEGE: Education, Practical Arts).

ENGINEERING: Civil Engineering, Electrical Engineering, Highway Engineering, Mechanical Engineering, Engineering Drafting.

GEOLOGY, GEOGRAPHY, AND MINERALOGY: Geology, Geography, Mineralogy.

HISTORY, ECONOMICS, AND PUBLIC LAW (FACULTY OF POLITICAL SCIENCE): Economics, Social Economy, Sociology and Statistics, History, Politics, Public Law, Comparative Jurisprudence.

JOURNALISM.

MATHEMATICAL AND PHYSICAL SCIENCES: Astronomy, Mathematics, Physics.

MEDICINE (COLLEGE OF PHYSICIANS AND SURGEONS).

METALLURGY AND MINING: Metallurgy, Mining.

MODERN LANGUAGES AND LITERATURES: English and Comparative Literature, Celtic, Germanic Languages, Romance Languages, Slavonic.

MUSIC.

PHARMACY (COLLEGE OF PHARMACY).

PHILOSOPHY, PSYCHOLOGY, AND ANTHROPOLOGY: Anthropology, Philosophy, Psychology.

PHYSICAL EDUCATION.

PRIVATE LAW (FACULTY OF LAW).

Announcements.—The Announcements of each College or School, of the Summer Session, of Extension Teaching, and of the several Divisions, may be obtained without charge from the Secretary of the University. (See p. 313).

GENERAL REGULATIONS

Status of Students. — A student may enter Columbia University as either:

1. A matriculated student accepted by the University as having fulfilled the preliminary qualifications for candidacy for a degree, certificate of proficiency, or diploma. A period of regular attendance upon all stated academic exercises¹ amounting to at least one academic year must be completed by each candidate; or

2. A non-matriculated student, permitted to attend such courses as he may be qualified to take but not regarded as a candidate for a degree, certificate of proficiency or diploma. Non-matriculated students may, however, receive a formal statement as to the satisfactory completion of any course or courses.

In the announcement of each faculty will be found the conditions governing admissions to courses under that faculty.

Under the Statutes every student is admitted subject to the disciplinary powers of the University authorities. The President is empowered to administer discipline and to authorize the Deans of the several faculties to do so on his behalf.

Registration

Before attending any University exercises each student must register, *i. e.*, must present himself in person to furnish the information necessary for the University records and to file a statement of the courses he is authorized to pursue. The central office of the Registrar, University Hall and the offices at the College of Physicians and Surgeons, 437 West 59th Street, at the College of Pharmacy, 115 West 68th Street, and at Barnard College and Teachers College, were open for registration on February 1 and 2, 1915, September 22 to September 28, 1915, and on February 7 and 8, 1916. New students may also register on the day following each of these periods. Those unable to complete their registration may file a provisional statement within the statutory period. Students registering late are charged an additional fee of \$5 and are held accountable for absences thus incurred. Registration cannot be completed until the fees for the half-year have been paid.

Students holding fellowships or scholarships are required to register not later than the date specified in the Academic Calendar; failure to do so may be considered as vacating the fellowship or scholarship.

The requirements for graduation may be completed at any time during the year, but diplomas are issued only at commencement and at the beginning of each half-year.

Withdrawal. — An honorable discharge is granted to any adult student in good standing who may desire to withdraw from the University; a minor must submit the written assent of his parent or guardian. Students withdrawing from the University are required to notify the Registrar. No application for a return of fees can be considered unless written notice be given at the time of withdrawal. The Dean of any faculty may, for reasons of weight, grant a leave of absence to a student in good standing.

¹ Students prevented by conscientious scruples from complying with academic requirements which may be fulfilled only upon days set apart by their church for religious observance, should make application to the appropriate University authority for equitable relief.

Fees

All fees are payable semi-annually in advance, and no reduction is made for late registration. Under the regulations, the privileges of the University are withheld from any student delinquent in the payment of his fees.

The fees to be paid by students are subject to change at any time in the discretion of the Trustees.

All students who were matriculated as candidates for a degree prior to July 1, 1915, will pay for tuition for courses taken to fulfill the requirements for that degree at the rate effective during the academic year 1914-1915.

The following fees are prescribed by statute:

Summary of Fees

- | | |
|--|--------|
| (a) University Fee: | |
| For all students for each half-year or any part thereof | \$5.00 |
| For candidates for admission who take the entrance examinations of Columbia University, for two consecutive series of entrance examinations, to be applied in lieu of the University Fee for the first year of residence | 10.00 |
| (b) Tuition Fee: | |
| For all students per point, except in cases where a special fee is fixed for a particular course | 6.00 |
| (c) For a Degree or a Certificate, or for an examination therefor: | |
| For the Bachelor's Degree, not professional or technical (A.B., B.S.) | 15.00 |
| For any professional or technical degree or certificate, including the Degree of B.Lit. in the School of Journalism | 25.00 |
| For the Foreign Service Certificate | 10.00 |
| For the Degree of Master of Arts | 25.00 |
| For the Degree of Doctor of Philosophy | 35.00 |
| (d) Privileges: | |
| 1. Late registration or application | 5.00 |
| 2. Deficiency and special examinations | 5.00 |
| With a maximum fee for examinations in a single series of | 25.00 |
| The conditions under which such privileges shall be granted are to be determined by the Registrar with the approval of the President. | |
| (See <i>Administrative Procedure</i> following). | |
| (e) Rebates: | |
| 1. The University Fee and the Degree Fee are not subject to rebate. | |
| 2. After the last day of the period provided for change of course, as announced in the University Calendar, no tuition fees will be returned for any course which the student may for any reason discontinue. Exception to this rule may be made only in cases of total withdrawal from the University, when a pro rata return of fees may be authorized by the Registrar. | |

Administrative Procedure

Late registration: For the ultimate date for the completion of registration without the payment of the additional fee, see the Academic Calendar.

Late application: For the ultimate date for filing an application for admission, a deficiency or a special examination, or for a degree, without the payment of the additional fee, see the Academic Calendar.

Deficiency and special examinations: An examination to remove a deficiency in course or in entrance requirements, or an examination at an unusual time, involves the payment of the additional fee.

When a rebate is allowed for the discontinuance of courses or withdrawal from the University, such rebate will be reckoned from the day upon which the Registrar receives notice from the student.

Courses designated as half, full, or double courses have the following value in terms of points: half course, 2 points; full course, 4 points; double course, 8 points.

Candidates for the degree of Master of Arts are charged no fee for the essay or its equivalent.

Attendance distributed over a period of not less than one academic year, upon at least the equivalent of eight full courses of graduate rank, constitutes one year of residence for the higher degrees. In determining residence, the essay of candidates for the degree of Master of Arts and the dissertation of candidates for the degree of Doctor of Philosophy will be considered as having the value of one full course.

Summer Courses in Surveying, Mining and Geodesy. — Students taking courses in Surveying and Geodesy in the Summer Session at Camp Columbia are required to pay a university fee of \$5 and tuition fees for each course. The university fee is payable but once for each session and allows a student to take any course or courses given during that session for which he is otherwise eligible. The tuition fees are estimated at \$6 per point. Course 15S, 25S and 27S each count as 3 points each or 1 point per survey, course C.E. 26S, 28S, 71S as 2 points each, and courses C.E. 26aS and Ast. 107S as 3 points.

Students who have already taken some of the prescribed work at Camp have the option of paying the fees on the above basis, which will be used for the first time in 1915, or as required during 1914. For latter schedule see Announcement for 1914.

Candidates for admission to advanced standing who attend the Summer Course in Practical Mining are required to pay therefore a fee of \$50.

Deposits

Summer Courses in Surveying. — Every student before starting for Camp, and at the same time the fees for the summer session in surveying are paid, shall make a deposit at the Bursar's office at Columbia University to meet Camp expenses, viz., board, laundry, charges for drawing material, notebooks, etc.; also to cover any damage to, breakage, or loss of instruments or Camp equipment, and transportation of self and baggage from the station to and from the Camp. The Bursar's receipt for said deposit shall be presented to the professor in charge of the summer session upon the arrival of the student in Camp.

The amount of the deposit varies with the course or the number of courses taken and is as specified below. Students intending to take two or more courses shall deposit an amount equal to the sum total of the deposits herein specified for the respective courses. A check for the balance of the deposit which shall remain to the credit of the student after his withdrawal from the session will be given to him payable upon application to the Bursar of Columbia University. In case the total charges exceed the deposit the student will be subject to an additional assessment.

The deposit for C.E. 15S shall be \$50; for C.E. 25S, \$50; for C.E. 26S and 26aS, \$25; for C.E. 27S, \$50; for C.E. 28S, \$30; for C.E. 71S, \$35; and for Geodesy 107, \$30.

The deposit for any one *survey* of Course 15, 25, or 27 shall be \$15.

Apparatus, Supplies and Keys to Desks and Lockers. — A deposit for the use of lockers, keys, apparatus, material, and the like, is required of students in Mines, Engineering and Chemistry. At the end of the academic year each student will be credited with those articles which he returns in good order, and the value of those he has injured or broken will be deducted from his deposit. Details may be obtained from the Bursar.

Employment for Students

The University endeavors through the secretary of Appointments to give to students who need it the opportunity to earn enough for partial support and to extend assistance in other ways. During the current year the student earnings reported amounted to \$103,016.74.

Preference is naturally given, in case of a choice of applicants, to those who, as strangers in New York, are not likely to hear of positions through other channels. No prospective student should come to Columbia expecting to depend entirely or even largely upon the assistance of the University, and every student should be prepared to meet at least the expenses of the first half-year — say \$300.¹

The chiefs of clinic in the Medical School give advice without charge to students on the employment lists.

Paul C. Holter, A.B., is Secretary of Appointments and all communications should be sent to him.

Appointment Work

The appointment work of Columbia University is divided between two branches; one having headquarters at Columbia University, the other at Teachers College.

The duty of these offices is to assist competent graduates of the University to obtain suitable permanent employment.

Both offices will be glad to be informed promptly of present or prospective vacancies in positions for which college-trained men or women are eligible.

No fee is charged for any services rendered.

The office at Columbia University keeps classified lists of those who wish employment in business, in law offices, along social service or public lines, or in technical branches; also in teaching positions in colleges and universities, except those in Education. Communications relating to above should be addressed to the Secretary of Appointments, Paul C. Holter, A.B.

The Committee at Teachers College keeps classified lists of those who desire administrative, supervisory, and teaching positions in normal, secondary, and elementary schools, kindergartens and hospitals, and for college and university positions in the teaching of Education; that is to say, for any position specific preparation for which is made in Teachers College. Communications should be addressed to the Chairman of the Committee, Professor William H. Kilpatrick, or its Recorder, Miss Isabelle L. Pratt.

¹ For Medicine and Mines, Engineering and Chemistry, add \$100, and for Architecture add \$50. Students in Mines, Engineering, and Chemistry should also make provision for deposits for apparatus ranging from \$10 to \$40 and for Summer Courses.

Fellowships, Scholarships, and Prizes

(See page 280)

Relations Between the University and other Institutions

The educational opportunities of students in Columbia University (including Barnard College, Teachers College and the New York College of Pharmacy) are increased by the close relations of the University with other institutions of instruction and research.

Roosevelt and Kaiser Wilhelm Professorships. — The Theodore Roosevelt Professorship of American History and Institutions in the University of Berlin has been endowed by the gift of \$50,000 to the Trustees of Columbia University. Appointments are made annually, with the sanction of the German Emperor, by the Prussian Ministry of Education upon the nomination of Columbia University, but are not confined to members of this University. In successive years the fields of American history, American constitutional and administrative law, American economic and sociological problems and movements, American education, and American contributions to science, technology, the arts and literature, will be dealt with. The instruction will be given in German in the University of Berlin during each winter semester, and may be repeated in whole or in part elsewhere during the ensuing semester.

The Prussian Ministry of Education has established in Columbia University a corresponding chair of German History and Institutions, to be filled each year by the Trustees of Columbia University upon the nomination of the Prussian Ministry of Education. To this chair the name of the Kaiser Wilhelm Professorship of German History and Institutions has been given, with the approval of the German Emperor.

Visiting French Professorship. — By agreement with the Council of the University of Paris there has been established in Columbia University a professorship to be known as the Visiting French Professorship. The appointment is made each year jointly by the Council of the University of Paris and the Trustees of the University. The visiting French professor is to be in residence at the University for three months during the first half-year and to conduct a seminar after the manner of the Conferences of the University of Paris. The French Ministry of Public Instruction sends each year in addition a lecturer to be in residence for the entire year.

Visiting Austrian Professorship. — By agreement with the Austrian Ministry of Education a professorial exchange has been established with the universities of Austria. The appointment is made each year of a visiting Austrian professor by the Trustees of Columbia University upon the nomination of the Austrian Ministry of Education. Correspondingly, the appointment of a visiting professor in Austria is made by the Austrian Ministry of Education upon the nomination of the Trustees of the University. The visiting Austrian professor is to be in residence at the University during the second half-year. Appointments to Austria are not confined to members of this University, and the Austrian professor may come from any Austrian university. The incumbent may represent any branch of knowledge for which there is a reasonably wide interest in the respective countries, but the choice of subjects is otherwise not restricted.

Queen Wilhelmina Lectureship. — With the co-operation of the Government of the Netherlands, a lectureship in the history, literature and language of the Netherlands has been established in Columbia University. To this lectureship the name of the Queen Wilhelmina Lectureship has been given, with the approval of the Queen of the Netherlands.

Museum of Natural History. — The American Museum of Natural History places its collections at the service of advanced students of Columbia University for the purposes of study and research, and provides them with the necessary facilities for work.

Metropolitan Museum of Art. — The Metropolitan Museum of Art admits students of Columbia University on presentation of cards of introduction from the University, and gives them special facilities for the study of the objects in the Museum.

New York Botanical Garden. — Columbia University has the privilege of conducting university courses in botany at the New York Botanical Garden and of using its laboratories and floral material, and all courses of instruction given there are open to officers and students of the University without charge. The Director is a member of the Faculty of Pure Science. For a description of the equipment of the Botanical Garden, see the statement of the Department of Botany.

Theological Seminaries. — The Union Theological Seminary and the General Theological Seminary, both of which are represented on the University Council, admit students of high standing in the University to certain lectures in their regular or special courses without tuition fee. Libraries of the Seminaries, for reference, are open to all qualified students of the University. Reciprocal advantages are offered by the University to students of the Seminaries who are qualified to register as candidates for the higher degrees. The General Theological Seminary offers a scholarship to graduates of Columbia College.

The University also enjoys reciprocal arrangements with the theological seminaries in the vicinity of New York: the Jewish Theological Seminary (New York), Drew Theological Seminary (Madison, N.J.), St. Joseph's Theological Seminary (Yonkers, N.Y.), the New Brunswick (N.J.) Theological Seminary, and the German Theological Seminary (Bloomfield, N.J.).

The Director of the New York School of Philanthropy is a professor in the University, and the same reciprocal advantages for students exist as in the case of the Theological Seminaries.

Hospitals. — Besides the Vanderbilt Clinic and the Sloane Hospital for Women, the general and special hospitals of New York afford important fields for clinical teaching. The College of Physicians and Surgeons is in close alliance with the Presbyterian Hospital and is strongly represented on the staff of many other institutions, and regular clinical instruction at hospitals is made a prominent feature of the program. In many of these hospitals the fourth-year students are admitted as clinical clerks to serve on the house staff.

Other Institutions. — There are close informal relations between the University and the Hispanic Society of America, the Rockefeller Institute of Medical Research, the New York Zoological Garden, the New York Aquarium, and the laboratories at Wood's Hole and Cold Spring Harbor. (For the Libraries of the City, see below.)

The Library

The Library contains about 570,000 volumes, exclusive of unbound pamphlets and duplicates, and some 80,000 German dissertations.

Among the notable special collections may be mentioned the Columbian, 3500 titles; the Phoenix Library, consisting of 7000 volumes, the gift of Stephen Whitney Phoenix, of the Class of 1859; the Avery Architectural Library, a collection of about 23,000 volumes relating to architecture and decorative art; the Mary Queen of Scots Library, containing 550 volumes, collected and given by General J. Watts de Peyster; the collection of over 1200 volumes by and about Goethe; the Immanuel Kant collection of nearly 1000 volumes; the valuable Townsend Library of National, State, and Individual War Records; the Garden Library, deposited by the Southern Society of New York; the valuable library of the Holland Society of New York, 600 volumes, including the remarkable collection of works of Grotius; the philological library of the late Professor Mortimer Lamson Earle, given by his students and friends, consisting of some 2500 volumes; the library of Henry Livingston Thomas, late Chief Translator of the Department of State, Washington, given by his son, Dr. William S. Thomas, some 9000 volumes; the library of the American Mathematical Society, 5,000 volumes; the musical library of Dr. James Pech, consisting of 8723 pieces; the library of the late George W. Hill, 5,000 volumes on mathematics and astronomy; and a collection in contemporary German literature at the Deutsches Haus. The Library is also the depository for the Reform Club of the City of New York.

Reading Rooms.—About 10,000 carefully selected reference books and many of the most important works on all subjects, in standard editions, representing the leading authors in all literatures, are placed in the general reading-room directly accessible to all authorized readers. On the same floor, in the north wing, is the periodical reading-room, where are shelved many bound volumes of periodicals, and the current numbers of government documents and periodicals.

For the convenience of undergraduates of Columbia College, there is in Hamilton Hall a College Study. Five thousand carefully selected volumes have been placed in this room as a reference library.

Connected with the stacks in which are stored the books relating especially to Philosophy, Literature, the Languages, the Sociological and Economic Sciences and History, are twenty special study rooms, open only to authorized readers, which afford to advanced students and investigators in these fields opportunity to carry on their work in quiet rooms in the immediate vicinity of the literature of the subjects under consideration. The various Science departments have special libraries in close connection with their laboratories and lecture rooms.

The Law Library, the Bryson Library of Teachers College, which is the Educational Library of the University, and the carefully selected reference libraries of Barnard College, the College of Physicians and Surgeons, the College of Pharmacy, the Deutsches Haus, and the School of Journalism, are all available to officers and students of the University. Nearly all of the more private or restricted libraries of the city, such as those of the learned societies, are open to officers and to advanced students introduced by the Librarian of the University.

In the basement of the Library, the New York Public Library maintains a branch of its circulation department. The collection contains about 4000 volumes, and 80,000 additional titles are available through the Interbranch Loan System.

By the courtesy of the trustees of Union Theological Seminary the reading room of that institution is open to students of the university.

Catalogues. — The general catalogue of the libraries of the University is a record of all books in the possession of the University. In addition to this there are catalogues of department libraries located in department reading-rooms, and a union catalogue which is a record, by authors only, of books not possessed by the University which may be found in the Library of Congress, John Crerar Library, Harvard University, and other libraries. The catalogue of the New York Public Library in the Library building, 42nd St. and 5th Avenue, may also be consulted, especially for references to articles in magazines not indexed in the published indexes to periodicals.

Use. — All officers, students, and graduates of the University have free access to the Library and may draw books for home use. For further information, consult the *Readers' Manual*.

Officers of New York University, of the College of the City of New York, of the Hunter College, of the Metropolitan Museum of Art, of the American Museum of Natural History and principals and heads of departments of the New York High Schools are granted the same Library privileges as are extended to graduates of Columbia University.

Persons of mature years desiring to engage in definite research which cannot be successfully conducted in the public or other libraries of this city will be given the privilege of using this library in the building, upon filing a satisfactory application, responsibly endorsed. Blank applications will be furnished by the Acting Librarian on request.

The Library is open each week-day (except Labor Day, Thanksgiving, Christmas, New Year's Day, Good Friday, and Independence Day) from 8.30 A.M. until 11 P.M., October-June; and until 10 P.M., July-September.

Book Store

A University book store is maintained in the basement of the School of Journalism building under the auspices of the Columbia University Press, where officers and students may purchase books and stationery at stated discounts from list prices.

The Gymnasium

(See page 155)

University Commons

The University Commons, in University Hall, is operated under University supervision for the benefit of officers and students. The service is *a la carte*, or regular board may be secured for \$6 a week.

Residence Halls

For Men. — There are three University residence halls on South Field, with accommodations for, approximately, 820 men; Hartley Hall, the gift of Mrs. Helen Hartley Jenkins and Marcellus Hartley Dodge, '03, in memory of the late Marcellus Hartley; Livingston Hall, named in memory of Robert R. Livingston, of the Class of 1765; and Furnald Hall, provided for

in the will of the late Francis P. Furnald in memory of his son, Royal Blackler Furnald, a member of the Class of 1901. Each building is 10 stories in height exclusive of basement, and 137 feet long by 64 feet wide. They are lighted by electricity and heated by steam, and have telephone and electric elevator service.

The Halls are built of stone and over-burned brick. The floors and partitions are of the reinforced concrete type, and the construction is considered thoroughly fire-resistant throughout.

Hartley and Livingston each contain 300 rooms, the average size of the bedrooms being 8'-4" x 14'-6" and of the studies 10'-6" x 14'. Furnald contains 294 rooms, the average size of bedrooms being 9'-0" x 14'-9" and of the studies 11'-6" x 13'-6". All the rooms have outside light and exposure, and the arrangement permits of flexibility in renting rooms in suites. There are also several double rooms. All ceilings are nine feet high. Each bedroom has a clothes closet and enameled basin with hot and cold running water. The rooms are provided with heavy oak furniture of mission type. There are four shower baths on each floor. All the water used in the Halls is filtered. The entrance for students to each Hall is from the campus, and leads directly into a large assembly room 60 feet square. This room runs up through two stories and has a large open fireplace opposite the entrance. It is furnished in heavy leather-covered oak. At one side of the main entrance is the office of the Hall, and on the other a reception room. In the basement is space for trunk storage. There are well equipped infirmaries in each one of the residence halls. Rentals range from \$105 for single rooms to \$400 for three-room suites for the academic year of 38 weeks.

The Residence Halls are supervised and controlled by a Council Composed of the Comptroller, three University officers, and a representative from each hall. The Council is assisted by three committees made up of residents in the Halls.

While the Halls are open to all male students of the University, students in Columbia College, in accordance with the desire of the donors, are given the preference in the assignment of rooms in Hartley Hall. A pamphlet containing floor-plans, charges, and the Hall Regulations may be had upon application to the Secretary of the University. Rooms will be assigned in the order of receipt of written applications to be made on a blank provided by the Superintendent of Buildings and Grounds.

For Women. — Brooks Hall, the residence hall for Barnard College students, on the north side of 116th Street, accommodates 90 students. Full information in regard to the situation and cost of rooms, the advance deposit, the charge for electric light, and the residence scholarship is published in a separate pamphlet, to be had on application to the Secretary of Barnard College, or to the Mistress of Brooks Hall, Barnard College, New York City.

Whittier Hall, the dormitory of Teachers College, is situated on Amsterdam Avenue, between 120th and 121st Streets, and has accommodations for 350 women. Inquiries regarding rooms, board and the like, should be addressed to the House Director of Whittier Hall, 1230 Amsterdam Avenue.

Other Accommodations. — Besides these dormitories, there are many good boarding-houses and apartments near the University. The careful selection, inspection, and registration of such lodgings have been undertaken, and a card-catalogue is kept at Earl Hall. Many of the Greek-letter fraternities, a list of which will be found on page 60, maintain chapter houses near the University.

Public Worship and Religious Work

Service in St. Paul's Chapel, at which attendance is voluntary, is held every week-day during the academic year, except Saturday and Wednesday, at noon, the period from 12 to 12.30 being set aside by the University Council for religious exercises. On Wednesday there is a vesper service at 5.10. Service on Sunday is at 4 o'clock. Organ recitals are also frequently given.

Barnard College, twice a week, and Teachers College, daily, hold separate services in their respective chapels.

Earl Hall

Earl Hall, the home of the religious, philanthropic, and social organizations and interests of the University, is open from 8.30 A.M. to 10 P.M. daily to all students without expense, under the direct management of the Secretary of Earl Hall, who is also Secretary of the University Young Men's Christian Association.

The building may not be used for distinctly dogmatic or denominational religious teaching, but all organizations, the objects of which are to promote the religious and philanthropic life of their student members and of the student body at large, have the privilege of using it for their meetings. While the social purposes of the Hall are necessarily subordinated to the other uses of the building, the Secretary desires to promote the same type of informal personal and social intercourse that prevails in a good club. Provision for the regular meetings of student organizations is made on a day-and-hour schedule, without exclusive use of any of the rooms, in the following order: societies the purpose of which is (1) primarily religious; (2) primarily philanthropic; (3) primarily literary; and (4) miscellaneous student organizations.

The Secretary of the Young Men's Christian Association, the Chaplain of the University, the University Medical Officer, the Graduate Manager of the Athletic Association, and the Graduate Treasurer of King's Crown have offices in this building. During certain hours of the day the managers and other students representatives of organizations, such as the Board of Student Representatives, the Columbian and the Musical Clubs, may be found here.

Medical Attendance

The University Medical Officer, Dr. McCastline, has direct supervision of all matters affecting the health of the student body. All cases of communicable disease occurring in homes of students must be promptly reported to him. As University physician Dr. McCastline holds office hours daily in Earl Hall for consultation with the students.

For those who are without local family physicians there is a Medical Visitor (Dr. D. S. D. Jessup, 601 W. 113th St.) whose duties are to render medical assistance to such officers and students as may desire it, either at their homes or elsewhere, at a remuneration to be arranged between himself and individual patients.

In Livingston and Fernald are well equipped infirmaries.

Student Organizations

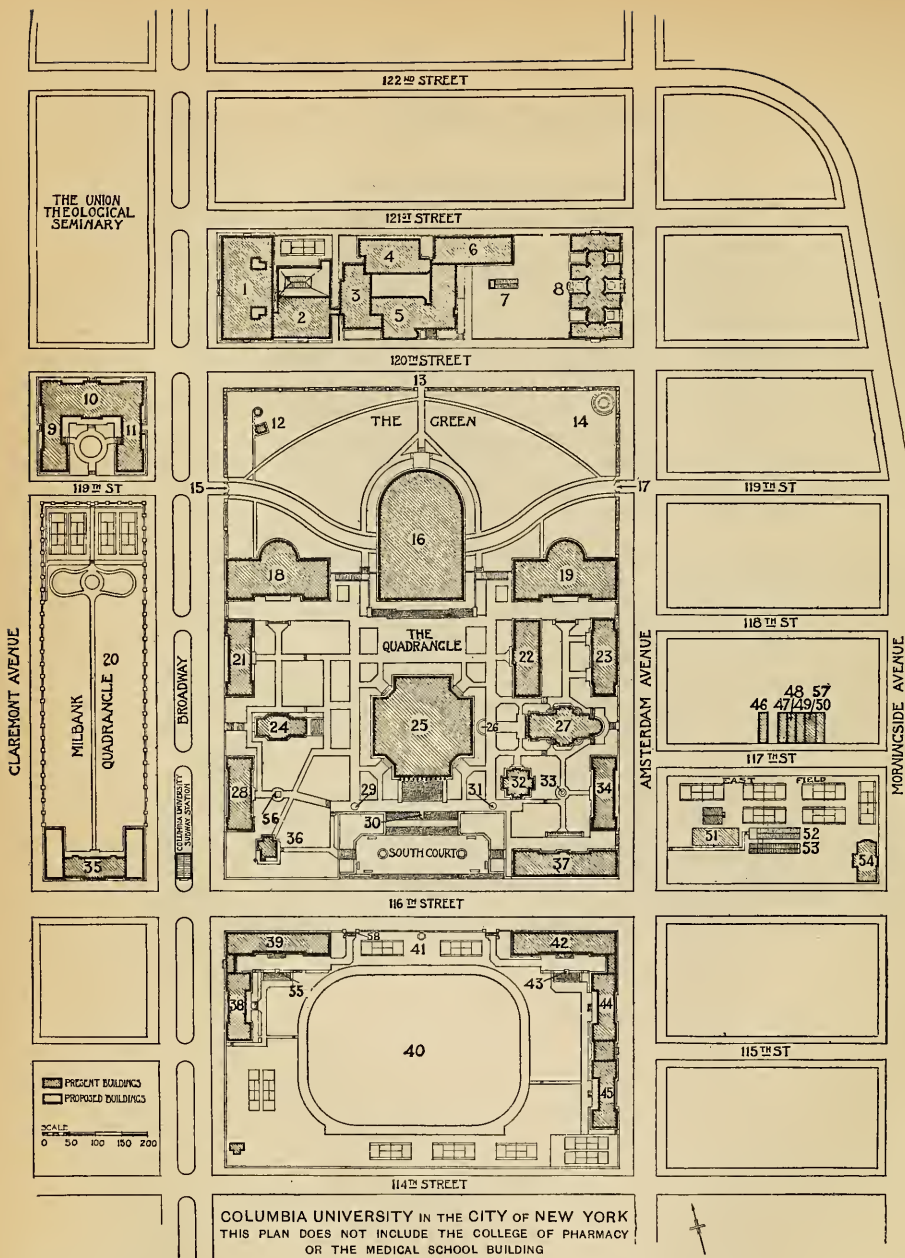

The various student organizations, while self-governing, are subject to the following regulations: The schedules of public contests and performances must be approved by a University Committee (see page 8); budgets for expenditure are approved and checked by the Comptroller; the University Committee on Athletics, consisting of three graduates, two students, and two University officers, adopt and administer rules of eligibility not involving questions of scholarship and govern participation in intercollegiate athletics. Provision is made for the election each year by the student body at large of a Board of Student Representatives. The constitution of this board will be found in the pamphlet on Student Organizations, which may be obtained from the Secretary of the University. The members for the current year are: R. W. Watt, '16, Chairman; R. D. Franklin, '16; C. S. Bartow, '16; H. S. Hutton, '16 S; O. B. Myers, '16 S; G. F. Oberrender, '16; E. H. Shea, '16; F. M. Simonds, '16; J. H. Purdy, Jr., '16 L.

The Columbia University Athletic Association was organized in 1909 for the purpose of formulating and maintaining a general athletic policy at Columbia. The annual dues are \$10.00, entitling members to free admission at all home games and also to the use of the Gould Boat House.

King's Crown is an organization aiming to do for non-athletic activities what the athletic association does for athletics. The annual dues are two dollars, entitling members, among other privileges, to discount from the prices of subscriptions to publications and admission to non-athletic performances.

The following Greek-letter fraternities, given in the order of their establishment, maintain chapters at Columbia University.

Alpha Delta Phi; Psi Upsilon; Delta Phi; Delta Psi; Phi Kappa Sigma; Phi Gamma Delta; Phi Kappa Psi; Delta Kappa Epsilon; Zeta Psi; Beta Theta Pi; Delta Tau Delta; Theta Delta Chi; Phi Delta Theta; Delta Upsilon; Sigma Nu; Sigma Chi; Sigma Alpha Epsilon; Phi Sigma Kappa; Theta Xi; Alpha Chi Rho; Alpha Sigma Phi; Zeta Beta Tau; Pi Lambda Phi; Phi Sigma Delta.

DIVISIONAL AND DEPARTMENTAL STATEMENTS

INTRODUCTORY

The courses of instruction are numbered in accordance with a plan uniform throughout the University, and attention is called to the following information which the number assigned to a course will in each case indicate.

Odd numbers indicate the first, even numbers the second half of the academic year. Courses designated 1-21, 2-22, etc., run through two half-years beginning the first-half; those designated 4-5, 24-25, etc., begin the second half-year; courses designated 1-4, 5-8, etc., run through two complete academic years. Courses numbered between 1 and 100 are, in general, elementary and may not be offered in fulfillment of the requirements for the higher degrees (A.M. and Ph.D.). Courses numbered from 101-200 are primarily for students who hold a first degree but are open to undergraduates who have completed 64 points (for courses in law 94 points), including all prescribed work. In general, no such course may be taken without some elementary training in the same or in some allied subject. Courses from 201-300 are restricted to such graduate students who are qualified to pursue the work to advantage. Seminars are numbered from 301 up. Attention is called to the current *Announcement of the Faculties of Political Science, Philosophy, and Pure Science* and particularly to the fact that the requirements for the higher degrees are based upon subjects and not upon courses. Students should consult the officers of instruction and administration concerned with regard to their selection of courses before registration.

Courses enclosed in brackets are not offered during the current year. Any course not applied for by at least three candidates for a degree may be withdrawn by the instructor.

Credit for courses is given in terms of double, full, or half course if the course is to count toward the degrees of Ph.D., or A.M., and in terms of points for all other degrees. Courses designated as half, full, or double course have the following value in terms of points: half course, 2 points; full course, 4 points; double course, 8 points. Hours indicated are for the half-year.

Any subject of study not appearing in its alphabetical order may be found through the index.

With the exception of the courses in mines, engineering, chemistry, medicine, and law, all courses numbered over 101 are open to women upon the same terms as to men unless specific statement is made to the contrary.

Unless otherwise stated, the number of hours given indicates the hours of class-room work (lectures, conferences, and recitations) per week. When a course involves both class-room work and laboratory or drafting-room work, the former will be indicated by *C* and the latter by *L* and *D*, respectively. In courses in medicine, *D* indicates demonstrations. An "afternoon" implies three hours a day, normally from 1:00 to 4:00.

Students should note the distinction between a department and a school. For instance, there is in the University both a Department of Architecture and a School of Architecture; Departments of Civil, Electrical, and Mechanical Engineering and a School of Engineering. The Departmental Statements which follow have to do only with the giving of the instruction and the oppor-

tunities for research in each special branch of study. The information as to the conditions of admission to the courses, and the academic credit to be received therefor, will be found under the information relating to Colleges and Schools, pages 183, *et seq.*, and in the separately printed *Announcements*.

For the courses to be offered in fulfilment of the requirements for the degrees of Bachelor of Arts or Bachelor of Science, see page 183; Bachelor of Laws, see page 187; Bachelor of Architecture, see page 222; Bachelor of Literature, see page 227; Doctor of Medicine, see page 190; for the several degrees in mining, engineering, and chemistry, see pages 200-211.

It is not possible, within the limits of this volume, to give more than the briefest outline of the courses. In some of the *Bulletins of Information* published by the University, and distributed without charge upon application to the Secretary, a detailed statement will be found of the scope of each course, the manner of treatment, the courses prerequisite, and the like. A list of these *Bulletins of Information* will be found on page 315.

AGRICULTURE

Professor: O. S. MORGAN

Lecturer: O. C. BOWES

1-2 — Principles of agriculture. C 2 hours, L 2 hours. 3 points. Professor O. S. MORGAN

101-2 — Advanced agronomy. C 2 hours, L 4 hours. Full course. Professor MORGAN

121-22 — Advanced animal husbandry. C 2 hours, L 4 hours. Full course. Professor MORGAN and Mr. BOWES

211-12 — Soil management. Full or double course. Professor MORGAN

213-4 — Soils. Full or double. Professor MORGAN

241-2 — Agricultural surveys. Full or double course. Professor MORGAN and Mr. BOWES

Summer Session

s1 — Field crops. Lectures and laboratory. 3 points. Professor MORGAN

s2 — Forage and root crops. Lectures and demonstrations. 2 points. Professor MORGAN

s3 — Soil management. 3 points. Lectures and laboratory. Mr. EATON

s5 — Horticulture. Lecture and laboratory. 3 points. Mr. BURGDORFF

s7 — Animal husbandry. Lecture and laboratory. 3 points. Mr. BOWES

Extension Teaching

e1-2 — Forage and field crops. Lectures and laboratory. 6 points. Professor MORGAN

e1a-2a — Forage and field crops. Sections I and II. Lectures and demonstrations. 4 points. With laboratory, 6 points. Professor MORGAN

e3-4 — Soils and fertilizers. Lectures and laboratory. 6 points. Mr. EATON

e5a-6a — Soils and fertilizers. Lectures and laboratory. 6 points. Mr. EATON

e5-6 — Principles of horticulture. Lectures and laboratory. 6 points. Mr. BURGDORFF

e5a-6a — Principles of horticulture. Evening section. 6 points. Mr. BURGENDORFF

e7-8 — Animal husbandry. Lectures and laboratory. 6 points. Mr. BOWES

e7a-8a — Animal husbandry. Lectures and demonstrations. 4 points. Mr. BOWES

e9-10 — Animal husbandry. Lectures and laboratory. 6 points. Mr. BOWES

e11-12 — Poultry husbandry. Lectures and laboratory. 6 points. Mr. WALKER

e11a-12a — Poultry husbandry. Lectures and demonstrations. 4 points. Mr. WALKER

e15 — Amateur floriculture. Lectures and laboratory. 2 points. Mr. BURGENDORFF

Attention is also called to the following related course, Education **178c**.
Equipment. — The work in agriculture is carried on in large part in Schermerhorn Hall. The library is at present lodged in the Botany reading room. Besides the usual laboratory equipment in field crops, soils, horticulture and animal husbandry the department has a seventy-six foot greenhouse. Special research laboratories, with separate temperature and heat control, are provided in the glasshouse laboratory. Land for experimental and demonstration plant-work is located near the glasshouse and also in the New York Botanical Garden.

ANATOMY

See introductory paragraphs, page 61

Professor: G. S. HUNTINGTON (*Executive Officer*)

Associate Professor: H. von W. SCHULTE

Assistant Professor: B. B. GALLAUDET

Associate: F. TILNEY

Instructors: A. J. BROWN, F. W. HEAGEY, F. B. ST. JOHN, J. C. SHARP, O. S. STRONG, and J. C. VAUGHAN

Assistants: C. J. MACGUIRE, JR., J. L. COBB, R. V. GRACE, J. B. KERNAN, JR., O. C. PICKHARDT and J. I. VIETOR

101 — Histology and embryology. *C*-hours, *L*-hours. Double course. Professors SCHULTE and Drs. STRONG and SHARP

103-104 — Anatomy of the extremities; preliminary visceral anatomy. *C?* hours, *L?* hours. Two full courses. Drs. BROWN and VAUGHAN

105 — Anatomy of head and central nervous system; abdomen and thorax. *C?* hours, *L?* hours. Double course. Drs. TILNEY, STRONG, and ST. JOHN

107 — Vertebrate morphology. 3 hours. Half course. Professor HUNTINGTON

109 — Anatomy of the mouth, larynx, and pharynx. 3 hours. Professor GALLAUDET

111 — Anatomy of the eye. 3 hours. Professor GALLAUDET

113 — Anatomy of auditory apparatus. 3 hours. Professor GALLAUDET

114 — Topographical anatomy of the thorax. 3 hours. Professor GALLAUDET

116 — Topographical anatomy of the abdomen. 3 hours. Professor GALLAUDET

118 — Topographical anatomy of the male and female genito-urinary tract. 3 hours. Professor GALLAUDET

120 — Regional anatomy of the head and neck. 3 hours. Professor GALLAUDET

202 — Special morphology. 3 hours. Half course. Professors HUNTINGTON and SCHULTE

204 — Morphology of the nervous system. 3 hours. Half course. Dr. TILNEY

251-252 — Research in anatomy. 2 half or 2 double courses. Professor HUNTINGTON, and staff.

302 — Seminar in histology and embryology. 1 hour. — course. Professor SCHULTE

Equipment. — The laboratory facilities of the department are very complete. The large general dissecting-room accommodates from 390 to 546 students, working in groups of five or seven at one table.

The laboratory for advanced morphological research occupies the third story of the anatomical building. Every facility for advanced and research work in morphology is here extended. The established connections of the department furnish abundant human and comparative material, both mature and embryonal. The private library of the Professor of Anatomy is at the disposal of advanced workers.

Museum. — Much work has been done in the formation of a Museum of Human and Comparative Anatomy, the ultimate design of which is to present, in as complete a manner as possible, a view of the evolution of the forms of animal life, and of their natural relations both in series of natural groups and in the comparative and relative positions of organs and systems. The collection, both as regards groups and the individual preparations, is designed for the illustration of both elementary and advanced courses.

The second floor of the anatomical building has been furnished throughout with suitable exhibition and demonstration stands. It is the intention of the department to install in this space the portion of the collection most used in the medical courses, thus establishing an undergraduate teaching museum which will both increase the efficiency of the sectional demonstrations and render the material upon which they are based available at all times for study and research.

A study-collection of human osteological preparations is so administered as to enable every student to take out the different osteological series and retain them for private study as long as required.

ANTHROPOLOGY

See introductory paragraphs, page 61

Professors: F. BOAS (*Executive Officer*) and M. H. SAVILLE

Instructor: A. GOLDENWEISER

Lecturer: P. E. GODDARD

Research Assistant: H. K. HAEBERLIN

1-2 — General introductory course. 3 hours. 6 points. Professor BOAS and Dr. GOLDENWEISER

102 — Introduction to anthropology. 2 hours. Half or full course. Professor BOAS

[101] — Methods of anthropological research. 2 hours. Half or full course. Professor BOAS]

104 — Prehistoric archæology. 2 hours. Full course. Professor SAVILLE

[105 — Anthropometry. *C* 2 hours, *L* 3 hours. Professor BOAS]

106 — Anthropometry-biometrical methods. 2 hours. Full course. Professor BOAS

111-112 — Mexican archæology. 2 hours. 2 full courses. Professor SAVILLE

113-114 — Archæology of northwestern South America. 2 full courses. 2 hours. Professor SAVILLE

118 — Languages of North America — Introductory course. 2 hours. Full course. Professor BOAS

120 — American languages — Advanced course. Full course. Professor BOAS

129 — Ethnography of Africa. Full course. Dr. GOLDENWEISER

[130 — Ethnography of Australia and the islands of the Pacific Ocean. Full course. Dr. GOLDENWEISER]

[131-132 — Ethnography of Europe. 2 full courses. Professor BOAS]

[133-134 — Ethnography of America and Siberia. 2 hours. Full. Dr. GOLDENWEISER]

138 — General ethnology — Primitive man and his physical environment. Full course. Dr. GOLDENWEISER

137 — General ethnology — Types of primitive religion. 3 hours. Full course. Dr. GOLDENWEISER

139-140 — General ethnology — Types of primitive social organization. 3 hours. 2 full courses. Dr. GOLDENWEISER

203-204 — Research work in anthropology. Professors BOAS and SAVILLE, Dr. GOLDENWEISER, Dr. GODDARD

301-302 — Seminar in ethnology. 2 hours bi-weekly. Professor BOAS, Dr. GOLDENWEISER

The collections of the American Museum of Natural History may be used by students of anthropology.

Summer Session

s101 — Introduction to anthropology. Full course. Professor BOAS

s102 — Ethnographic basis of history. Full course. Dr. GOLDENWEISER

Professor: H. JACOBY

- 1-2 — General astronomy — Introductory course. C 2 hours, L 2 hours. 6 points. Professor JACOBY
 103-104 — Spherical and practical astronomy — A more mathematical treatment, including practical use of instruments. C 1 hour, L 2 hours. 2 half courses. Professor JACOBY
 105 — Geodesy — Brief history of geodetic operations and description of instruments, including their adjustment and use. 2 hours. Full course. Professor JACOBY
 106 — Geodesy and practical astronomy. C 1 hour, L 3 hours. Full course. Professor JACOBY
 205-206 — Theory and Method of Reduction of Photographic Star Plates. 1 hour, with practical work, for two years. 2 full courses. Professor JACOBY

Summer Session

- s1-s1a — Introduction to the Science. Professor JACOBY
 s103 — Observatory practice — Conferences and instrumental work. Full or half course. Professor JACOBY
 107s — Geodetic Surveying. 3 points. Professor JACOBY, Mr. BOWIE, and assistants.

Equipment. — The Wilde Observatory contains an equatorial telescope, with clock-work and accessories. The University has also a very complete collection of instruments for the application of astronomy to geodesy, including a Bamberg universal combined prismatic transit and zenith telescope of 4-inch aperture; a Wanschaff zenith telescope of 8-cm. aperture, suitable for latitude measures of the highest precision; two Wanschaff 8-inch microscope theodolites; two Fauth 8- and 10-inch microscope theodolites; secondary bar base and invar tape base apparatus, with stretching machines; complete outfit of engineer's instruments, sextants, apparatus for barometric hypsometry, clocks, chronometers, electric chronographs, etc.; five computing machines.

For the advanced study of astronomy proper, there are special facilities including two Repsold measuring machines of the latest type and a large collection of original astronomical photographs, suitable for measurement and reduction. These photographs were made by Gill at the Cape of Good Hope, Rutherford at New York, Donner at Helsingfors, Henry at Paris, Campbell at Mt. Hamilton, etc. Funds are provided for the publication of researches in astronomical photography. (See University Bibliography.)

In addition, there are a number of unmounted instruments, including Lewis Morris Rutherford's famous 13-inch equatorial, with its attachments.

Library. — The University Library is especially strong in astronomy. Among other important collections, it contains the private library of the late Dr. Otto Struve, formerly director of the Pulkowa Observatory. There is also a good working library in the department.

BACTERIOLOGY

See introductory paragraphs, page 61

Professor: H. ZINSSER (*Executive Officer*)

Asst. Associate: H. J. HOPKINS

Instructors: J. G. DWYER, M. McBURNEY, and R. OTTENBERG

101 — General bacteriology. For medical students. 6 hours. Full course. Professor ZINSSER, Drs. HOPKINS and DWYER, and Mr. BLISS

201 — Advanced bacteriology. 18 hours. Double course. Professors ZINSSER and HOPKINS and Dr. DWYER

203 — Special bacteriology. The study of known species of bacteria and their chemical products, and original investigation. Professor ZINSSER and Dr. HOPKINS

205-206 — The principles of infection, immunity, serum diagnosis, and therapy. 1 hour. Half course. Professor ZINSSER

208 — A practical laboratory course in the technique of serum study. 6 hours. Full course. Professor ZINSSER, Professor HOPKINS and Dr. OTTENBERG

209-210 — Clinical bacteriology. — hours. Two half courses. Dr. DWYER

211-212 — Clinical serology. — hours. Two half courses. Dr. OTTENBERG and Assistants

251-252 — Research in bacteriology. Time varies individually. Professor ZINSSER and staff

Summer Session

s101 — General bacteriology. 10 hours. *C*-hours, *L*-hours. Full course. Drs. HOPKINS and DWYER

Equipment. — The department of bacteriology occupies the western section of the fifth floor of the north building of the College. It comprises a large laboratory for the accommodation of the undergraduate and advanced classes in bacteriology, a research laboratory for special advanced workers, and rooms equipped for the preparation of culture media. The laboratories are well supplied with all necessary apparatus for the culture and study of microorganisms and with cold storage facilities. A large collection of identified bacterial species is kept under cultivation. The department shares with the Department of Pathology a library in which the most important technical periodicals are on file. The opportunity for clinical bacteriology is given a few qualified workers from time to time in the bacteriological laboratory of the Presbyterian Hospital.

BIOLOGICAL CHEMISTRY

See introductory paragraphs, page 61

Professor: W. J. GIES (*Executive Officer*)

Assistant Professor: P. E. HOWE

Associates: F. G. GOODRIDGE, B. HOROWITZ, E. G. MILLER, JR., and W. WEINBERGER

Instructors: W. M. KRAUS, and S. MORGULIS

Assistants: A. K. BALLS, S. D. KRAMER, V. E. LEVINE and W. A. PERLZWEIG

Organic Chemistry

51 — Elementary organic chemistry. *C* 2 hours, *L* 6 hours. Professor HOWE, and Drs. LEVINE and PERLZWEIG

Nutrition

101 or 102 — General physiological chemistry. *C* 1 hour, *L* 7 hours. Full course. Professors GIES and HOWE, Drs. HOROWITZ, LEVINE, and PERLZWEIG

202 — Advanced physiological chemistry, including methods of research in nutrition. *C* 1 hour, *L* 6 hours. Full course. Professor GIES and Miss HEFT

211-212 — Biochemical methods of research, including clinical methods. *C* 1 hour, *L* 7 hours. 2 full courses. Dr. MILLER and Mr. BALLS

221-222 — Nutrition in health. *C* 2 hours, *L* 14 hours. 2 double courses. Professor HOWE and Dr. MILLER

214 — Comparative nutrition. *C* 2 hours. Full course. Dr. MORGULIS

223-224 — Nutrition in disease. *C* 2 hours, *L* 14 hours. 2 double courses. Professor GIES

225-226 — Nutrition in disease. 2 half courses. *C* 2 hours. Drs. GOODRIDGE, KRAUS, MORGULIS, and WEINBERGER

251-252 — Advanced physiological and pathological chemistry. Research 20 hours. 2 double courses. Professor GIES and Dr. MILLER

Toxicological Chemistry

261-262 — Effects and detection of poisons, including food preservatives and adulterants. *L* 10 hours. 2 full courses. Professor GIES and Dr. MILLER

Botanical Chemistry

271-272 — Chemical physiology of plants. *C* 1 hour, *L* 7 hours. 2 full courses. Professor GIES and Dr. HOROWITZ

Bacteriological Chemistry

281-282 — Chemistry of micro-organisms; fermentations, putrefactions, and enzyme actions in general (introduction to sanitary chemistry). *C* 1 hour, *L* 7 hours. 2 full courses. Professor GIES and Mr. KRAMER

Seminar

301-302 — **Biochemical Seminar.** — The members of the teaching staff, Ph. D. candidates, and all other investigators in the department, meet weekly to discuss results of recent researches in chemical biology. Open to all students in the University. 2 hours. No course credit. Professor GIES

Summer Session

s101 — General physiological chemistry. *C* 5 hours, *L* 10 hours. 3 points. Professor GIES and Dr. PERLZWEIG

s102 — General physiological chemistry (normal nutrition). (Teachers College, *School of Practical Arts*, s-H. A. 125.) 3 points. Professor GIES, Dr. SEAMAN, and Miss COOMBS

s225 — Nutrition in health and disease. Professor GIES

s251 — Research. Professor GIES

Biochemical Research. — Biochemical research may be conducted by advanced workers, independently or under guidance. Professor GIES consults regularly with investigators in the departmental laboratories; also in the laboratory of pathological chemistry of Bellevue Hospital and at the N. Y. Botanical Garden.

Library. — Professor GIES's library occupies a room adjoining the main laboratory at the medical school and is accessible, by appointment, to all workers in the Department. The library contains 2,950 volumes and 8,500 classified separates.

Equipment. — The headquarters of the Department of Biological Chemistry are at the College of Physicians and Surgeons, where eight rooms are well equipped for experimental work. Two of the rooms will each accommodate about seventy workers at a time. Six smaller rooms are specially fitted up for experimental investigations by advanced students.

The laboratory of physiological chemistry at Teachers College is situated on the fourth floor of the Household Arts building. It contains two rooms fully stocked with apparatus and chemicals. The larger of these rooms will accommodate thirty-five workers at a time. The smaller room is intended for work by advanced students.

Biochemical Association. — The Columbia University Biochemical Association holds quarterly scientific meetings, which are open to all students in the University. The association publishes the *Biochemical Bulletin*, which is now in its fifth volume.

BIOLOGY

Eight courses in biology (elementary human anatomy and physiology, introduction to biology, human biology, biology in sex-education, biological nature study, applied biology — advanced course, elementary microbiology including bacteriology, special problems in applied biology) are offered under the direction of Teachers College. For details see the current *Announcement of the School of Practical Arts*.

BOTANY

Professors: R. A. HARPER (*Executive Officer*) and H. M. RICHARDS

Associate Professors: C. C. CURTIS and W. G. MARQUETTE

Assistant Professor: T. E. HAZEN

Instructors: B. O. DODGE

Lecturer: Mrs. M. L. RICHARDS

Research Assistant: C. YAMPOLSKY

Assistants: E. ALTENBURG, H. F. A. MEIER, R. R. STEWART, M. W. STEWART, and H. M. RUSK

Certain graduate courses at the New York Botanical Garden are also given, either wholly or in part, by members of the Garden staff.

1-2 — General botany. *C* 2 hours, *L* 4 hours. 8 points. Professor CURTIS and Mr. ALTENBURG

3-4 — Plant morphology. *C* 2 hours, *L* 4 hours. 8 points. Professors HARPER and CURTIS

5 — Elementary plant pathology. *C* 1 hour, *L* 4 hours. 3 points. Dr. DODGE

6 — Economic botany. *C* 1 hour, *L* 4 hours. 3 points. Dr. DODGE

7 — Growth and character of timber. *C* 1 hour, *L* 3 hours. 2 points. Professor CURTIS and Mr. ALTENBURG

9-10 — Botanical problems. Introductory to research. Professors HARPER, CURTIS, MARQUETTE, and Dr. DODGE

11-12 — Plant anatomy and histology. *C* 2 hours, *L* 4 hours. 8 points. Professor MARQUETTE

101-102 — Plant physiology. *C* 2 hours, *L* 6 hours. 2 full courses. Professor MARQUETTE

103-104 — Structure and development of plants. *C* 2 hours, *L* 6 hours. 2 full courses. Professors HARPER and CURTIS

113-114 — Morphology of the higher plants. *C* 2 hours, *L* 6 hours. 2 full courses. Professor CURTIS

115-116 — Mycology. Advanced work. *C* 2 hours, *L* 6 hours. 2 full courses. Professor HARPER and Dr. DODGE

117-118 — Cytology. General physiology of organisms. *C* 2 hours, *L* 6 hours. 2 full courses. Professor HARPER

120 — Plant reactions. *C* 2 hours. 1 half course. Professor MARQUETTE

201-202 — Research in physiology. Professors RICHARDS, CURTIS, and MARQUETTE

209-210 — Problems in physiology of nutrition — treated from a chemical standpoint. Professors RICHARDS and GIES

211-212 — Plant pathology. Professor HARPER, Dr. MURRILL, Dr. SEAYER and Dr. DODGE

217-218 — Embryology of spermatophyta. With special work during two summers. Professors CURTIS and HAZEN

219-220 — Problems in morphology. Directed by members of the department and Botanical Garden staff

227-228 — Taxonomy. Directed by members of the Botanical Garden staff.

235-236 — Plant distribution. Professor BRITTON and other members of the staff

239-240 — Developmental taxonomy. Palaeobotany. Dr. HOLLICK

241-242 — Research on the physiology of the cell and reproduction. Professor HARPER

243-244 — Plant breeding. Dr. STOUT

301-302 — Seminar. 2 hours. 2 half courses. Professor HARPER

51-52 — Principles of plant morphology and physiology. *C* 2 hours, *L* 4 hours. 8 points. Professor RICHARDS, Mrs. RICHARDS, and Miss STEWART (Barnard)

53-54 — General morphology and development of plants. *C* 2 hours, *L* 4 hours. 8 or 10 points. Professor HAZEN and Miss STEWART (Barnard)

55-56 — Morphology and classification of spermatophytes. *C* 1 hour, *L* 4 or 6 hours. 6 or 8 points. Professor HAZEN

153 — Anatomy of vascular plants. *C* 2 hours and a minimum of *L* 6 hours. 5 points. Professor RICHARDS and Mrs. RICHARDS (Barnard)

154 — Physiology of plants from standpoint of nutrition. *C* 2 hours and a minimum of *L* 6 hours. 5 points. Professor RICHARDS and Mrs. RICHARDS (Barnard)

156 — Physiology of plants from standpoint of growth. *C* 2 hours and a minimum of *L* 6 hours. 5 points. Professor RICHARDS and Mrs. RICHARDS (Barnard)

158 — Structure and development of algae — Advanced course. *C* 1 hour, *L* 8 hours. 4 or 5 points, or full course. Professor HAZEN (Barnard)

159 — Structure and development of fungi — Advanced course. *C* 1 hour, *L* 8 hours. 4 or 5 points, or full course. Professor RICHARDS (Barnard)

160 — Embryology and laboratory methods. *L* 8 hours, lectures and outside reading. 4 points. Mrs. RICHARDS (Barnard)

161-162 — Advanced physiology and morphology. Work will be arranged to suit the needs of the students. 2 half, full, or double courses. Professors RICHARDS and HAZEN and Mrs. RICHARDS (Barnard)

Colloquium for the review of current botanical literature bi-weekly.

A botanical conference is held monthly at the library of the New York Botanical Garden, where members of the staff and students either present the results of their own work or review the progress of botanical research and publication elsewhere.

Summer Session

s2 — Elementary Botany. 3 points. Dr. DODGE

s2-s2a — The evolution of plant forms. 4 or 2 points. Professor CURTIS and Mr. ALTENBURG

s3-s3a — Fungi and plant diseases. 4 or 2 points. Dr. DODGE

s4-s4a — Algae. 4 or 2 points. Mr. FARR

s101-s101a — Plant physiology. Full or half course. Professor MARQUETTE and Mr. FAULWETTER

s112-s112a — Mosses and ferns. Full or half course. Dr. LEVINE

- s125 — Plant-breeding and propagation. Half course. Mr. ALTENBURG
 s201-s201a — Special problems in plant physiology. Full or double
 course. Professor MARQUETTE
 s241-s241a — Research. Full or double course. Professor CURTIS

Extension Teaching

e1-2 — Nature and development of plants. *C* - hours, *L* - hours. 4 points. Dr. DODGE

e1a-2a — General botany. *C* - hours, *L* - hours. 2 points. Dr. DODGE

e3-4 — Edible and poisonous fungi. 2 points. Dr. DODGE

e5-6 — 2 points. Professor HARPER

Equipment. — The Department of Botany occupies the third floor of Schermerhorn Hall, and the laboratories and lecture-rooms are well equipped with apparatus and material for morphological and physiological work.

Similar opportunities are offered to women in the laboratories at Barnard College.

Special laboratories are devoted to work in general and cellular physiology and are provided with micro-photographic equipment and a Zeiss ultraviolet microscope. All necessary apparatus and reagents are available for general histological and cytological work. Provision is also made for work on the metabolism of cells and their reactions to physical stimuli. The equipment includes apparatus for the study of the effects of various thermal, light, and gravitational stimuli on protoplasmic activities, a photometer and electrical measuring instruments such as a delicate d'Arsonval galvanometer, millameters, resistance measuring instruments, etc., for the study of electro-physiological problems.

A greenhouse connected with a small laboratory and dark room and equipped with a considerable amount of physiological apparatus affords facilities for experimental work in physiology and pathology and provides living material under the most favorable conditions for all instructional courses. A culture-room with modern equipment for growing the fungi and algae in pure cultures is also available.

Under agreement with the University the Botanical Garden supplies all needed facilities for research for members of the staff and for properly accredited students. This combination of forces not only places the Department of Botany within reach of material, equipment and collections not otherwise available, but opens up facilities for research work under conditions that are not excelled.

The Museum of the New York Botanical Garden is located in Bronx Park, and its entire upper floor is devoted to research. The physiological and morphological laboratories occupy the western end, and the taxonomic laboratories and herbarium the eastern end. Among the special features provided are to be mentioned the dark rooms, photographic, operating, and balance-room, and laboratory for physiological chemistry. Ample opportunity for experimental work in plant breeding and in plant pathology is afforded by the open-air plantations and extensive horticultural houses.

The Columbia herbarium and the equally extensive collections of the New York Botanical Garden are housed in the large room in the east wing of the Botanical Museum. The cryptogamic collections are arranged in special rooms. The entire aggregation of collections available for students is exceptionally full in every group of plants.

The library comprises over 20,000 volumes in addition to complete sets of the important botanical journals, which now number over one hundred.

A seminar for the study of special subjects in general physiology meets weekly. A colloquium for the study of current botanical literature meets bi-weekly and a botanical conference meets monthly where members of the staff and students present the result of their own work or review the progress of botanical research elsewhere.

Professors: M. T. BOGERT, J. L. R. MORGAN, H. C. SHERMAN, and ALEXANDER SMITH (*Executive Officer*)

Associate Professor: M. REIMER

Assistant Professors: H. T. BEANS, T. B. FREAS, J. KENDALL, A. C. NEISH, J. M. NELSON and J. F. ZANETTE

Instructors: F. BARRY, A. M. BUSWELL, H. A. FALES, H. L. FISHER, E. KELLER, and A. W. S. THOMAS

Assistants: J. C. ANDREWS, J. C. BAKER, P. C. HAESELER, E. H. LESLIE, V. HAHN, K. P. MONROE, H. B. PARTENHEIMER, G. P. RUSSELL, A. J. SCARLETT, JR., J. TILT and V. TURCK

Courses given in Havemeyer Hall, numbered between 100 and 200, may be closed to women at the discretion of the instructor.

Inorganic Chemistry and Quantitative Analysis

A1 — General elementary chemistry. *C* 3 hours, *L* 2 hours. 4 points. Professor NEISH and Assistants

A2 — General elementary chemistry. *C* 3 hours, *L* 2 hours. 4 points. Mr. HAESELER and Assistants

3-4 — General inorganic chemistry. *C* 3 hours, *L* 6 hours. 10 points. Professor SMITH, Mr. HAESELER and Assistants

6-7 — General inorganic chemistry. *C* 3 hours, *L* 6 hours. 10 points. Professor NEISH, Dr. BARRY, Mr. HAESELER and Assistants

11-12 — Qualitative analysis. *C* 2 hours, *L* 6 hours. 10 points. Professor ZANETTI and Mr. LESLIE

14-15 — Qualitative analysis. *C* 2 hours, *L* 6 hours. 10 points. Professor ZANETTI and Mr. LESLIE

H1-H2 — Honors Conference. 2 hours. Professor NEISH

H3-H4 — Honors Conference. 2 hours. Professor NELSON

101-102 — Advanced inorganic chemistry. *C* 2 hours. Two half courses. Professor SMITH

103-104 — Experimental inorganic chemistry. *C* 1 hour, *L* 6 hours. Two full courses. Professor KENDALL

201 — The phase rule. *C* 2 hours. One half course. Professor KENDALL

203 — Laboratory administration. *C* 1 hour; *L* 6 hours. One full course. Professor FREAS

207-208 — Inorganic chemistry, special topics. *C* 2 hours. Two half courses. Professor FREAS

209-210 — The history of chemistry. *C* 2 hours. Two half courses. Dr. BARRY

212 — Chemistry of colloids. *C* 2 hours, *L* 4 hours. One full course. Dr. THOMAS

215-216 — Seminar in inorganic and analytical chemistry. *C* 2 hours. Two half courses. Professors BEANS, ZANETTI and KENDALL

217-218 — Inorganic chemistry, research. *L* 20 hours. Two double courses. Professors SMITH, FREAS, ZANETTI and KENDALL

Physical Chemistry

121-122 — Physical chemistry, general course. *C* 3 hours, *L* 3 hours. Two full courses. Professor MORGAN and Assistant

123-124 — Experimental physical chemistry. *C* 1 hour, *L* 6 hours. Two full courses. Professor KENDALL

126 — Experimental physical chemistry. *C* 1 hour, *L* 6 hours. One full course. Professor KENDALL

225-226 — Seminar in physical chemistry. *C* 2 hours. Two half courses. Professor MORGAN

227-228 — Physical chemistry, research. *L* 20 hours. Two double courses. Professor MORGAN

Organic Chemistry

41-42 — Organic chemistry, elementary course. *C* 3 hours, *L* 6 hours. 12 points. Professor NELSON and Dr. FISHER

43M — Organic chemistry. *L* 12 hours. 6 points. Professor NELSON and Dr. FISHER

49 — Organic chemistry. *C* 2 hours, *L* 9 hours. 6 points. Professor NELSON and Dr. FISHER

141-142 — Organic chemistry. *C* 3 hours. Two full courses. Professor BOGERT

151-152 — Advanced organic chemistry. *C* 1 hour, *L* 6 hours. Two half courses. Professor BOGERT and Dr. FISHER

153-154 — General organic chemistry. *C* 2 hours. Two half courses. Professor NELSON

255-256 — Seminar in organic chemistry. *C* 2 hours. Two half courses. Professor BOGERT

257-258 — Organic chemistry, research. *L* 20 hours. Two double courses. Professors BOGERT and NELSON

Analytical Chemistry

63 — Quantitative analysis. *C* 2 hours, *L* 9 hours. 6 points. Professor BEANS and Mr. FALES

64 — Quantitative analysis, inorganic. *C* 1 hour, *L* 3 hours. 2 points. Professor BEANS and Mr. FALES

66 — Quantitative analysis, inorganic. *C* 1 hour, *L* 6 hours. 4 points. Mr. FALES

111-112 — Theory of inorganic chemical analysis. *C* 2 hours. Two half courses. Professor BEANS

163 or **164** — Quantitative analysis, inorganic, advanced course. *L* 12 hours and conferences. Two full courses. Professor BEANS

267-268 — Quantitative analysis, research. *L* 5 afternoons. Two double courses. Professor BEANS

Food Chemistry, Organic and Sanitary Analysis

- 84 — Food chemistry. *C* 3 hours. 3 points. Dr. THOMAS
 171 — Organic analysis. *C* 2 hours, *L* 6 hours. 5 points. Full course.
 Professor SHERMAN and Dr. THOMAS
 175 — Food analysis. *C* 2 hours, *L* 6 hours. 5 points. Full course.
 Professor SHERMAN and Dr. THOMAS
 176 — Chemistry of food and nutrition. *C* 2 hours, *L* 6 hours. 5 points. Full course. Professor SHERMAN and Dr. THOMAS
 275-276 — Seminar in food chemistry. *C* 2 hours. Two half courses.
 Professor SHERMAN and Dr. THOMAS
 277-278 — Food chemistry, research. *L* 20 hours. Two double courses.
 Professor SHERMAN
 278 — Food chemistry, research. *L* 15 hours. Two double courses.
 Professor SHERMAN
 73 — Quantitative analysis of water and sewage. *C* 1 hour, *L* 6 hours. 4 points. Mr. BUSWELL
 78 — Sanitary bacteriology. *C* 2 hours, *L* 6 hours. 5 points. Mr. BUSWELL
 79 — Sanitary biological analysis. *C* 2 hours, *L* 3 hours. 4 points. Mr. BUSWELL
 179 — Analysis of water and sewage. *C* 1 hour, *L* 6 hours. 4 points. Full course. Mr. BUSWELL
 180 — Sanitary analysis. *C* 1 hour, *L* 6 hours. 4 points. Full course. Mr. BUSWELL
 5-6 — General inorganic chemistry. *C* 2½ hours, *L* 2½ hours. 7 points. Professor REIMER, Miss KELLER, Miss TURCK and Miss TILT (Barnard College)
 41-42 — Organic chemistry, elementary course. 3 hours. 6 points. Professor REIMER (Barnard College)
 43-44 — Organic chemistry, elementary course. *L* 6 hours. 6 points. Professor REIMER (Barnard College)
 63 — Qualitative analysis. *C* 3 hours, *L* 8 hours. 7 points. Miss KELLER (Barnard College)
 64 — Quantitative analysis. *C* 3 hours, *L* 8 hours. 7 points. Miss KELLER (Barnard College)
 [105-106 — Inorganic chemistry, advanced course. *C* 3 hours, *L* 6 hours. 12 points or two full courses. Miss KELLER (Barnard College)]
 145-146 — Organic chemistry, advanced course. *C* 3 hours, *L* 6 hours. 12 points or two full courses. Professor REIMER (Barnard College)
 235-236 — Physical chemistry. *C* 3 hours. 235, half course; 236, full course. Professor MALTBY (Barnard College)

Summer Session

- sA-sAa-sAb-sAc — Elementary general chemistry. *C* 5 hours, *L* 6 hours. 4, 2 or 1 point. Professor NEISH and Assistants
 s3-s3a-s3c — Inorganic chemistry I. *C* 7 hours, *L* 15 hours. 5, 2 or 3 points. Mr. LESLIE and Assistant
 s4-s4a-s4c — Inorganic chemistry II. *C* 7 hours, *L* 15 hours. 5, 2 or 3 points. Mr. HAESELER and Assistant
 s61 — Qualitative analysis. *C* 10 hours, *L* 25 hours. 8 points. Dr. CALVERT and Assistant

- s67-s67a-s67c — Qualitative analysis. *C* 5 hours, *L* 15 hours. 5, 2 or 3 points. Dr. CALVERT and Assistant
- s68-s68a-s68c — Qualitative analysis. *C* 5 hours, *L* 15 hours. 5, 2 or 3 points. Dr. CALVERT and Assistant
- s107 — Organization and management of the chemical laboratory. *C* 2 hours. Half course. Professor FREAS
- s111 — Modern theory of analytical chemistry. Half course. Professor BEANS
- s201 — The phase rule. Half course. Professor KENDALL
- s207 — Inorganic chemistry, conferences. *C* 5 hours. Half course. Professor FREAS
- s217 — Inorganic chemistry, research. Double or full course. Professor KENDALL
- s123 — Experimental physical chemistry. *C* 3 hours, *L* 12 hours. Full course. Professor KENDALL

- s41 — Elementary organic chemistry I. *C* 7½ hours, *L* 15 hours. 5 points. Dr. FISHER
- s42 — Elementary organic chemistry II. *C* 7½ hours, *L* 15 hours. 15 points. Dr. FISHER and Mr. SCATCHARD
- s151 — Organic chemistry, advanced course. *L* 15 hours. Full course. Dr. FISHER and Mr. SCATCHARD
- s257 — Organic chemistry, research. Double course. Professor NELSON
- s66 — Quantitative analysis. *C* 5 hours, *L* 30 hours. Professor BEANS and Assistants
- s164 — Quantitative analysis, advanced. *L* 30 hours. Double course. Professor BEANS, Mr. FALES and Assistants
- s267 — Quantitative analysis, research. Double course. Professor BEANS
- s175 — Food analysis. *L* 20 hours. Full course. Professor SHERMAN and Dr. THOMAS
- s176 — Chemistry of food and nutrition. *C* 8 hours. Full course. Professor SHERMAN and Dr. THOMAS
- s275-s276 — Seminar in food chemistry. 20 hours. Full course. Professor SHERMAN
- s277 — Research in food chemistry. Double course. Professor SHERMAN and Dr. THOMAS
- [s81 — Industrial chemistry, general, I. *C* 5 hours. 2 points. Professor NEISH and Assistant]
- s82 — Industrial chemistry, general, II. *C* 5 hours. 2 points. Professor NEISH and Assistant

Extension Teaching

- eA1 — General chemistry, elementary course. *C* 2 hours, *L* 2 hours. 4 points first half year. Professor NEISH and Assistants
- eA2 — General chemistry, elementary course. *C* 2 hours, *L* 2 hours. 4 points. Mr. HAESELER and Assistants
- e6 — General inorganic chemistry. *C* 3 hours, *L* 6 hours. 5 points. Professor NEISH and Assistants
- e7 — General inorganic chemistry. *C* 2 hours, *L* 6 hours. 5 points. Mr. LESLIE and Assistant

e14-15 — Qualitative analysis. *C* 2 hours, *L* 6 hours. 5 points each half. Mr. LESLIE

e41-42 — Organic chemistry, introductory course. *C* 3 hours, *L* 6 hours. 6 points. Dr. FISHER and Assistant

e72 — Quantitative analysis, inorganic. *C* 2 hours, *L* 6 hours. 5 points.

e78 — Sanitary bacteriological analysis. *C* 2 hours, *L* 6 hours. 5 points.

Mr. BUSWELL

e79 — Sanitary biological and chemical analysis. *C* 2 hours, *L* 3 hours. 3 points. Mr. BUSWELL

Equipment. — For courses in Chemistry given at Teachers College and for courses in Chemistry and Physiological Chemistry given at the College of Physicians and Surgeons and at the College of Pharmacy, see the Table of Contents and the special *Announcements* of these Schools.

In Havemeyer Hall the Chemical Department is provided with ample space for its museum, lecture-rooms and laboratories.

There are five chemical lecture-rooms, all fully supplied with apparatus and instruments, the desks being equipped with pneumatic troughs, gas, pressure, exhaust, and electricity. The large chemical lecture-room on the ground floor contains 248 seats.

The Museum of General Inorganic and Organic Chemistry and of the Chemical Arts, a large room occupying the whole left wing of the ground floor, contains the elements and all their more important compounds, inorganic and organic; materials and products illustrating the chemical arts, and numerous models, pictures, and diagrams.

The new William H. Nichols Laboratories for General Inorganic Chemistry and Qualitative Analysis, together with the rooms for instructors and for research, occupy the whole of one floor of Havemeyer Hall. They are fitted up in the most modern and complete way, with all the conveniences required for instruction and investigation.

The Quantitative Laboratory has eighty-eight desks. Attached to the main laboratory is a large, well-equipped balance-room, containing accurate balances, and special rooms, provided with apparatus for gas, water, food, and electrolytic analysis.

The Organic Laboratory has forty large desks, provided with gas, water, exhaust, and electricity, and has special rooms for balances, pressure ovens, glass-blowing and combustions.

The laboratory of Physical Chemistry is well equipped with the most recent apparatus adapted to a wide range of experimental work in the branches of heat, light, electricity, etc., as applied to chemical problems.

The Chemical Library in Havemeyer Hall is supplied with an extensive collection of chemical books and journals, and is open from 9.00 A.M. to 5.00 P.M.

The Department of Chemistry at Barnard College has laboratories well equipped with every facility for the proper study of the subjects offered. The desks have water, gas, and electricity. There is a small library of useful reference books in chemistry to which the students have free access during the entire day.

The laboratories and lecture-room of Teachers College are well equipped for illustrating the teaching of Chemistry in secondary and normal schools. In these the chemistry classes of the Horace Mann Schools receive their instruction, and by observation and practical work in connection with the classes the students in Education 191-192 are enabled to become familiar with the duties of a teacher of Chemistry.

183 or 184 — Industrial electrochemistry. *C* 2 hours. *L* 1 afternoon. Professor TUCKER and Assistant

288 — Electrochemistry, research. *L* 5 afternoons. Professor TUCKER and Assistant

Equipment. — In Havemeyer Hall the Chemical Engineering Department is provided with space for its museum, lecture-rooms, and laboratories, and every convenience has been furnished for both the instructors and students working in the general or special courses.

The Chandler Museum of General Inorganic and Organic Chemistry and of the Chemical Arts, a large room occupying the whole left wing of the ground floor, contains the elements and all their more important compounds, inorganic and organic; materials and products illustrating the chemical arts, and numerous models, pictures, and diagrams.

The Laboratory of Chemical Engineering for the instruction of students in practical application and the solution of problems in connection with the chemical industries, is equipped for the manufacture of pure chemicals from their raw materials on a large scale, with batteries of steam evaporators, and with stills, centrifugals, filter presses, crushers, vacuum dryers, multiple effect evaporators, and general apparatus for industrial research.

The Laboratory for Applied Electrochemistry is equipped with special motor-dynamos, one of which furnishes direct current at low voltages to the students' desks for general electrolytic work; the other provides heavy alternating current to the electric furnace room; this room is furnished with all appliances for electric furnace work. The students' desks are fitted with special switchboards and measuring instruments, and the laboratory has been arranged for carrying on research work in all branches of electrochemistry.

The Furnace Room includes standard types of pot furnaces, muffle furnaces, oven furnaces and a rotary furnace equipped with an automatic heat control device. This apparatus taken in conjunction with the electric furnaces covers a wide range of heating operations.

A new laboratory for Engineering and Fuel Chemistry has recently been installed. The equipment includes standard types of apparatus for industrial water analysis and treatment, solid, liquid and gaseous fuel analysis, petroleum distillation, examination and testing of lubricants, coal grinding and sampling gas and fuel calorimeters, etc.

The Chemical Library in Havemeyer Hall is supplied with an extensive collection of chemical and chemical engineering books and journals, and is open from 9.00 A.M. to 5.00 P.M., and during the session of the University from 8.00 to 11.00 P.M.

Professors: A. H. BLANCHARD, W. H. BURR (*Executive Officer*), E. B. LOVELL

Assistant Professors: J. K. FINCH, D. D. JACKSON, L. D. NORSWORTHY

Instructors: H. B. DROWNE and J. S. MACGREGOR

Lecturer: R. H. BROWN and G. R. TUSKA

Assistants: F. MILLER and H. L. WHITTEMORE

2 — Theory of plane surveying. 2 hours. Professors LOVELL and FINCH and Assistants

2as — Theory of plane surveying. Two and one-half weeks field work. 3 points. Professor FINCH and Assistants

15s — Land surveying — five weeks field work. Professor FINCH and Assistants

25s — Topographic and city surveys — five weeks field work and office work. Professor FINCH and Assistants

26s — Hydrographic surveying — two weeks field and office work. Professor FINCH and Assistants

26as — Limnology — three weeks field and laboratory work. Professor FINCH and Assistants

27s — Topographic and mine claim surveys — five weeks field and office work. Professor FINCH and Assistants

28s — Railroad surveying — three weeks field and office work. Professor FINCH and Assistants

29s — Railroad surveying — four weeks field and office work. Professor FINCH and Assistants

121 — Highway engineering. 2 hours. Professor LOVELL

122 — Maps and road plans. 2 afternoons. Professors LOVELL and FINCH

150 — Theory of railroad surveying. 2 hours and 1 afternoon. Professors LOVELL and FINCH

151-152 — Theory of railroad surveying. 3 hours and 1 afternoon. Professors LOVELL and FINCH

153 — Elasticity and resistance of the materials of engineering. *C* 5 hours, *L* 2 afternoons. Professors BURR and NORSWORTHY, Mr. MACGREGOR and Assistants

155 — Elasticity and resistance of the materials of engineering. *C* 3 hours, *L* 1 afternoon. Professors BURR and NORSWORTHY, Mr. MACGREGOR and Assistants

158 — Masonry structures. *C* 3 hours, *L* 1 afternoon. Professor NORSWORTHY

160 — Sanitary treatment of water supply and sewage. *C* 2 hours, *L* 2 afternoons in February in the Bacteriological Laboratory. Professor JACKSON

161 — Analytical theory of trusses. *C* 2 hours, *L* 1 afternoon, and conferences. Professor NORSWORTHY

162 — Graphic statics. *C* 2 hours, *L* 1 afternoon. Professor NORSWORTHY

164 — Graphic statics. *C* 1 hour, *L* 1 afternoon. Professor NORSWORTHY

175 — Hydraulics. 3 hours. Professor FINCH

177 — Hydraulics. 2 hours. Professor FINCH

183 — The design and construction of bridges, roofs and buildings. *C* 2 hours, *L* 1 afternoon, first half only. Professors BURR and NORSWORTHY

185 — Foundations. 2 hours, and conferences. Professor BURR

186 — Heating and ventilating. 2 hours. D. D. KIMBALL

187-188 — The design and construction of bridges, roofs, and buildings. *C* 2 hours, *L* 2 afternoons first half, *C* 2 hours second half and conferences. Professor NORSWORTHY

189-190 — Railroad engineering. 3 hours and 1 afternoon for conferences and design work. Professors LOVELL and FINCH

191 — Reinforced concrete construction. 1 hour. Professor BURR

193 — Sanitary statistics and reports and field problems in sanitation. 2 hours. Professor JACKSON and Mr. BROWN

194 — The design and construction of sewers, and river and harbor improvements. 2 hours. Professor BURR and Mr. BROWN

195 — Sanitary design. 2 afternoons. Mr. BROWN

196 — Principles of sanitary science and public health. 2 hours. Professor JACKSON

197 — Water supply, water power and irrigation. 3 hours. Professor FINCH

198 — Street cleaning and municipal waste disposal. 1 hour. Professor JACKSON

199-200 — Graduation thesis. A project or thesis on some civil engineering subject, approved by the head of the department, is required of every candidate for the degree of Civil Engineer.

Advanced Courses

The advanced courses in the department of Civil Engineering qualifying for the University degrees of Master of Arts and Doctor of Philosophy (those courses which fulfill the residence requirements) are the following:

253-254 — Elasticity and resistance of materials. Half course. Professors BURR and MORECROFT

257-258 — Elastic and masonry arches. Half course. Professor NORSWORTHY

275-276 — Hydraulics (Civil Engineering 175 with additional reading). Half course. Professor FINCH

285-286 — Foundations (Civil Engineering 185 with additional reading). Half course. Professor BURR

287-288 — Long span bridges. Half course. Professors BURR and NORSWORTHY

291-292 — Railroad location. Half course. Professors FINCH and LOVELL

259-260 — Sanitary engineering. Full course. Professor JACKSON

277-278 — Hydraulic engineering. Full course. Professor FINCH

289-290 — The engineering of structures. Full course. Professor BURR

293-294 — Railroad engineering. Full course. Professors FINCH and LOVELL

Summer Surveying. — These courses are conducted during each summer vacation at Camp Columbia, near Litchfield, Conn., where ample facilities are provided for all requisite operations, and where the topography is admirably adapted to the practical work of surveying. The courses there given are those announced above under the numbers **15s**, **25s**, **26s**, **26as**, **27s**, **28s**, and **29s**. For details consult separately printed pamphlet which may be had upon application to the Secretary.

Highway Engineering

The following courses constitute the Graduate Course in Highway Engineering which leads to the degree of A.M. with Highway Engineering as the subject of major interest. For details consult separately printed pamphlet which may be had upon application to the Secretary.

101 — Economics and design of roads and pavements. Lectures, inspection trips and reports. 2 points or half course. Professor BLANCHARD

102 — Broken stone, gravel and other roads; brick, stone block, wood block, and cement concrete pavements. Lectures, inspection trips and reports. 2 points or half course. Professor BLANCHARD

103 — Bituminous surfaces and bituminous pavements. Lectures, inspection trips and reports. 2 points or half course. Professor BLANCHARD

104 — Highway jurisprudence, highway laws and systems of administration. Lectures, reading and conferences. 2 points or half course. Professor BLANCHARD

105 — Highway bridges and culverts. Lectures and problems in design work. 2 points or half course. Professor BURR and Mr. DROWNE

106 — Management engineering. 2 points or half course. Mr. DROWNE

107 — Mechanical appliances used in highway engineering. Lectures, inspection trips and reports. 2 points or half course. Mr. DROWNE

108 — Non-bituminous road materials, laboratory course. 2 points or half course. Mr. DROWNE

109 — Planning of roads and road systems. Lectures, inspection trips and design work. 2 points or half course. Mr. DROWNE

110 — Planning of streets and street systems. Lectures, inspection trips and design work. 2 points or half course. Mr. DROWNE

111 — Seminar in highway engineering literature. First session. Reading and conferences. 2 points or half course. Professor BLANCHARD

112 — Seminar in highway engineering literature. Second session. Reading and conferences. 2 points or half course. Professor BLANCHARD

e114 — Bituminous materials, surfaces and pavements. Lectures. 2 points or half course. Equivalent of Highway Engineering **103**. Professor BLANCHARD, Mr. DROWNE, Mr. HUBBARD and Mr. SMITH

Chemistry. — **H199** — Mining, manufacture, testing and inspection of bituminous materials. Lectures, demonstrations, seminars and inspection of refineries. 2 points or half course. Mr. HUBBARD

H200 — Testing of bituminous materials, laboratory course. Lectures, seminars and laboratory work. 2 points or half course. Mr. HUBBARD

Geology — **H215** — Engineering geology. Lectures, laboratory and field work. 2 points or half course. Professors KEMP and BERKEY

H216 — Engineering petrography. Lectures and laboratory work. 2 points or half course. Professors KEMP and BERKEY.

Extension Teaching

e1-2 — The theory of plane surveying. 2 points. Professor FINCH

e2a — Field problems in plane surveying. Professor FINCH

eX1-X2 — Theory of railroad surveying. Professor FINCH

eX2a — Field problems in railroad surveying. Professor FINCH

eY1a-Y2 — Plain and reinforced concrete construction. Professor FINCH

eY3 — Fire resistive, structural design and equipment. 2 points. Mr. PERRINE

e75-76 — Hydraulics. Professor FINCH

eX1 — Sanitary engineering. The design and construction of sewers. Mr. BROWN

eX2 — Sanitary engineering. Sewage treatment. Mr. BROWN

eY2 — Sanitary engineering. Sanitary design. Mr. WALKER

Equipment. — The department possesses an unusually full equipment of engineers' and solar transits, levels, plane tables, compasses, and all accessories, as well as similar instruments. Current meters, hook gauges, and floats of various types are also used in making observations in the flow in and discharge of rivers and canals. A complete set of sections of iron and steel shapes, models, and photographs of engineering works, together with working plans of the latter, are in the department for the use of students. The hydraulic laboratory affords opportunity for the practical operations of measuring the discharge through weirs and other orifices, the flow through open channels and closed pipes, frictional and other resistances in pipes and open channels, as well as for meter gaugings, and for general hydraulic investigations. The testing work in the mechanical laboratory includes the complete tests of various structural materials in tension, compression, bending, and torsion, including the observation and digesting of all corresponding data.

Equipment. — The general library is unusually rich in early and rare editions of the Classics and contains also an excellent selection of recent works on the Latin and Greek languages and literatures and on classical philology in general. The departments of archæology, epigraphy, paleography, Roman history and Roman law are especially well represented. The library receives all the important serial publications, issued abroad and at home, in the field of philology and archæology. The Avery Library contains a large number of illustrated works on art and archæology as well as on architecture and offers an unusual opportunity for the study of these subjects. Furthermore, in the Drisler and Earle Collections in the departmental reading room in Philosophy Building the department possesses a special library of selected works which is at the disposal of graduate students. The department is also fairly well equipped with maps, plans, etc.; owns a large collection of photographs of Greek and Roman monuments, localities, and sculpture; and has a large number of squeezes of inscriptions. On the Roman side the Olcott Collection includes a valuable collection of ancient coins, some original inscriptions, and a collection of miscellaneous antiquities. Moreover, the students of the University have free access to the collections of the Metropolitan Museum of Art for study and comparison.

CLINICAL INSTRUCTION

in Dermatology and Syphilology, Laryngology, Ophthalmology, Orthopedic Surgery and Otology. For Clinical Instruction in Medicine, Surgery, Urology, Obstetrics, Gynecology, Neurology, and Pediatrics, details will be found under the general heading of these departments.

See introductory paragraphs, page 61

Professors: G. BACON, W. F. CHAPPELL, C. G. COAKLEY, R. C. DENIG, J. A. FORDYCE, V. P. GIBNEY, J. R. HAYDEN, A. H. KNAPP and R. W. LEWIS, JR.
Assistant Professors: R. WHITMAN and G. R. ELLIOTT

Instructors: C. G. BANDLER, H. B. BLACKWELL, M. L. CARR, G. H. COCKS, A. P. COLL, B. C. DARLING, O. DIEM, R. FROTHINGHAM, C. H. JAEGER, R. KINGSLEY, J. LESHURE, J. B. LYNCH, J. F. MCCARTHY, G. M. MACKEE, A. MICHAELIS, T. L. SAUNDERS, M. S. SCHOENBERG, J. W. WHITE, J. R. WHITING and F. WISE

Lecturer: O. H. ROGERS

Clinical Assistants:—*Orthopedic Surgery*—W. BLANCARD, S. BOORSTEIN, W. FRIEDES, A. RICHMAN, H. D. SONNENSCHEN; *Otology*—M. L. CARR, A. MICHAELIS, I. H. ALEXANDER; *Dermatology*—E. W. ABRAWOWITZ, W. P. ANDERTON, WISE, J. REMER, I. ROSEN, E. J. SNYDER, W. BLANCARD, E. C. JAGLE, M. SCHEER, F. STEINKE, C. T. STEVENS, C. T. SHARPE, W. B. LONG; *Ophthalmology*—R. BARVER, D. W. FRYE, J. B. LYNCH, M. J. SCHOENBERG, L. GREENBERG, E. HARLOW; *Laryngology*—A. S. BLUMGARTEN, A. COLL, D. S. HARDENBERG, J. LESHURE, C. OSGOOD, D. A. SINGER, B. FREUDENFALL, R. S. HINSDALE, L. GREENBERG

Dermatology

201-202—Dermatology and syphilology. 1 hour. Professor FORDYCE

204—Practical instruction in the diagnosis and treatment of diseases of the skin and syphilis; instruction in radiography. At the Vanderbilt Clinic; 2 hours. Dr. MACKEE

205—Histo-pathology of skin diseases and syphilis (Vanderbilt Clinic). 3 hours. Drs. MACKEE and WISE

207—Dermatological therapeutics (Vanderbilt Clinic). 3 hours. Dr. WISE

209—Radiotherapy in skin diseases (Vanderbilt Clinic). 3 hours. Dr. MACKEE

211—Clinical diagnosis and treatment of skin diseases (Vanderbilt Clinic). 3 hours. Dr. MACKEE

The department of dermatology and syphilis is equipped with laboratories for histo-pathology, X-ray therapy, and serology as well as with a separate department for the treatment of syphilis by intravenous and intramuscular medication.

Genito-Urinary

201—Practical instruction in the diagnosis and treatment of genito-urinary and venereal diseases (Vanderbilt Clinic). 2 hours. Drs. WHITING and KINGSLEY

202—Genito-urinary and venereal diseases (Vanderbilt Clinic). 1 hour. Professor HAYDEN

204—Hospital clinics in genito-urinary diseases (Bellevue Hospital). 1½ hours. Professor HAYDEN and Drs. MCCARTHY and BANDLER

206 — Practical instruction in the diagnosis and treatment of genito-urinary and venereal diseases (Vanderbilt Clinic or Bellevue Hospital). 2 hours. Drs. WHITING and KINGSLEY

Laryngology. — **201** — Practical instruction in laryngology (Vanderbilt Clinic). 2 hours. Dr. FROTHINGHAM, COLL and LESHURE

202 — Clinical lecture on laryngology (Vanderbilt Clinic). 1 hour. Professor COAKLEY

204 — Practical instruction in laryngology (Vanderbilt Clinic). 2 hours. Dr. FROTHINGHAM and Assistants

206 — Clinical course in diagnosis and treatment (Vanderbilt Clinic). 1 hour. Professor COAKLEY

207 or **208** — Practical clinical instruction in laryngology (Manhattan Eye, Ear, and Throat Hospital). 1 hour. Professor CHAPPELL and Dr. COCKS

Ophthalmology

201 — Practical instruction in ophthalmology (Vanderbilt Clinic). 2 hours. Drs. WHITE, LYNCH, DIEM and SCHOENBERG

202 — Clinical lectures upon the diseases of the eye (Vanderbilt Clinic). 1 hour. Professor KNAPP

205-206 — Hospital clinics in ophthalmology (Herman Knapp Memorial Eye Hospital). Professor KNAPP

Orthopedic Surgery

202 — Clinical lectures on orthopedic surgery and diseases of the joints. 1 hour. Professor GIBNEY

203-204 — Practical instruction in orthopedic surgery (Hospital for the Ruptured and Cripple). 2 hours. Professor WHITMAN

205-206 — Practical instruction in orthopedic surgery (Vanderbilt Clinic). 2 hours. Dr. JAEGER

207 — Operations in orthopedic surgery (Hospital for the Ruptured and Cripple). 1 hour. Professor GIBNEY

201 — Description and interpretation of X-Ray examinations of bone and joint disease and injury conditions by lantern slides (Vanderbilt Clinic). 1 hour. Dr. DARLING.

Otology

201 — Didactic lectures in otological pathology and therapeutic methods (Vanderbilt Clinic). 1 hour. Professor BACON

202 — Practical instruction in the diagnosis of the diseases of the ear (Vanderbilt Clinic). 2 hours. Drs. SAUNDERS, MICHAELIS and CARR

205-206 — Operations and bedside instruction in otology (New York Eye and Ear Infirmary). 2 hours. Professors BACON and LEWIS

DISEASES OF CHILDREN

See introductory paragraphs, page 61

Professor: L. E. HOLT (*Executive Officer*)

Associates: H. W. BERG, R. S. HAYNES, F. H. BARTLETT and L. E. LAFETRA

Instructors: H. H. MASON, N. R. NORTON, C. H. SMITH, H. B. WILCOX and A. L. GOODMAN

Assistants: B. W. HAMILTON, J. S. LEOPOLD, S. MCLEAN, M. J. MERSEREAU, O. M. SCHLOSS, J. F. SAMMIS, M. S. REUBEN, G. W. GRAVES and L. M. SILVER

Clinical Assistants: G. A. SCHNEPEL, H. R. MIXSELL, I. MILLER, H. L. BIBBY, J. WASHTON, M. FRIEDSON, G. R. MANNING, E. E. CLEAVES and L. L. FULKERSON

201 — Recitations in diseases of children. 1 hour; first half of third year. Dr. BARTLETT

203 — Clinical lectures on diseases of children (Vanderbilt Clinic). 1 hour; first half of third and fourth years. Professor HOLT

204 — Didactic lectures on diseases of children. 1 hour; second half of third and fourth years. Professor HOLT

206 — Examination and diagnosis of the diseases of children (Vanderbilt Clinic). 2 hours; one-sixth of third year. Drs. HAYNES and C. H. SMITH and Assistants

207-208 — Bedside instruction in the contagious diseases of children (Willard Parker and Scarlet Fever Hospital). 1 hour; one-fifth of third year. Drs. BERG and HAYNES

209-210 — Hospital clinic in diseases of children (New York Foundling, or Babies' Hospital). 3 hours; one-fourth of fourth year. Professor HOLT

211-212 — Clinical instruction in diseases of children (Bellevue Hospital). Three times a week for four weeks. Drs. LAFETRA and WILCOX

213-214 — Diseases of children (Babies' Hospital). 6 hours; one-fourth of fourth year. Drs. BARTLETT and MCLEAN

215-216 — Diseases of children (Bellevue Hospital). 6 hours; one-fourth of fourth year. Drs. LAFETRA and WILCOX

217-218 — Diseases of children (Foundling Hospital). 6 hours. During Oct., Apr., and May; fourth year. Dr. NORTON

219-220 — Course in intubation (Foundling Hospital). Dr. NORTON

221-222 — Diseases of children (German Hospital). 2 hours; one-half of third year. Drs. GOODMAN and LEOPOLD

Post Graduate Instruction. — A limited number of graduates in medicine will be received in this department for post-graduate instruction. No students will be admitted for less than one half-year and applicants must have had a previous hospital training. The instruction will include clinical work in general diagnosis and treatment of diseases of children in the wards of Babies', Foundling, and Bellevue Hospitals and in the Vanderbilt Clinic, special instruction in contagious diseases at the Willard Parker and Scarlet Fever Hospitals, and opportunities for witnessing post-mortem examinations at the New York Foundling Hospital.

DRAFTING

See introductory paragraphs, page 61

Associate Professor: R. E. MAYER (*Executive Officer*)

Assistant Professors: S. O. MILLER and T. H. HARRINGTON

1-2 — Elements of engineering drafting, lettering, projections, working drawings, topography. C 1 hour, D 5 hours. 2 points. Professors MAYER, MILLER and HARRINGTON

3 or 4 — Descriptive geometry — Problems on point, line, and plane; tangent planes; intersections; developments; warped surfaces. *C* 3 hours. 3 points. Professors MAYER, MILLER and HARRINGTON

5-6 — (a) Graphics — Shades and shadows; perspective; (b) Stone-cutting. 3 hours. *C* and *D*. Professors MAYER, MILLER and HARRINGTON

7-8 — (a) Structural drawing; (b) Machine drawing. 6 hours. *C* and *D*. Professors MAYER, MILLER and HARRINGTON

Summer Session

sa — Mechanical drafting. 2 points. Professor MAYER

s1-2 — Mechanical drafting. 3 points. Professor MAYER

s3-4 — Descriptive geometry. 2 points. Professor MAYER

s6, 7-8 — Advanced mechanical drafting. 3 points. Professor MAYER

Extension Teaching

e1-2 — Mechanical drafting. 4 points. Professor HARRINGTON

e3-4 — Descriptive geometry. 2 hours. 4 points. Professor HARRINGTON

e5 — Graphics. *C* 1 hour, *D* 5 hours. 2 points. Professor HARRINGTON

e8 — Specialized engineering drafting. (a) Structural drafting. (b) Machine drafting. *C* 1 hour, *D* 5 hours. 2 points. Professor HARRINGTON

Equipment. — The collections of the department contain models illustrating problems in projections and descriptive geometry, a special feature of which is the set of Olivier models illustrating the warped surfaces and problems in intersections and tangencies.

ECONOMICS AND SOCIAL SCIENCE

Equipment

The Library facilities are unexcelled. Every journal of importance, American or foreign, dealing with economics or social science, is taken regularly by the Library. Any book needed by advanced students can usually be bought at once. The special library of history and political science alone comprises more than eighty thousand volumes.

The facilities offered to students of sociology and social economy include a large library of general and special works, on sociological theory, the history of the family, pauperism, crime, and penology. Arrangements have been made with the Charity Organization Society, the State Charities Aid Association, the University Settlement, the East Side House, and the Brooklyn Bureau of Charities by which students can become fully acquainted with actual work among the people and with the most perfect methods.

Students of economics and social science will find in New York unrivaled library facilities. In addition to the University, there are the New York Public Library on the Astor, Lenox, and Tilden foundation, New York Historical Library, Long Island Historical Library, Library of the New York School of Philanthropy, the Bar Association Library, and the Law Institute Library, to each of which students have access under favorable conditions. Advanced students also have at their disposal the library of the MeVickar Professor of Political Economy which contains an important collection of works on earlier economies.

The Statistical Laboratory, conducted by Professor Chaddock, is equipped with the most modern devices for facilitating statistical work, including the Hollerith punching, sorting, and tabulating machines, Burroughs adding machines and several calculators of the Brunsviga and Millionaire types, calculating tables, and materials and devices for the construction of graphs. Some of the most necessary current sources of statistical data, both for our own and for foreign countries, are kept upon the shelves for reference and instruction.

Students also have the privilege of attending all of the courses in the School of Philanthropy conducted by the Charity Organization Society.

¹ Given at the New York School of Philanthropy.

EDUCATION

163-164 — Supervision of school music. 2 half-courses. Professor FARNSWORTH

363-364 — Practicum in the Teaching of School Music. 2 full courses. Professor FARNSWORTH

Physical Education

187-188 — Hygiene of childhood and adolescence. 2 half-courses. Professor WOOD

189-190 — The teaching of hygiene and physical education. 2 half-courses. Professor WOOD and Assistants

191 — The teaching of hygiene in the elementary grades. Half-course. Miss ADAMS

193-194 — Dramatic expression in physical education. 2 half-courses. Miss THORNTON, Madame ALBERTI, and Mr. WILLIAMS

185-186 — Play and playgrounds. 2 half-courses. Mr. JOHNSON

389-390 — Practicum in hygiene and physical education. 2 full courses. Professor WOOD

Physical Science

197-198 — The teaching of physical science in secondary schools. Chemistry and physics. 2 full courses. Professor WOODHULL

395-396 — The history of physical science. 2 half-courses. Professor WOODHULL

397-398 — Practicum in physical science. 2 full courses. Professor WOODHULL

521-522 — Seminar in the history and teaching of physical science. Professor WOODHULL

ELECTRICAL ENGINEERING

See introductory paragraphs, page 61

Professor: W. I. SLICHTER (*Executive Officer*)

Associate Professor: J. H. MORECROFT

Assistant Professor: M. ARENDT

Instructors: F. W. HEHRE, F. R. KELLER, F. L. MASON

Assistants: J. R. BALMFORD, E. L. FISHER, G. S. PARKER

Professors M. I. PUPIN and A. P. WILLS of the Department of Physics give instruction in electro-mechanics to the Electrical Engineering students. See the statement of the Department of Physics.

101 — Elements of electrical engineering. 2 hours. Professor SLICHTER

102 — Electrical machinery. 2 hours. Professor MORECROFT

117 or 118 — Direct current machine laboratory. C 1 hour, L 1 afternoon. Mr. HEHRE

103 or 104 — Elements of alternating current engineering. 2 hours. Professors SLICHTER and ARENDT

119 or 120 — Alternating current machine laboratory. C 1 hour, L 1 afternoon. Professor MORECROFT and Mr. KELLER

106 — Alternating current machinery. 2 hours. Professors SLICHTER and ARENDT

107 — Applications of electric machinery. 2 hours. Professor ARENDT.

112 — Electric railways. 2 hours. Professor SLICHTER

108 — Design of direct current machinery. C 3 hours, L 1 afternoon. Professor ARENDT

110 — Electrical communication. 2 hours. Professor ARENDT

105 — Alternating current engineering. 2 hours. Professor SLICHTER

109 — Applications of electrical machinery. 2 hours. Professor ARENDT

125 — Standardizing laboratory. C 1 hour, L 1 afternoon. Mr. MASON

114 — Electric plants. 2 hours. Professor SLICHTER

116 — Design of alternating current machinery. C 2 hours, L 1 afternoon. Professor SLICHTER

126 — Illumination. *C* 1 hour, *L* 1 afternoon. Mr. MASON

121-122 — Direct current machine laboratory. *C* 2 hours, *L* 2 afternoons. Mr. HEHRE

123-124 — Alternating current laboratory. *C* 3 hours, *L* 2 afternoons. Professor MORECROFT and Mr. KELLER

The following special courses are given to Naval Officers pursuing graduate work at Columbia and not open to other students:

171N — Direct current laboratory **153-154N** — Design of electrical machinery

102N — Electric motors

105N — Alternating currents

105AN — Alternating currents

109-110N — Telegraph and telephone

173N — Direct current laboratory

176N — Alternating current laboratory

177N — Instrument laboratory

201-202N — Seminar

211-212N — Radio laboratory

Summer Session

s1 — Elements of electrical engineering. 4 points. Mr. HEHRE

s101-102 — Elements of Electrical Engineering and Elements of Electrical Machinery. 4 points. Professor MORECROFT

s151 — Electrical machine laboratory. 4 points. Mr. HEHRE

Extension Teaching

e1 — Elements of electrical engineering. 2 evenings a week first term. 3 points. Mr. HEHRE and Assistant

e2 — Principles of direct current machinery. 2 evenings a week second term. 3 points. Mr. HEHRE and Assistant

e3 — Elements of alternating currents. 2 evenings a week first term. 3 points. Mr. HEHRE and Assistants

e4 — Principles of alternating current machinery. 2 evenings a week second term. 3 points. Mr. HEHRE and assistant

Equipment. — The offices, laboratories, museums, and lecture-rooms of the electrical engineering department are in the Engineering Building.

The laboratories located in the basement contain direct and alternating current machinery and apparatus. The various machines in these laboratories are, respectively, examples of constant-potential generators, constant-current arc-lighting dynamos, many types of stationary and railway motors, and motor-dynamos. Complete sets of ampere, volt, and watt meters, speed indicators, transmission and adsorption dynamometers are available for testing the various generators and motors.

The alternating current apparatus includes single-phase and polyphase generators, induction and synchronous motors, rotary converters, mercury arc rectifiers, and various types and sizes of transformers. Test boards and complete sets of alternating current measuring instruments and curve-tracing apparatus, such as an oscillograph and ondograph, are also provided.

The lecture-rooms are provided with an ample supply of electrical currents of different forms, and other facilities for experimental demonstrations. The museum contains collections of apparatus, models, and materials relating to electrical engineering.

The large instrument laboratory on the third floor contains various forms of galvanometers, ampere balances, potentiometers, standard cells and resistances, measuring apparatus, laboratory standard volt and ammeters,

as well as the high-tension testing sets. A storage battery is provided for testing, calibration, and standardization purposes.

The photometric laboratory of this department is equipped with various forms of photometers for gas, arc, and incandescent lamp testing.

The library of the department is located on the ground floor of the Engineering Building and contains a carefully selected number of books and periodicals which are in frequent use as references while the main library contains books that are less frequently in demand.

Associate Professors: J. ERSKINE, G. A. HUBBARD and W. W. LAWRENCE

Assistant Professors: A. ABBOTT, H. M. AYRES, F. A. PATTERSON, H. R. STEEVES, A. DE. V. TASSIN, C. VAN DOREN and E. H. WRIGHT

Associate: M. F. WEEKS

Instructors: H. W. L. DANA, V. O. FREEBURG, L. B. HALL, W. HALLER, C. M. HOWARD, G. V. KENDALL, A. J. LATHAM, M. W. LATHAM G. R., LOMER, J. I. OSBORNE, E. STURTEVANT, and R. TAYLOR

Lecturers: E. H. DAVIS and D. S. FANSLER

Assistants: H. R. HULL and W. J. GRAHAM

A1-A2 — English composition. 3 points. Professors ODELL, STEEVES, WRIGHT, VAN DOREN, Dr. DANA, Dr. FANSLER, Mr. OSBORNE, Mr. FREEBURG and Mr. KENDALL (Columbia College); Professor BALDWIN, Miss WEEKS, Mr. HALLER, Dr. HOWARD, Miss STURTEVANT, Miss M. W. LATHAM, Miss HULL and Mr. GRAHAM (Barnard College)

A4-A5 — English composition. 3 points. Professors ODELL and STEEVES and Mr. OSBORNE

B — (Columbia College)

B1-B2 — Advanced composition. 2 points. Professor ERSKINE

B3-B4 — Introduction to English literature. 3 points. Professor ERSKINE, Dr. FANSLER and Mr. KENDALL

B5-B6 — English poetry. 2 points. Dr. DANA and Mr. OSBORNE

B7-B8 — English prose. 2 points. Mr. OSBORNE, Dr. FANSLER and Mr. KENDALL

B9-B10 — Introduction to literature. 2 points. Professor ERSKINE and Dr. FANSLER

B — (Barnard College)

B1-B2 — Epic and romance. 3 hours. 6 points. Miss STURTEVANT

B3-B4 — Essay and poetry. 3 hours. 6 points. Mr. HALLER and Miss HULL

B5-B6 — Survey of English literature. 3 hours. 6 points. Miss M. W. LATHAM and Mr. GRAHAM

B7-B8 — Composition. 3 hours. 6 points. Miss STURTEVANT

B9-B10 — Journalistic writing. 3 hours. 6 points. Dr. HOWARD

B11-B12 — Drama. 3 hours. 6 points. Dr. HOWARD and Miss M. W. LATHAM

B — (School of Journalism)

jB1-B2 — A general survey of English literature up to the present time.

Dr. LOMER

1-2 — English composition. 6 points. Professor TASSIN (Columbia); Professor BREWSTER (Barnard)

4 — Composition. 3 hours. Professor BALDWIN (Barnard)

7-8 — Vocal training and elocution. 6 points. Professor TASSIN (Columbia and Barnard)

11-12 — Public speaking. 6 points. Professor TASSIN (Columbia)

15 — English versification. 2 points. Professor BRANDER MATTHEWS (Columbia)

17-18 — English modern literature. 4 points. Professor STEEVES (Columbia)

19-20 — American literature. 4 points. Professor BRANDER MATTHEWS (Columbia); Professor BAKER (Barnard)

21-22 — English literature from 1780 to 1830. 6 points. Professor ODELL (Columbia)

23-24 — English literature from 1830 to 1890. 6 points. Professor VAN DOREN (Columbia); Dr. HOWARD (Barnard)

25-26 — English literature from 1557 to 1660. 6 points. Professor ERSKINE (Columbia); Professor TRENT (Barnard)

Conference Course. — For qualified students in English **25-26**, History **71-72** and Philosophy **61-62** (Columbia).

27-28 — English literature from 1660 to 1780. 6 points. Professor ODELL (Columbia); Professor TRENT (Barnard)

293 — Molière and English restoration comedy. 2 hours. Full course. Professor BRANDER MATTHEWS

307-308 — Seminar — Relations between English and continental literatures in the sixteenth century. Two full courses. Professor FLETCHER

Summer Session

sA1 — Rhetoric and English composition. 2 points. Professors ODELL and NORTHUP and Dr. FANSLER

sA2 — English composition. 2 points. Professor STEEVES and Mr. FREEBURG

sB3 — English literature and composition. 2 points. Professor ERSKINE, Dr. FANSLER

sB5 — English literature and composition. 2 points. Professor HOWE

s1 — Advanced composition. 2 points. Professor BALDWIN

This course is limited to 25 students.

s21 — English literature from 1780 to 1830. 2 points. Professor CHANDLER

s24 — English literature from 1830 to 1890. 2 points. Professor ODELL

[s25 — English literature from 1557 to 1660 not given in 1915]

s27 — English literature from 1660 to 1780. 2 points. Professor HOWE

s35 — Shakespeare. 2 points. Professor BROWN

s7 — Technique of voice and speech, and elementary vocal expression. 2 points. Mr. DAVIS and Mr. HALLIDAY

s11 — Public speaking. 2 points. Professor TASSIN

s13 — Reading. 2 points. Mr. HALLIDAY

s14 — Advanced course in reading. 2 points. Professor TASSIN

s1b — The technique of the short story. 3 points. Miss WILLIAMS

[s107 — History of the English language not given in 1915]

s129 — Anglo-Saxon. Half or full course. Professor AYRES

s130 — Chaucer. Full course. Professor AYRES

s203 — The college teaching of composition. Full course. Professor BALDWIN

s231-232 — English literature in the seventeenth century. Two full courses. Professor TRENT

s235-236 — English literature in the first half of the nineteenth century. Two full courses. Professor THORNDIKE

s267 — American literature. Full course. Professor ERSKINE

Comparative Literature

s273 — Medieval literature: romances. Full course. Professor BROWN

s289 — Main currents in literary criticism. Full course. Professor CHANDLER

Extension Teaching

esW1 — English grammar and composition. 2 points. Mr. DUNCAN

esX1 — College entrance English. 2 points. Dr. S. W. PATTERSON

esX2 — College entrance English. 2 points. Dr. S. W. PATTERSON

esY — College entrance English. 3 points. Mr. DUNCAN

es1 — Business English and commercial correspondence. 2 points. Mr.

s175-175a — Stratigraphic geology. Field work in New York State. 2 or 4 points. Half or full course. Professor GRABAU (not given in 1915)

Extension Teaching

e1 — General geology — Introductory. 3 points. Dr. REEDS

e2 — Historical geology. 3 points. Dr. REEDS

e0 — Physiography. Miss HATCH

The following courses in paleobotany are offered at the New York Botanical Garden by Dr. Arthur Hollick:

General paleobotany — Developmental history and structure of the fossil flora of some selected locality. Laboratory and museum.

Cretaceous flora of eastern North America — Collection and determination of specimens from some station with attention to stratigraphic relations. Field and laboratory.

Equipment. — The department has ample laboratories, a departmental library and reading room, and a full equipment for its several lines of work. For details see the separately printed *Announcement*.

The paleobotanical library and collections of Columbia University have been deposited at the New York Botanical Garden.

 Equipment. — The University Library offers excellent facilities for the study of German, both on the literary and the linguistic side. The Scandinavian collection contains a good representation of the ancient saga and poetical literature, and most of the eminent writers of modern Norway, Denmark, and Sweden. The Holland Society library, deposited with the University in 1901, contains a considerable collection of books and pamphlets in the Dutch language from all periods.

The Library has sets and the current numbers of all the important periodicals which deal with Germanic literature and Germanic and general philology. It has also sets of periodicals no longer published, and a large collection of the transactions and publications of the learned societies of America and Europe.

A reference library of 2000 volumes, containing the most important subsidia for the critical study of the Germanic languages and literatures and independent of the main collection in the University Library, is placed in a room adjacent to the lecture-room and offices of the department in Philosophy Hall. A similar library of about 500 volumes is maintained in Hamilton Hall for the use of advanced college students.

The income of the Carl Schurz Library Fund (\$10,000), contributed by citizens of New York in commemoration of the seventieth birthday of Carl Schurz, is, by the terms of the gift, devoted in perpetuity to the purchase of books in the field of the German language and literature.

For the Carl Schurz Fellowship in the German Language and Literature, see index.

Deutsches Haus.—The Deutsches Haus at 419 West 117th Street contains a good working library of some 3000 volumes relating to contemporary German literature, a reading-room where the more important German journals are accessible to students, and a bureau of information concerning the educational interrelations of Germany and the United States. It also serves as the residence of the Kaiser Wilhelm Professor during his stay in New York and as headquarters of the Germanistic Society. The director is Professor Wilhelm A. Braun.

Germanic Club.—The Germanic Club is an organization founded in 1902 for the purpose of reviewing and discussing important contributions to recent scholarship in the Germanic field. The Club consists of the officers, fellows, and scholars of the department. Meetings are held monthly.

Deutscher Verein.—The Deutscher Verein of Columbia University, founded in 1898, is an association of the students and instructors of the University who are interested in the study of the German language and literature, and in the acquisition of a more intimate knowledge of Germany, of German institutions, and of the German people than is furnished by academic study alone. Meetings are held bi-weekly.

Equipment. — The University Library contains many of the great published collections for the study of ancient, medieval, and modern history. The special library of history and political science numbers upwards of 150,000 volumes. The great libraries of New York, Astor, Lenox, and Tilden foundations, those of the New York and Long Island Historical Societies, and of the Bar Association are, under certain conditions, also accessible to students. Fuller information as to courses and opportunities for historical work is given in the current *Announcement of the Division of History, Economics, and Public Law*, which may be obtained by applying to the Secretary of the University. Under the auspices of the Academy of Political Science, to which advanced students are eligible as members, opportunities are given for the discussion of questions of interest as presented in papers by specialists.

HYGIENE AND PREVENTIVE MEDICINE

Associate: W. BENSEL, M.D.

202 — Hygiene and preventive medicine. 2 hours. Dr. BENSEL

33 — Social and administrative statistics. 3 hours. 3 points. Professor CHADDOCK

34 — The modern world. 3 hours. 3 points. Dr. SLOSSON

41-42 — Reporting and interviewing. 3 hours. 3 points. Mr. MACALARNEY

43-44 — Handling and heading copy. 3 hours. 3 points. Professor F. MATTHEWS

131-132 — Modern European literature. 3 hours. 3 points. Professor CUNLIFFE

141-142 — History of journalism. 3 hours. 3 points. Professor WILLIAMS

143-144 — Elements of law. 2 hours. 2 points. Professor GIFFORD

145-146 — International relations. 2 hours. 2 points. Professor WILLIAMS

Equipment. — In the Journalism Building the Department is provided with ample space for its lecture rooms, laboratories and library.

The Library of about 5000 books and 1000 bound newspapers occupies the entire second floor of the building. There is also a reading room especially strong in sociology, economics, and modern European literature. In the newspaper reading room a hundred daily papers, American and foreign, are on file. There is also a collection of about 400,000 newspaper clippings.

Lectures by distinguished journalists and public men form part of the instruction on which all undergraduate students will be examined.

Equipment. — In addition to excellent working collections of constitutions, codes, session laws, judicial decisions, government reports, legal treatises, transactions of legal societies, and law journals of the principal foreign countries as well as of the United States, the Library of Columbia University offers special advantages to students of politics, public law, and comparative jurisprudence in the collections of Henry Livingston Thomas, late chief translator to the Department of State, of the Holland Society of New York, and of the Reform Club of the City of New York, of which the Columbia Library is the depository. The materials thus furnished are richly supplemented by those in the libraries of public institutions, learned societies, and civic organizations, particularly the Hispanic Society of America, with its unique collection of materials relating to the history, institutions, and culture of Spain, Portugal, and Latin America, the Bar Association, and the Law Institute. To these libraries advanced students have access under favorable conditions.

Lectures of special interest to students of politics and jurisprudence are maintained by specific endowments, such as the Beer lectures in political science, the Blumenthal lectures in politics, and the Carpentier lectures in law. Some of these lectures are given by distinguished foreigners, others by men prominent in public life in the United States.

Equipment. — In connection with the Department of Mathematics and in addition to the regular library facilities there is a large and fully equipped reading-room, 108 Library, in which are available the current numbers of over one hundred and fifty mathematical journals and periodicals.

The laboratory equipment of the department has been greatly increased. Recent acquisitions of mathematical models and instruments include the famous collections of Wiener and Schilling. Room 503 Fayerweather has been set apart as a mathematical laboratory and model room.

Teachers College is well supplied with models and apparatus for use in teaching mathematics in all grades, from the kindergarten through the high school, together with various instruments for mechanical computation, including a Stanley arithmometer. The large collection of instruments, autographs, portraits, and other material illustrating the historical development of mathematics, the property of Professor Smith, is placed at the disposal of the students, as is his extensive library on the history and teaching of the subject. Arrangements may be made by which advanced students in the history of mathematics may have access to the library of George A. Plimpton, Esq.,

which is particularly rich in manuscripts, incunabula, and sixteenth-century works on the subject. The department has a large collection of stereopticon slides illustrating many important manuscripts and early works from this and other libraries.

- 201-202 — Graduate metallurgical research. 4 afternoons. Professors CAMPBELL and KERN.

Summer Session

s182 — Assaying. Full course. Professor HALL

s184 — Assaying. Full course. Professor HALL

s188 — Assaying, advanced course. Full course. Professor HALL

Metallurgical Excursions. — During the summer the students see, at the metallurgical works near the city, iron blast furnaces, bessemer and open-hearth steel making, lead and copper smelting, copper bessemerizing and refining by furnace and electrolytic methods, the desilverizing of base bullion, and the parting and refining of gold and silver by electrolytic and acid methods.

Equipment. — The special teaching equipment for metallurgy contains many large lecture diagrams and bromide enlargements showing the various metallurgical appliances, and the sequence of metallurgical processes, besides many models, drawings, and apparatus for lecture demonstrations. There is also a collection of about 3000 specimens of ores, metals, and metallurgical products, and a rapidly forming collection of microscopic sections and photomicrographs of metals and alloys.

Non-Ferrous and Electrometallurgical Laboratory. — A. For wet and dry metallurgy, the extraction, smelting, refining, and alloying of non-ferrous metals, there are ore-roasting furnaces; reverberatory smelting furnace; gas-fired crucible furnaces; assay muffle furnaces; a high-temperature forget

leaching plants; a filter press; amalgamating pans; a chlorinating barrel; ball mills; desilverization kettles; and pyrometers. B. For electrometallurgy the electrical recovery, deposition, refining, and alloying of metals, there are storage batteries; a 30 K.W. motorgenerator set for supplying direct current at high amperage and a range up to 25 volts; electrolytic refining vats; small electric furnaces of the Moissan arc, Borchers arc and resistance types; and large experimental melting, smelting, and refining furnaces.

Iron and Steel Laboratory is equipped with electric and double muffle gas furnaces especially designed for this laboratory, in which a number of full-sized tensile test bars may be heated simultaneously to any temperature up to 1300° C., with uniformity and precision; gas crucible furnaces; gas forges; special furnaces; and small power-driven rolls for studying the influence of the conditions of rolling on the properties of metals.

The Metallographic Laboratories, for the microscopic and pyrometric study of metals, mattes, speiss, slags, ores, etc., have microscopes of the Leitz, Le Chatelier, and other types; equipment for illumination and photography; electric resistance furnaces of different types; portable gas furnaces; and pyrometers. The metal-working shop has power-driven machines for cutting specimens, etc.

The Assay Laboratory has for its main equipment thirty-six gas-fired muffle furnaces, with a corresponding number of desks, which are arranged in rows with a furnace facing each desk. There are, also, a sufficient number of coke pot, coal muffle and gasoline furnaces for the student to become familiar with these types. The usual balance, grinding, and cupel rooms are provided.

The laboratory gives advanced students and practitioners unusual advantages for investigating accurately the scientific and many of the economic problems of metallurgy.

Library. — A special library of about sixteen hundred volumes, on metallurgical subjects is included in the School of Mines departmental reference library.

MINERALOGY

See introductory paragraphs, page 61

Professor: A. J. MOSES (*Executive Officer*)

Assistant Professor: L. MCL. LUQUER

Instructor: H. F. GARDNER

Assistant: C. W. GREENLAND

3-4 — General mineralogy. C 2 hours, L 2 hours. 6 points. Mr. GARDNER

6 — Optical mineralogy — minerals in rock sections. L 2 afternoons for two months. Professor LUQUER and Assistants

9 — Crystal constants and crystalline structure. C 2 hours, L 1 afternoon. 4 points. Professor MOSES and Mr. GARDNER

10 — Minerals used in chemical industries. C 2 hours, L 1 afternoon. 4 points. Professor MOSES and Mr. GARDNER

11 — Optical mineralogy. 1 afternoon. 2 points. Professor LUQUER and Mr. GARDNER

14 — Mineralogy. The sight recognition and determination of the common rock-forming minerals and the great ores. C 2 hours, L 3 hours. 3 points. Professor MOSES

17 — Economic mineralogy. C 4 hours, L 2 afternoons. 10 points. Professors MOSES and LUQUER and Mr. GARDNER

17-18 — General mineralogy. C 1 hour, L 2 or 4 hours. 4 or 6 points. Professor OGILVIE (Barnard)

105 — Crystallography and optical mineralogy. C 2 hours, L 1 afternoon. Half course. Professor LUQUER

207-208 — Optical mineralogy. C 1 hour, L 1 afternoon. Two half courses. Professor LUQUER

209-210 — Physical crystallography. C 1 hour, L 1 afternoon. Two half courses. Professor MOSES

211-212 — Study of assigned subject. 12 hours per week for 2 years. Two full courses. Professor MOSES

Summer Session

s1 — The recognition and determination of the common rock-forming minerals and great ores. 3 points. Mr. GARDNER

s2 — Gems and gem minerals. 3 points. Professor MOSES and Mr. GARDNER

es2a — Gems and gem minerals. 2 points. Professor MOSES and Mr. GARDNER

s3 — Testing gems. 3 points. Professor MOSES and Mr. GARDNER

s102 — Crystals. Lectures. Half course. Professor MOSES

Equipment. — The work of the students in the college courses and in general mineralogy is performed in the lecture-room, in the blowpipe laboratory, and in the adjoining conference-room, in which are the student collections of crystal models and minerals and several thousand unlabeled specimens used in determinative work. The department possesses also about 1200 sections of minerals and rocks, 1500 crystal models in wood and glass, and a Departmental Library of 1300 volumes. Students in optical mineralogy use a separate room with north light, and for crystal measurements and monochromatic light determinations there is provided a large dark-room.

The Eggleston Mineralogical Museum contains about 30,000 labeled specimens, and includes a systematic collection; an economic collection of ores, building materials, and minerals used in chemical industries; and smaller collections illustrating: gems and ornamental stones; crystals; the genesis and alteration of minerals; the characters of minerals; artificial minerals and New York City minerals.

MINING

See introductory paragraphs, page 61

Professors: R. PEELE and R. M. RAYMOND

Assistant Professor: E. K. JUDD

Instructor: H. L. CARR

151 — Excavation and tunneling. 3 hours. Professor PEELE

152 — Boring and shaft sinking. 2 hours. Professor PEELE

154 — Exploration, development, and methods of working. 3 hours. Professor RAYMOND

156 — Mine engineering. 3 hours. Professor RAYMOND

171-172 — Mine plant. 3 hours first half-year, 2 hours second half-year.

Professor PEELE

173 — Mine constructions. 1 hour. Professor PEELE

175 — Design of mine plant. 3 afternoons. Professors PEELE and JUDD and Mr. CARR

178 — Graduating thesis or project. Professor PEELE

181 — Ore-dressing, milling, and the mechanical preparation of coal. 4 hours. Professor JUDD

182 — Ore-dressing laboratory. Afternoon work for 3 weeks. Professor JUDD and Mr. CARR

192 — Mine administration. 2 hours. Mr. WAGNER and Mr. CLARK

194 — Mining law. 2 hours. Professor ARNOLD

Summer Session

158S — Summer class in mine surveying. For a period of one week in June. Professor JUDD and Mr. CARR

159S — Summer course in practical mining. For a period of six weeks in June and July. Professors PEELE and JUDD

Special Courses

201-202 — Methods of mining. Two full courses. Professors PEELE and RAYMOND

203-204 — Mining plant. Two full courses. Professors PEELE and RAYMOND

207-208 — Ore dressing. Two full courses. Professor JUDD

211-212 — Mining and ore dressing. Mining **154**, **181** and **182**, with laboratory work and reading as required. Two full courses. Professors PEELE and RAYMOND

213-214 — Economic studies in mining. Two full courses. Professors PEELE and RAYMOND

Equipment. — The lecture courses on mining are illustrated by sets of books containing blue-prints from negatives made for the purpose. There are a sufficient number of these books to enable each student to have the use of one or more for reference during the lectures and for home study. Wall diagrams and large working blue-prints are also used for lecture illustration.

The University Library contains sets of the transactions of all mining, metallurgical, and engineering societies, and of the more important periodical publications on these subjects. There is also a large collection of books on mining, and all new publications of value are added as they appear. In addition, the School of Mines contains a reference library of mining and metallurgical books and periodicals, accessible to students at all times.

The subject of mining is illustrated by collections as follows: Maps of coal and metal mines of this and other countries. Working drawings, diagrams, and photographs of mine plant, and of mining and dressing machinery. Models of mines and parts of mines and of mine plant. Mining tools: picks, shovels, hammers, drills, blasting apparatus, lamps, safety-lamps, anemometers, and machine drills. Ores and dressing products from typical works in this and other countries. Surveying instruments: geological compasses and clinometers, attraction compasses, dipping needles, hanging compasses and arcs, transits, lamp signals, rods, and apparatus for plumbing and measuring shafts.

The basement and sub-basement of the School of Mines are equipped as laboratories for the study of ore-dressing. These laboratories serve four purposes: 1. To illustrate the physical laws bearing on mineral separation. 2. To afford opportunity for quantitative working tests. 3. To train students in the adjustment and operation of concentrating machinery, and in the making of efficiency tests under working conditions. 4. To give advanced students and others all necessary facilities for original investigation.

Many coal, iron, and other mines, slate and stone quarries, and metallurgical works are easily accessible. Within one hundred miles of New York City may be studied examples of the best practice in mining and metallurgy under varied conditions, and some of the most modern and effective mining and dressing machinery and smelting plants in the country. The excursions of the summer class in mining extend as far as the iron, copper, zinc, lead, silver, and gold regions of Michigan, Missouri, Montana, Colorado, Arizona, Utah and California.

The metropolitan situation of the School renders it possible to present, also, as parts of the regular courses in mining, special lectures by prominent engineers. The list of such lecturers and more detailed information as to the courses offered and as to the facilities of instruction will be found in the current *Announcement of the Schools of Mines, Engineering, and Chemistry*.

MUSIC

Twenty-nine courses in teaching and supervision and technic of music and speech are offered at Teachers College. (See current *Announcement of Teachers College School of Practical Arts*.)

Equipment. — A collection of music and of books of reference is placed at the disposal of students. It includes the complete works of various composers, many orchestral and opera scores, the pianoforte classics, and vocal music, besides many theoretical, historical, and biographical works. The private library of Anton Seidl, consisting of 1220 scores, was presented to the University and has been placed in the rooms of the Department of Music. Also the great library of Dr. James Pech comprising thousands of scores in all forms of composition. The department has also a collection of instruments for the use of students participating in the University Orchestra.

The Department of Music offers two annual recitals of original compositions by students in the department, and the regular concerts of the University Orchestra and the University Chorus.

The Institute of Arts and Sciences offers numerous concerts and recitals. For details consult separately printed bulletin which may be procured through the Secretary of the University.

NATURE STUDY

Five courses in nature study for elementary and high schools are offered under the auspices of Teachers College. For details see the current *Announcement of Teachers College School of Education and Practical Arts*. (See also Botany and Zoölogy.)

NEUROLOGY

See introductory paragraphs, page 61

Professor: F. TILNEY (*Executive Officer*)

Professor of Clinical Opthomology: W. R. HOLDEN

Assistant Clinical Professors: S. P. GOODHART, E. L. HUNT and L. CASAMAJOR

Assistant Professor: W. A. HOLDEN

Instructors: J. V. HABERMAN, R. HOYT, C. A. MCKENDREE, A. P. EVANS, and T. H. AMES

Clinical Assistants: J. L. MACUMBER, W. SHARPE, C. L. NICHOLS, N. SHARPE, S. BROWN, L. A. ARONSON, G. A. BLAKESLEE, J. O'NEIL, S. R. LEAHY, L. H. CORNWELL, N. J. GOTTBRAH

Courses 201-202 and 205 are open to candidates for the degree of A.M. or Ph.D.

201-202 — Neurology: The diseases of the nervous system. 1 hour. Professors TILNEY, CASAMAJOR and HUNT, and Dr. AMES

203-204 — Clinical lectures in neurology. (Vanderbilt Clinic.) 1 hour. Professors STARR and TILNEY

205 — Psychiatry. (Vanderbilt Clinic.) 1 hour. Professor TILNEY

207-208 — Practical instruction in the methods of examination of nervous patients, electro-diagnosis and electro-therapeutics. (Vanderbilt Clinic.) 2 hours. Professor TILNEY

209-210 — Practical instruction in the methods of examination of insane patients. (City Hospital.) 1 hour. Professor CASAMAJOR

211-212 — Researches in newer methods of neurological examination. (Vanderbilt Clinic.) 2 hours. Professor TILNEY

213-214 — Research in the examination of the mentally defective. (Vanderbilt Clinic). 2 hours. Professor CASAMAJOR

231-232 — Clinical psychology (psychopathology) and psychotherapy, inclusive of the psychopathology, psychotherapy, and mental examination of the psychopathic child. (Vanderbilt Clinic.) 1 hour. Dr. HABERMAN

Equipment.—The laboratory of the Neurological Department is in possession of numerous models and casts of the brain and spinal cord; of more than 500 lantern slides illustrating the pathology of nervous diseases; and of a large collection of microscopic slides and of gross specimens. There are two laboratory workers constantly employed.

NURSING AND HEALTH

Eighteen courses in Nursing and Health are offered under the direction of Teachers College. For details see the current *Announcement of Teachers College, School of Practical Arts*.

OBSTETRICS

See introductory paragraphs, page 61

Professors: E. B. CRAGIN (*Executive Officer*) and H. M. PAINTER

Associate Professor: J. D. VOORHEES

Associate: E. M. COLIE, JR.

Instructor: W. HILDRETH

102 — Recitations and demonstrations in obstetrics. 2 hours. Professor VOORHEES

210 — The theory and practice of obstetrics. 3 hours. Professor CRAGIN

203-204 — Practical instruction in obstetrics. (Sloane Hospital for Women.) Dr. HILDRETH

205-206 — Out-patient service in obstetrics. Professor PAINTER and Dr. COLIE

ORIENTAL LANGUAGES

Instructors: B. T. TERRY, M. J. SITTENFIELD, B. S. KLINE, G. M. MCKENZIE, and H. A. RILEY

Assistants: C. W. FIELD, H. S. HOWE, V. B. SEIDLER, B. R. ALLISON, F. A. EVANS and R. W. LEWIS

Courses **101-102**, **105-106**, **107**, **201-202**, and **251-252** are open to candidates for the degree of A.M. or Ph.D. Courses **101-102**, **105-106**, **107**, **113-114**, **201-202**, **203**, **205**, and **251-252** are open to graduates in medicine.

101-102 — General and special pathology. 6 hours, first half, and 9 hours second half year. Two full courses. Professors MACCALLUM and PAPPENHEIMER, and Dr. LAMBERT, and others

103-104 — Conference in pathology. 1 hour. Professor MACCALLUM

105-106 — Gross pathological anatomy and attendance upon autopsies

in sections one hour daily. 2 hours. 2 half courses. Professors MACCALLUM and PAPPENHEIMER, and Drs. FIELD, LAMBERT, and others

107 — Experimental pathology. 3 hours. Half course. Professor MACCALLUM

109-110 — Microscopical study of autopsy material. 3 hours. Drs. LAMBERT and MACKENZIE

113-114 — Clinical and pathological conference. 1½ hours. Professors MACCALLUM, PAPPENHEIMER and LONGCOPE, and Drs. SWIFT and LAMBERT

201-202 — Advanced pathology. 2 half, full or double courses. The officers of the department

203 — Gynecological pathology. 2 hours. Dr. LAMBERT

205 — Pathology of certain common diseases. 3 hours. Drs. LAMB and PAPPENHEIMER

251-252 — Research in pathology. Two half, full or double courses. Professor MACCALLUM and staff

Equipment. — The department of pathology occupies the greater part of the fourth floor of the north building of the college, together with large class laboratories, amphitheater, photographic rooms, etc., on the fifth floor. On the fourth floor there are, besides the rooms devoted to the staff, large rooms with abundant desk room for special workers, several specially equipped operating rooms for aseptic experimental work, a small chemical laboratory, the museum, preparation rooms, cold storage, etc. Two rooms on this floor are occupied by the library, which is accessible to workers in this and related departments. The museum of pathology is used both for the instruction of medical students and as a place of deposit for specimens showing new or rare forms of lesion. On the roof there is commodious accommodation for animals together with small special rooms for experimental work. The entire space is amply lighted, fully furnished and equipped with apparatus necessary for routine teaching and special research.

PHARMACOLOGY

Assistant Professor: C. C. LIEB

Instructors: A. C. FREEMAN, G. M. GOODWIN, A. T. MARTIN and W. M. PLATT

101-102 — Experimental pharmacology. C 3 hours, L 4 hours. Professor LIEB and Drs. FREEMAN and GOODWIN

213-214 — General pharmacology. C 1 hour, L 6 hours. Professor LIEB and Dr. FREEMAN

215 — Biological standardization of drugs. 7 hours. Professor LIEB

217 — Practical prescription writing. 3 hours. Dr. FREEMAN

251-252 — Research in pharmacology. Professor LIEB and Dr. FREEMAN

Journal Club. — A journal club, composed of the members of the staff and graduate students holds weekly meetings for the discussion of current literature and special investigations.

The laboratory is equipped with such apparatus as is necessary to study the pharmacologic action of the more important drugs.

PHARMACY

The New York College of Pharmacy is the Division of Pharmacy of Columbia University. In the section of the Catalogue devoted to the Col-

lege of Pharmacy will be found a list of its officers and information as to the equipment and method of instruction. The Program of Studies includes the following courses:

College Class

First Year

Physics. — Lectures and recitations. 4 points. Professor ARNY and Mr. HOSTMANN

General and Pharmaceutical Chemistry. — Lectures and recitations. 6 points. Professors ARNY and OEHLER

Analytical Chemistry. — Laboratory and theoretical course and recitations. 3 points. Professor LESLIE and

Theory of Pharmacy. — Lectures and recitations. 5½ points. Professor DIEKMAN and Dr. BROWN

Practical Pharmacy. — Laboratory course. 2 points. Professors DIEKMAN and WIMMER and Dr. BROWN

Dispensing Pharmacy. — Laboratory course. 1 point. Professors DIEKMAN and WIMMER and Dr. BROWN

Pharmaceutical Latin. — Exercises. ½ point. Professor DIEKMAN

Pharmaceutical Accounting. — Lectures and laboratory exercises. 3 points. Professor PACE, Mr. SCHAEBERLE and Mr. KENNEDY

Physiology. — Lectures and recitations. 4 points. Professor RUSBY and Dr. BALLARD

Botany. — Lectures, recitations and laboratory course. 5 points. Professor RUSBY and Dr. BALLARD

Vegetable Histology. — Laboratory course. 2½ points. Professor MANSFIELD, Dr. BALLARD and Miss HART

Posology. — Recitations. ½ point. Dr. BALLARD

University Class

First Year

The program for the University Class will be the same as that for the College Class, announced above, with the exception of Botany, Physiology and Posology, in place of which the following will be substituted:

General Biology. — Lecture and recitation course and laboratory course. 7 points. Professor MANSFIELD and Miss HART

Practical Physics. — Laboratory course. 1 point. Professor ARNY and Mr. HOSTMANN

Crystallography. — Lectures and recitations. 2 points. Professor ARNY and Mr. HOSTMANN

College Class

Second Year

General Organic, Pharmaceutical and Medical Chemistry. — Lectures and recitations. 8 points. Professors ARNY and OEHLER

Analytical Chemistry. — Laboratory course. 3 points. Professor — and Dr. —

Practical Pharmacy. — Lectures and laboratory course. 8½ points. Professors DIEKMAN and WIMMER and Dr. BROWN

Dispensing Pharmacy. — Laboratory course. 1 point. Professors DIEKMAN and WIMMER and Dr. BROWN

Pharmaceutical Jurisprudence. — Lectures and recitations. $\frac{1}{2}$ point. Professors DIEKMAN and WIMMER

Materia Medica. — Lectures and recitations. 5 points. Professor RUSBY and Dr. BALLARD

Toxicology. — Lectures and recitations. 1 point. Professor RUSBY and Dr. BALLARD

Macroscopic Pharmacognosy. — Laboratory course. $1\frac{1}{2}$ points. Professor MANSFIELD and Dr. BALLARD

Microscopic Pharmacognosy. — Laboratory course. $1\frac{1}{2}$ points. Professor MANSFIELD and Dr. BALLARD

University Class

Second Year

The program for the University Class agrees with that for the College Class, as announced above, with the exception of Materia Medica, Toxicology and Pharmacognosy, for which are substituted the Botany, Physiology and Posology of the first year College Course.

University Class

Third Year

Materia Medica, Toxicology and Pharmacognosy of the second year college course

Technical and Synthetic Organic Chemistry. — Lectures and recitations and laboratory course. 4 points. Professor ARNY and Dr. LESLIE

Analytical Chemistry and Urine Analysis. — Chemical laboratory and microscopical laboratory. 6 points. Professors — and MANSFIELD

Higher Pharmacy. — Lectures and recitations and laboratory. 8 points. Professors DIEKMAN and WIMMER and Dr. BROWN

Dispensing Pharmacy. — Laboratory. 2 points. Professors DIEKMAN and WIMMER and Dr. BROWN

Equipment. — The College of Pharmacy is supplied with a full equipment, in all departments, independent of any of the other resources of the University.

The Library has been built up for the special purpose of supplying the needs of the pharmaceutical profession, both within and without the College. It contains some 5000 volumes and extensive series of periodicals on Pharmacy, Chemistry and Botany, and is accessible, during the regular College hours, not only to members and students of the College but to the pharmacists of the City.

All lecture courses are fully supplied with charts, apparatus and materials for demonstrating the subjects taught. The Physics laboratory is well supplied with apparatus for students' practice, including a full set of crystal models and a goniometer.

In the chemical and pharmaceutical laboratories there is a separate desk, with locker, for each student, 150 working together, supplied with a full set of apparatus, reagents and materials. The laboratory in dispensing pharmacy, re-fitted during the summer of 1914, provides a separate desk and locker for each student, with every facility for securing a thorough training in prescription filling.

The bacteriological laboratory is supplied with apparatus for each student, enabling him to become proficient in identifications of bacteria and the making of culture.

In the botanical laboratory, each student is supplied with a complete set of dissecting material to illustrate the gross and microscopical structure of plants, and also with an excellent microscope for the study of cells and cell contents.

In pharmacognosy, each student receives a complete set of several hundred specimens of standard drugs, which he retains permanently.

A similar supply of specimens and microscopes is furnished for the study of all subjects in the course in general biology.

PHILOSOPHY AND PSYCHOLOGY

Equipment. — The library facilities of Columbia University and of the city of New York, for students of philosophy and psychology, are unusually

¹ Union Theological Seminary.

good. The collection of books on the history of philosophy in the University Library is very large, that on Kant and his philosophy being especially complete. About 1000 periodicals are regularly received, and among them will be found every journal of importance, American or foreign, dealing with philosophy or psychology. Duplicates of the more important psychological books and journals are placed in the Psychological Laboratory, where there is also a card index of psychological literature containing over 25,000 titles. Students of psychology will also find much of value in the Library of the Academy of Medicine, 17 West 43rd Street, which is open to students free of charge. The New York Public Library is available for students, when introduced by one of the instructors, on especially favorable terms.

The Psychological Laboratory in Schermerhorn Hall, besides the lecture-room and laboratories for introductory courses, contains ten rooms available for research work, some of them being specially constructed for particular sorts of psychological experiments. There is also a departmental library of the most important original literature of experimental psychology, and a well-equipped workshop in which much of the apparatus required for research or for laboratory courses is made by the aid of a skilled instrument-maker. The collection of apparatus includes that required for demonstration in courses in experimental and physiological psychology and for laboratory work in the same subjects; the outfit of an anthropometric laboratory with a full equipment for various forms of mental tests; an adding machine and other aids in statistical work; and apparatus that has been used or is being used in research.

Equipment. — The main exercising room is semicircular in shape, and has a floor area of 16,000 square feet. The ceiling is 35 feet high, and the room is well lighted and well ventilated, both naturally and artificially. The running track is 11 feet wide, with ends raised, and measures 10 laps to the mile. On the same floor as the running track are the Gymnasium and Director's offices, an auxiliary gymnasium 80 × 100 feet, rooms for fencing, boxing, and handball, two large dressing-rooms with 2600 steel lockers, and 32 shower-baths. Below the exercising room is the swimming pool, semicircular in shape; it measures 100 by 50 feet on its axes, and contains 260,000 gallons of water which is filtered and sterilized daily. The depth is from 4 to 10 feet. Around the pool are the dressing-rooms and 20 shower and needle baths. On this floor is also a large room and two dressing-rooms equipped with shower-baths and lavatories, for the use of the various athletic teams.

The athletic field is equipped with a $\frac{1}{4}$ -mile running track, baseball field, basketball court, facilities for jumping, pole vaulting, putting the shot, etc., seven tennis courts, and a dressing-room with 1000 lockers and shower-baths.

The Gould Boat-house, located on the Hudson River, at the foot of 116th Street, is equipped with boats of all descriptions, lockers, baths, etc.

The Frederick Ferris Thompson Memorial Building, which houses the department of Physical Education of Teachers College, was given by Mrs. F. F. Thompson. It is a building of four stories devoted to the purpose of physical education and school hygiene. It contains offices, examination rooms, lecture- and class-rooms, laboratories, handball courts, bowling alleys, a swimming pool, four gymnasiums, rooms for corrective exercises, dressing-rooms, shower-baths, fencing-room, and a suite of rooms for photographic purposes. This building provides physical-training facilities for women and the pupils of the Horace Mann School, and the varied equipment for the theoretical and practical instruction of professional students in physical education.

The Gymnasium is open daily during the academic year, except on Sundays and legal holidays, from 8.30 A.M. to 6.30 P.M., Tuesdays, Wednesdays and Fridays, and 8.30 A.M. to 10 P.M., Mondays, Thursdays and Saturdays. It is closed for the entire day only on Thanksgiving, Christmas, New Year's, and Good Friday. On all other holidays it is open from 3 to 6 P.M. One or more of the instructors are on the floor at all times when the Gymnasium is open.

A course in physical education is required of all Freshmen in Columbia College, also first-year students in the School of Journalism. A physical examination is required of each student in these classes upon entrance and at the end of the second year, and of all other students taking part in athletics.

Every student is entitled to a physical examination by the Medical Director. On the basis of this examination advice is given as to the kind and amount of exercise best adapted to his needs.

Equipment. — The laboratories and lecture-rooms of the Department of Physics are in Fayerweather Hall. They are supplied with the usual general equipment of a physical laboratory.

The laboratories used for research work have been named by the Trustees the "Phoenix Physical Laboratories," in memory of Mr. Stephen Whitney Phoenix, who bequeathed to the University an endowment for research in physics and chemistry.

Under the direction of the professor of electro-mechanics, laboratories have been equipped in Philosophy Hall from the Marcellus Hartley fund for research in the subjects of electricity and magnetism. The laboratories afford unusual opportunities for students desiring to specialize in these subjects.

A recent gift from Mr. Edward Dean Adams provides a sum to procure apparatus for what is to be known as the Ernest Kempton Adams Precision Laboratory. As rapidly as the apparatus can be purchased and installed

this laboratory is being equipped with instruments of the best design and highest precision for measurements in mechanics, heat, light, radio-activity, and those branches of electricity not already provided for by the Marcellus Hartley fund.

The physics laboratories at Barnard College occupy the second floor and a part of the basement of Fiske Hall. They are well equipped for quantitative experimental work in the courses offered.

The physics laboratories and lecture-room of Teachers College are especially equipped for illustrating the teaching of physics in secondary and normal schools.

Instructors: F. W. BISHOP, D. GORDON, H. E. B. PARDEE, A. H. TERRY, JR. and E. VAN KLEECK

All courses except 1-2 and 106-107 are open to women

1-2 — Elementary physiology. 2 points. C 1 hour, L 2 hours. Dr. SCOTT, (E. L.)

106-107 — Human physiology. C 5 hours, D 1 hour, L 3 hours. Two full courses. Professor BURTON-OPITZ and Drs. BISHOP, GORDON, PARDEE, TERRY and WILLIAMS (H. B.)

108 — Physics of X-rays. 1 hour, six weeks. Dr. WILLIAMS (H. B.)

201-202 — General physiology. C 1 hour, L 5 hours. Two full courses. Professor PIKE and Dr. SCOTT (E. L.)

203-204 — Special physiology. C 1 hour, L 5 hours. Two full courses. Professors BURTON-OPITZ and PIKE, Drs. SCOTT (E. L.) and WILLIAMS (H. B.)

205-206 — Problems of evolution from the standpoint of physiology. C 1 hour. Half course. Professor PIKE

207 — Clinical physiology. Half course. 2 hours. Professors BURTON-OPITZ and PIKE and Drs. WHEELWRIGHT and WILLIAMS (H. B.)

251-252 — Research in physiology. Half, full or double course. Under the direction of the professor of physiology. The officers of the department

Summer Session

s1 or s1a — Elementary physiology. C 5 hours, L 4 hours. 1 or 2 points. Professor BURTON-OPITZ

s2 — Advanced physiology. C 3 hours, L 4 hours. 1 point. Professor BURTON-OPITZ and assistants

s103 — General physiology. C 2 hours. 1 point. Professor BURTON-OPITZ

s104 — Advanced practical physiology. Half course. L 6-10 hours. Professor BURTON-OPITZ and assistant

s105 — Mammalian physiology. Half course. Professor BURTON-OPITZ and assistant

Research. — The laboratories are open for research, under the direction of their officers, to advanced workers.

Journal Club. — A journal club, composed of the members of the staff and graduate students, holds weekly meetings for the discussion of current literature and special investigations.

Equipment. — The main equipment of the Department of Physiology is at the College of Physicians and Surgeons. It comprises one large laboratory, which is provided with special apparatus for teaching purposes; one large and four small laboratories for research; several private rooms for the use of the officers of the department; the Swift Physiological Cabinet, containing a specially endowed and very full collection of apparatus of precision, mainly for research; a library containing complete sets of all of the physiological journals, monographs and other books, and many reprints of special articles; two dark-rooms for optical and photographic work, and an outfit of machines and tools for working in wood and metal. Skilled mechanics give their entire time to the design, manufacture, and repair of apparatus. The laboratories are connected by wires with the Vanderbilt Clinic and the Roosevelt Hospital so that the string galvanometers of the department are available for making electrocardiographic records from patients. In Schermerhorn Hall at Morningside Heights the department has the use of a laboratory equipped for the instruction of undergraduates.

Equipment. — The library of Columbia University is well supplied with French, Spanish, and Italian works, as well as with works upon Romance philology. Its list of periodicals is especially rich. The Library has also complete sets of the most important series and collections in the whole field of the Romance languages and literatures.

The library of the Romance Department, in Philosophy Hall, contains a large number of books of reference. A special privilege enjoyed by the Department is that of using the library of the Hispanic Society of America.

Elementary evening classes in French are conducted by the department of Extension Teaching in coöperation with the Alliance Française.

Maison Française. — The Maison Française at 411 West 117th Street contains a collection of French books and periodicals and of documents containing information concerning education and educational institutions in France. It also serves as the residence of the visiting French Professor during his stay in New York, and as headquarters for intercourse with the French Universities.

Romance Club. — The Romance Club consists of the instructors and advanced students in the department. At its meetings, an account is given of the most important articles in recent periodicals, and new books are discussed.

French Societies. — Two societies have been organized for the purpose of fostering the use of the French language among the members of the University, viz., the Société Française de l'Université Columbia, and the Société Française de Barnard College.

217-218 — Clinic in general surgery (Roosevelt Hospital). 2 hours. Professor DOWD

219-220 — Operative surgery on the cadaver. 6 hours. Professor DARRACH, Drs. GREEN and RAMSDELL, McFAIRE and FULD

221-222 — Practical instruction in surgical technic. 4 hours. Professor CLARKE and Assistants

223-224 — Principles of surgery. 2 hours. Professor CLARKE and Assistants

225-226 — Practical instruction (St. Mary's Free Hospital for Children). 2 hours. Professor MATHEWS

227-228 — Fractures (Bellevue Hospital). 2 hours. Professor WALKER

229-230 — Practical instruction in surgery (Bellevue Hospital). 2 hours. Professor HOTCHKISS

231-232 — Surgery (Roosevelt Hospital). 2 hours. Dr. CONNELL

233-234 — Surgery (Roosevelt Hospital). 2 hours. Dr. RUSSELL

Professors: M. A. BIGELOW, G. N. CALKINS, H. E. CRAMPTON, B. DEAN, T. H. MORGAN, H. F. OSBORN and E. B. WILSON (*Executive Officer*)

Associate Professor: J. H. MCGREGOR

Assistant Professor: J. BROADHURST

Associate: W. K. GREGORY

Instructors: P. H. DEDERER, L. H. GREGORY, and C. PACKARD

Assistants: Mrs. E. M. HENRY, F. DE L. LOWTHER, R. S. McEWEN, H. H. PLOUGH, C. C. WARE, and D. B. B. YOUNG

1-2 — Elementary biology and zoölogy. *C* 2 hours, *L* 4 hours. Professors CALKINS, MCGREGOR, Dr. PACKARD (Columbia); Professor CRAMPTON, Dr. DEDERER and Dr. L. H. GREGORY (Barnard)

3 — Elementary histology. *C* 1 hour, *L* 2 hours. 2 points. Dr. DEDERER (Barnard)

4 — Elementary embryology. *C* 1 hour, *L* 2 hours. 2 points. Professor MORGAN (Columbia), Dr. L. H. GREGORY (Barnard)

5 — General biology. *C* 1 hour, *L* 2 hours. 2 points. Professor CRAMPTON (Barnard)

6 — Experimental biology. *C* 1 hour, *L* 2 hours. 2 points. Professor CRAMPTON (Barnard)

7-8 — Biology and genetic relations of the human organism. 2 hours. 4 points. Professor CRAMPTON and Dr. GREGORY (Barnard College)

9 — Modern theories in biology. 2 hours. 2 points. Professor CALKINS (Columbia College)

51 — Histology and technique. *C* 1 hour, *L* 4 hours. 3 points. Dr. PACKARD (Columbia)

53-54 — Practical zoölogy and embryology. 2 points. Dr. DEDERER (Barnard)

91-92 — General zoölogy (to follow 1-2). *C* 2 hours, *L* 6 hours. 5 points. Professor MCGREGOR

93 — Embryology of vertebrates. *C* 1 hour, *L* 2 hours. 2 points. Professor MCGREGOR

101-102 — General zoölogy. *C* 3 hours, *L* 6 hours, and assigned work. 2 full courses. Professor MCGREGOR, and in Barnard, Professors CRAMPTON, OSBORN, Drs. L. H. GREGORY and DEDERER

103 — Comparative Embryology of Vertebrates. *C* 1 hour, *L* 2 hours and assigned work. Half Course. Professor MCGREGOR

110 — The parasitic protozoa. *C* 1 hour, *L* 5 hours. Full course. Professor CALKINS

113 — Tropisms. *C* 1 hour, *L* 5 hours. Full course. Professor MORGAN

114 — Instincts. *C* 1 hour, *L* 5 hours. Full course. Professor MORGAN

151-152 — General physiology (Barnard College). *C* 2 hours, *L* 4 hours. 2 full courses. Dr. L. H. GREGORY

201 — Topics in invertebrate zoölogy. Two days. Double course. Professor WILSON

203-204 — Mammals, living and fossil. Lectures and laboratory course. 6 hours (one day). The latter part of this course is given in the American Museum of Natural History. 2 full courses. Dr. W. K. GREGORY

208 — Invertebrate embryology. One day. Full course. Professor CALKINS

215-216 — Experimental zoölogy. *C* 2 hours, *L* 12 hours. 2 Double courses. Professor MORGAN

- 217** — Physiological morphology. *C* 1 hour, *L* 6 hours. Full course. Professor MORGAN
- 218** — Experimental embryology, parallel to 220. *C* 1 hour, *L* 5 hours. Full course. Professor MORGAN
- 220** — Cellular embryology. 1 day. Full course. Professor WILSON
- 221-222** — Protozoölogy. *C* 1 hour, *L* 5 hours. 2 full courses. Professor CALKINS
- 223-224** — Evolution of the vetebrates. 1 day. 2 full courses. Dr. W. K. GREGORY
- 225-226** — Cellular biology — General structure and functions of the cell. *C* 1 hour, *L* 5 hours. 2 full courses. Professor WILSON
- 227-228** — Special research
- 230** — Experimental protozoölogy. *C* 1 hour, *L* 6-10 hours. Full course. Professor CALKINS

Courses under the George Crocker Special Research Fund

- 201** — Morphology and classification of tumors, including pathological technique. One full course. Professor WOOD
- 202** — General biology of tumors. One full course. Professor WOGLOM
- 205-206** — Research in problems of growth pathology with especial reference to tumors. Credit to be assigned in individual cases at the time of registration. Professors WOOD and WOGLOM and Drs. PRIME and BULLOCK

Summer Session

- s1** — Elementary biology and zoölogy. 4 points. Professor MCGREGOR and Mr. MULLER
- s121** — Protozoölogy. Full course. Professor CALKINS
- e1a-2a** — Elementary biology and zoölogy. 4 points. Professor MCGREGOR, Dr. PACKARD.

JOURNAL CLUB. — Reports and discussions of recent literature by members of the staff, graduate students, and others. One hour a week throughout the year. Under direction of the staff.

LECTURES. — A course of lectures on general topics is given from time to time by members of the staff and eminent specialists from other institutions. These lectures form the basis of the Columbia Biological Series.

Equipment. — The zoölogical laboratories on the upper floor of Schermerhorn Hall comprise graduate and undergraduate laboratories, suitably equipped with optical instruments, microtomes and other apparatus; and rooms for special research, supplies, aquaria and preparation. There is also a lecture-room, a library and an extended teaching collection comprising specimens, anatomical, embryological, and cytological preparations, charts and wax models. The departmental library embraces sets of the standard biological works and includes the journals and a rapidly increasing collection of special monographs. A fund is available for the purchase of literature needed in connection with the special researches of students.

Important adjuncts to zoölogical work are offered by the American Museum of Natural History, the Bronx Zoölogical Garden, the New York Aquarium, and by the marine biological laboratories to which the University contributes support. Several investigators' tables are held at the Wood's Hole Laboratory, and the John D. Jones scholarship is available at the Cold Spring Harbor laboratory. A table at the Naples Zoölogical Station is also supported by the University.

UNDERGRADUATE ENTRANCE REQUIREMENTS

University Committee on Admission

Professors JONES, *Director of University Admissions*; STEEVES, *Assistant Director*; LOMER, MEYER and SHERMAN, Deans WOODBRIDGE, STONE, LAMBERT, GILDERSLEEVE and RUSBY; Directors, EGBERT, WILLIAMS, MONROE, and BIGELOW.

General Statement. — The Director of University Admissions administers the entrance requirements for all departments of the University. No formal entrance tests are prescribed for graduates who elect to study under the Faculties of Political Science, Philosophy or Pure Science, or to enter a professional school of the University which demands previous college residence as a basis for entrance; namely, Law, Medicine, Mines, Engineering, Chemistry, Architecture (for a degree), Education. Candidates for admission to these schools should present their credentials from the college of previous residence. Entrance tests are prescribed for admission to all other departments of the University. Admission to the first year course in Columbia College, Barnard College, School of Architecture (for certificate of proficiency for 1916 only), and the College of Pharmacy (University course), depends upon the results of written examinations. The School of Practical Arts may be entered either by examination or, in approved cases, by school certificate.

Examinations and Records. — The University issues annually a pamphlet entitled "Bulletin on Entrance Examinations and Undergraduate Admissions." This pamphlet gives detailed information upon the following matters:

The Time schemes for the examinations of the College Entrance Examination Board and of Columbia University.

The dates for filing of applications. (Given also in academic calendar at end of this volume.)

Method of obtaining, filling out and filing application blanks and school records.

Fees for examinations and method of payment.

The award and duration of credits toward admission as a result of examinations, and information as to the conditions under which examinations may be divided among two or more periods.

The specific conditions of admission to each school requiring entrance examinations.

The official statements of the requirements in each subject (including information as to the preparation and presentation of note books in subjects requiring such records).

This pamphlet may be had without charge upon application to the Secretary of Columbia University. Any person who intends to take examinations himself or to prepare others for them should obtain a copy of it and familiarize himself with its contents. *The information which follows here is merely a brief summary of that given fully and officially in the Bulletin.*

The minimum age for admission to the Freshman Class in Columbia College or Barnard College is 15; in Journalism, 17; in other schools, 18, with a corresponding increase in the case of advanced standing. For students

entering from secondary schools, an estimate of character and personality, and a certificate of health must be presented, and in the case of students from other Colleges an honorable dismissal.

Students may enter Barnard or Columbia College either in February or in September.

Each candidate is required to take examinations in every subject offered for admission. In passing upon the result of these examinations the detailed school record of the candidate is taken into account and given great weight.

The examination requirements for admission may be satisfied by any one of the three following means, or by any approved combination thereof; the examination grades are interpreted in the light of the record which the student has made in school. The record for each subject must be filed with the University Committee on Admissions.

1. By the examinations of the College Entrance Examination Board in 1916 beginning on June 19 held at Columbia University and at about one hundred and fifty other educational centers in the United States and Europe.

2. By the examinations conducted at Columbia University by the Committee on Admissions. These examinations are held in September and January of each year (beginning on September 18, 1916, and January 18, 1917).

3. By the examinations of the New York State Examination Board in so far as their subject matter specifically corresponds to the stated requirements of the several undergraduate Schools. These examinations are held in January and June at more than six hundred High Schools and other institutions in the State, but are ordinarily open only to students in those schools.

Credits. — A candidate may present himself at any of the series of examinations scheduled above, but at not more than four in all, and the results may be credited toward entrance, subject to the following restrictions:

The results of an examination may stand to the candidate's credit twenty-nine months, but no longer. The reports of candidate's examinations and the School's statement of preparation must be in the hands of the Committee on Admissions one week prior to the opening of the term in September or January.

Subjects for Examination. — Columbia University recognizes the following examination subjects which may be offered for admission to one or more of the colleges and schools included in the University, each subject counting for a specific number of units as indicated in parentheses. The unit here represents the number of years at the rate of five periods per week, which will normally be required in the secondary school to prepare adequately for the college examination.

Columbia College. — A.B. 15 units. *Prescribed*, 10 units — English (3); elementary mathematics (3); either elementary Latin (4) or Greek (3). *Elective*, 5 or 6 units — of which not more than 4 units from elementary French (2), elementary German (2), Italian (2), Spanish (2); nor more than 3 units from botany (1), chemistry (1), physics (1), physiography (1), shopwork (1), zoölogy (1); any of the following, except that to offer an advanced subject involves offering at the same time or earlier the corresponding elementary subject: elementary Greek (3), elementary history (2) or (1), drawing (1), music (1), intermediate French (1), intermediate German (1), advanced English (1), advanced Greek (1), advanced history (1), advanced Latin (1), advanced mathematics ($\frac{1}{2}$ –1 $\frac{1}{2}$).

B.S. 15 units. The same as for the A.B. excepting that chemistry (1), physics (1), and intermediate or advanced subjects (2) may be offered in place

of elementary Latin (4); in which case elementary Latin (2, 3, or 4) becomes elective. *Candidates for the three-year course in Columbia College leading to the Schools of Mines, Engineering and Chemistry must include solid geometry, plane trigonometry and intermediate French or intermediate German.*

Barnard College.—A.B. 15 units. Same as Columbia College, with three units of Modern Language prescribed in place of three of the elective units and with the exception of shopwork, which is not an entrance subject for Barnard College.

B.S. 15 units. *Prescribed*, 12 units — English (3); elementary mathematics (3); 2 units from botany (1), chemistry (1), physics (1), physiography (1), zoölogy (1), at least three units in French or German or both, intermediate or advanced subjects (2). *Elective*, to make up a total of 14½ units — as given under *Elective* Columbia College.

General two years' course 15 units. *Prescribed*, 6 units — English (3); mathematics (3). *Elective*, 9 units — Ancient or modern foreign languages (4); history, foreign languages, mathematics or science (5).

Candidates for the course in Journalism must offer English (3), History (2), French or German or both (4) or French or German (2) and Latin (4) or French or German (3) and Latin (3). They are not required to offer mathematics.

School of Architecture.—For certificate 15 units. (Beginning with September, 1917, the course for the certificate will be discontinued. Two years of college work are required for admission to the course for the degree.) *Prescribed*, 10 units — English (3), mathematics (4), drawing (1), elementary French (2). *Elective*, 5 units — elementary German (2), elementary history (2) or (1), elementary Latin (2), physics (1), chemistry (1), Spanish (2).

College of Pharmacy.—B.S. in Phar., 15 units. *Prescribed*, 6 units — English (3), elementary mathematics and advanced arithmetic (3). To offer an advanced subject involves offering either at the same time or earlier the corresponding elementary subject. English (3), elementary French (2), elementary German (2), elementary Greek (3), elementary history (2) or (1), elementary Latin (4) or (2), elementary mathematics (3), music (1), (2), (3), or (4), physics (1), intermediate French (1), intermediate German (1), advanced Greek (1), advanced history (1), advanced Latin (1), advanced mathematics (1), botany (1), chemistry (1), drawing (1), physiography (1), shopwork (1), Spanish (2), zoölogy (1), Hebrew (2), bookkeeping (1) or (2).

School of Journalism.—B.Litt., 15 units. *Prescribed*, 9 units. English (3), History (2), French, German, or French and German (4) (or a combination of both or either with Latin (6)). *Elective*, 6 units — Elementary French (2), elementary German (2), Italian (2); Spanish (2), elementary Latin (2, 3 or 4), elementary mathematics (2 or 2½), botany (1), chemistry (1), drawing (1), physics (1), physiography (1), shopwork (1), zoölogy (1), intermediate French (1), intermediate German (1), advanced English (1), advanced French (1), advanced German (1), advanced Greek (1), advanced history (1), advanced Latin (1), advanced mathematics (1).

School of Practical Arts.—B.S. in Practical Arts, 15 units. *Prescribed*, 7 units — English (3); 2 units from algebra (1) or (2), plane geometry (1), modern, commercial and higher arithmetic (1), biology (1), botany (1), chemistry (1), industrial and commercial geography (1), physics (1), physiology (½), physiography (1), zoölogy (1); 2 units from elementary French (2), German (2), Greek (3), Latin (2), Italian (2) or (3), Spanish (2), elementary history (½), (1), (2), (3), (4), industrial history (1), intermediate French (1), inter-

mediate German (1), — advanced English (1), advanced French (1), advanced German (1), Greek (1), history (1), Latin (1), mathematics ($\frac{1}{2}$), (1) or ($1\frac{1}{2}$). *Electives*, 8 units — in addition to further choices from the foregoing, and not more than 4 units in all from the following may be elected: drawing (1), household arts (1), (2), or (3), Music (1) or (2), shopwork (1), (2) or (3).

The following abridged statements give the general scope of the requirements in each subject. It should be noted that in several cases an examination subject outlined below will not be accepted toward admission to every school of the University. A candidate or teacher should compare the list carefully with the statements of the requirements of the school in which he is particularly interested.

Definitions. — (Specimens of the question papers set by Columbia University are on file in the University Library or may be obtained from the Director of University Admissions upon application. The question papers set by the College Entrance Examination Board are published annually in book form by Ginn & Company, New York.)

Arithmetic, Modern Commercial and Higher (One unit). (*May be counted for admission to the College of Pharmacy and the School of Practical Arts only.*)

Review of the principles of arithmetic applied to the solution of modern commercial and industrial problems. Emphasis should be given to the principles of modern banking, domestic and foreign exchange, etc. Special emphasis should be given to the application of these topics to practical problems.

Biology (One unit). (*May be counted for admission to the School of Practical Arts only.*)

The course should include elementary work in Botany, Zoölogy and Physiology.

Botany (One unit). (1) Structure and life history of 16 or more types of representative families of plants, 10 of them seed plants. (2) Elementary plant physiology. (3) Elementary natural history (ecology of plants). Requiring one year of laboratory and class-room instruction, for the course. Note-book to be submitted.

Chemistry (One unit). Preparation and properties of the common elements and their important compounds.

Mastery of the more usual chemical terms and ability to make simple calculations and explanations of chemical processes. Preparation should include lectures and demonstrations, study of standard elementary text-books, and forty or more laboratory exercises. Note-book to be submitted.

Drawing (One unit). The ability to sketch freehand with reasonable accuracy — (a) From dictation: Simple geometrical figures; (b) From the object: A vase, household utensil, or other familiar object; (c) From the copy: Enlarging or reducing simple pieces of machinery or architectural or decorative detail. (At least 20 freehand drawings must be submitted.)

English (Three units). Examinations in (1) Grammar and Composition, and (2) Literature. The examination in English Literature will be based upon: (a) Books for reading, a list of which appears in the current *Announcement of Entrance Examinations and Undergraduate Admissions*, and (b) Books for study, arranged in four groups, from each of which one selection is to be made.

Group I — Drama

Shakspere: *Julius Cæsar* or *Macbeth*, or *Hamlet*.

Group II — Poetry

Milton: *L' Allegro*, *Il Penseroso*, and either *Comus* or *Lycidas*.

Tennyson: *The Coming of Arthur*, *The Holy Grail*, and *The Passing of Arthur*.

The selections from Wordsworth, Keats and Shelley, in *Book IV* of *Palgrave's Golden Treasury (First Series)*.

Group III — Oratory

Burke: *Speech on Conciliation with America*.

Macaulay's *Two Speeches on Copyright*, and Lincoln's *Speech at Cooper Union*.

Washington's *Farewell Address* and Webster's *First Bunker Hill Oration*.

Group IV — Essays

Carlyle: *Essay on Burns*, with a selection from Burns's *Poems*.

Macaulay: *Life of Johnson*.

Emerson: *Essay on Manners*.

Those not familiar with the details of the new requirements for admission in English should consult the Announcement of the Committee on Admissions.

English, Advanced (One unit). Candidates must have covered substantially the same ground as that included under English A1-A2 (see page 122). (1) English composition, and certain works prescribed for reading rhetoric. The examination will test the candidate's grasp of expository, argumentative, descriptive and narrative methods and will call for specific comment and comparison on points of style. Essays of certain specified types must also be submitted.

French, Elementary (Two units). Accurate pronunciation and the ability to read at sight easy prose and to put into French simple English sentences. The rudiments of the grammar, involving all but the rare irregular verb forms and the simpler uses of conditional and subjunctive. The preparation should include, beside the mastery of a good elementary text-book, the reading of 300-600 pp. of easy French. Beginning with 1917 an aural and oral test will be included in the examination in this subject.

French, Intermediate (One unit.) Additional reading, 400-600 pp., including dramatic works. Grammar completed. Further drill in composition. Beginning with 1917 an aural and oral test will be included in the examination in this subject.

French, Advanced (One unit). Additional reading of from 600 to 1000 pages of standard French, classical and modern, the writing of numerous short themes in French, and the study of syntax.

Geography, Industrial and Commercial (Counting one unit). *May be offered for entrance to the School of Practical Arts only.*

One-third of this course should be devoted to the elements of physical geography, and commercial geography should be studied around countries as units. A note-book showing that map and atlas study has been carried on in connection with the text study must be submitted.

See also *Physiography*.

German, Elementary (Two units). Accurate pronunciation and the ability to read easy dialogue and narrative prose, and a working knowledge of grammar and composition adequate for the putting into German of simple English sentences based upon a familiar vocabulary. The preparation should include, beside the mastery of a good elementary text-book, the reading of 150-200 pp. of easy German. Beginning with 1917 an aural and oral examination will be included in the entrance examination in this subject.

German, Intermediate (One unit). Additional reading, 400 pp. of moderately difficult prose and poetry. Further drill in grammar and composition, with special reference to syntax. Beginning with 1917 an aural and oral examination will be included in the entrance examination in this subject.

German, Advanced (One unit). Additional reading of about 500 pages of good literature in prose and poetry, reference reading upon the lives and works of the great writers studied, the writing of numerous short themes in German upon assigned subjects, independent translation of English into German.

Greek, Elementary (Three units). (a) i and ii. — Attic grammar and elementary composition, based on *Anabasis I-II*. (b) *Anabasis I-IV*. (c) *Iliad I-III* (except *II*, 494-end) with tests covering constructions, poetic forms, and prosody. (f) Translation into Greek of simple, continuous English prose. (g) Translation into English at sight of continuous Greek prose.

Greek, Advanced (One unit). Candidates must have covered substantially the same ground as that included under Greek 3-4: at least 1200 additional lines in Homer, Herodotus, Bk. vi, and Plato's *Apology*. Also at least fifteen exercises in Spieker's *Greek Prose Composition*.

History, Elementary (Each of the four divisions, *a*, *b*, *c*, and *d* counts one unit. Candidates for admission to the Schools of Journalism and Practical Arts may offer one or more of the divisions without restriction. All other candidates may offer any one or any two of the divisions without restriction). (a) Ancient, beginning with brief study of Oriental peoples and coming down to the death of Charlemagne, with reference to art, literature and government. (b) From 800 on, including growth of the State system. (c) English history, including social and political developments. (d) American history with the elements of civil government.

Each field may best be covered by an accurate text-book of 300 pp., plus, say, 300 pp. of selected supplementary reading.

History, Advanced (One unit). The work performed must have been of the same kind, amount and quality as that required for History A1-A2 (see page 122). Supplementary reading emphasizing the significance of historical phenomena. The candidate must present at least 5000 words of notes on each historical field offered, and show practice in making historical parallels, in preparing digests of outside reading, and in the use of historical maps.

History, Industrial (One unit). (*May be offered for entrance to the School of Practical Arts only.*)

Industrial History with special reference to the modern period and to the influence of the numerous factors of industrialism on the social, economic and political aspects of life.

180 UNDERGRADUATE ENTRANCE REQUIREMENTS

Household Arts (One or two units). (*May be offered for entrance to the School of Practical Arts only.*)

(a) Textiles and Sewing. Nature of common materials, their manufacture and use, principles underlying the construction of simple garments by hand or by machine. Laboratory instruction of not less than 180 hours. Note-books to be submitted.

(b) Foods and Cookery. Nature of food materials, principles underlying their preparation and the principles involved in the cooking apparatus. Laboratory instruction of not less than 180 hours. Note-books to be submitted.

Advanced (either division counting one unit).

Italian, Elementary (Two units). The requirement corresponds to that in Elementary French (see p. 177). Beginning with 1917 an aural and oral examination will be included in the entrance examination in this subject.

Latin, Elementary (Four units), *i. e.*, Latin 4, Cicero and sight translation of prose; Latin 5, Virgil and sight translation of poetry, and Latin 6, Advanced prose composition; or three units, *i. e.*, Latin 3, with either Latin 4 or Latin 5; or two units, *i. e.*, Latin 3.

Latin, Advanced (One unit). Candidates must have covered substantially the same ground as that included under Latin A1-A2 (see page 200). Horace, *Odes*, Bks. I and III, with incidental prosody, and 400 lines of Catullus's shorter poems; Livy, Book XXI, Chapters 1-45 inclusive. Book XXII, Chapters 2-7 and 43-56 inclusive; Terence's *Phormio*. Specified exercises from Gildersleeve and Lodge's *Prose Composition*.

Mathematics, Elementary (Three units). (a) Elementary algebra, including — i, the four fundamental operations for rational expressions, and such topics as lowest common multiple, ratio and proportion, linear equations, radicals, fractional and negative exponents; ii, quadratic equations, arithmetic and geometric progressions, the binomial theorem for positive integral exponents, the use of graphical methods. (c) Plane geometry — original exercises, loci, mensuration of lines and plane surfaces.

Mathematics, Advanced (One-half to one and one-half units). (b) Advanced Algebra (One-half unit): Permutations and combinations, complex numbers, determinants, numerical equations of higher degree, theory of equations, graphical methods, Descartes's rule of signs, and Horner's method. (d) Solid geometry (One half-unit): Original exercises, loci problems, mensuration of surfaces and solids. (e) Trigonometry (One-half unit): The principal formulas, simple equations and triangles, theory and use of logarithms (without infinite series).

Music.

(a) Musical Appreciation (not involving ability to perform nor to read from printed music) (One unit). (1) The principal musical forms and their historical development; (2) the lives and environment of Bach, Mozart, Beethoven, Schubert, and Chopin, and five other composers; (3) familiarity with certain designated compositions.

(b) Harmony (One unit). The elements of simple harmonization.

Physics (One unit). The most important facts and laws in elementary physics. Preparation should include the mastery of a standard textbook supplemented by numerical problems, instruction by lecture with demonstrations and individual laboratory exercises — say mechanics, 13; sound, 3; heat, 5; light, 6; electricity, 8. Note-book to be submitted.

Physiography¹ (One unit). Preparation includes modern text-books and at least forty individual laboratory and field exercises — say earth as a globe, 5; ocean, 5; atmosphere, 12; land, 18.

Physiology (One-half unit). (*May be offered for entrance to the School of Practical Arts only.*)

Not less than 90 hours of text-book, demonstration and laboratory exercises covering each of the main topics in Physiology.

Shopwork (One unit). Involving in each subject 180 laboratory hours examination, both written and practical, on the use and structure of tools, nature of shop processes, methods of construction, and properties of materials. Authenticated models may be presented as evidence of technical skill.

The candidate may offer either (a) Woodwork — i, joinery; ii, turning and pattern-making, or (b) Forging, or (c) Machine-work.

Spanish, Elementary (Two units). The requirements correspond to those in elementary French; see page 177. Beginning with 1917 an aural and oral examination will be included in the entrance examination in this subject.

Zoölogy (One unit). Laboratory and field study, supplemented by text-book and further reading. (1) General natural history of common American animal types. (2) Classification of animals into phyla and leading classes. (3) Structure of typical animals. (4) Physiology of the types studied and comparison of life processes of animals and plants. (5 and 6) (in a very elementary way) Reproduction, embryology, and (optional) elements of cytology. (7) (optional) Biological history.

Entrance

For the details of admission to the Freshman Class (see page 173)

Advanced Standing. — A candidate for admission to advanced standing upon basis of work done at another college should obtain and file, at least one week before the September or January entrance examinations, the appropriate application blank, with a transcript of his academic record, and a marked catalogue of the institution that he leaves.

Appropriate credits up to a maximum of 18 points of the 124 required may be made by Freshmen who offer more than the prescribed number of units at entrance.

Special Courses. — Students of serious purposes who are in a position to fulfil the requirements for admission to the Freshman class or who have had a valuable educative experience in practical life, may be admitted as non-matriculated students to pursue courses without reference to any degree. For details see the current *Announcement of Columbia College*.

Program of Studies. — The period within which the requirements for the degree of A.B. or B.S. may be satisfied varies with the capability and industry of the individual student. In most cases four years are spent in making the required number of points; students of ability and industry frequently complete the course in less time, especially if advantage be taken of courses in the Summer Session, or additional credit be gained by high standing; no student may spend more than six years as a candidate for a degree.

¹ Absent on leave 1915-16.

² Absent on leave. Winter Session.

³ Absent on leave. Spring Session.

General Regulations. — 1. The requirement for graduation is 124 points the term "point" signifying the satisfactory completion of work requiring attendance each half-year of one hour weekly in lectures, recitation or honors conference, or a correspondingly longer period in laboratory, drafting-room or shop. No credit in points will be placed upon a student's permanent academic record for less than a full year's work in any elementary language course or in Physical Education.

2. When practicable, prescribed subjects must be taken during the first two years.

3. No combination of courses amounting to less than 12 or more than 19 points of Academic credit may be made in any half-year except by special permission of the Committee on Instruction.

4. Admission to courses depends strictly upon completion with the grade of C or better of the stated prerequisites. Where none is stated a course may be taken by any student of the College.

5. A student whose record as to prescribed subjects is satisfactory to the Committee on Instruction is permitted upon completion of 94 points to elect two approved graduate courses which his previous training will enable him to pursue with profit. Credit in terms of points for such courses will be determined by the Committee on Instruction at the time of registration. Under no other circumstances may a graduate course be counted toward a College degree unless by concurrent approval of the department concerned and the committee, such approval to be given only for reasons of great weight.

6. No student may take more than four hours' work (not including laboratory work) on the same day, or more than nine hours' work per week in any one department.

7. No one-hour course will be allowed unless taken in connection with or as a supplement to a cognate course.

8. To be recommended for a degree, a student must have made at least 84 points in actual college residence, and of these at least 24 in Columbia College.

In the administration of the College regulations, it is the policy of the Committee on Instruction and of the Dean to be guided in the treatment of individual cases largely by the recommendation of the adviser, and by the general attitude of the student in question toward the College, *i.e.*, whether or not he has proved himself a creditable member of the college community, as shown by regularity in attendance, promptness in the fulfilment of his obligations, earnestness in his endeavor to profit by his college opportunities, both direct and indirect, and consideration of others.

With the recent rapid growth of the College the Committee has been compelled, in the interest of sound teaching, to limit the attendance upon certain courses which cannot be broken up into sections. Admission to such courses is based in part upon priority of application and in part upon the operation of the policy described in the preceding paragraph.

For Honors Candidacy. — Conditions of candidacy. Any student free from entrance conditions may, with the approval of the Committee on Instruction, elect to study for a degree with honors and pursue a curriculum involving less prescribed work but more independent reading and more thorough study in chosen subjects than are required of the general candidates for a degree.

The choice between the honor curriculum and the general curriculum is ordinarily to be made not later than April 15 of the Freshman year. The

candidate chooses two subjects in which he will offer honor work and in consultation with the officers in charge of the subjects he has chosen plans his courses so as to meet the honors requirements.

The granting of honors is dependent upon the completion with high standing of two or four honor courses in each of the chosen subjects. These courses being designed to guide the candidate's supplementary reading sequences and upon a final general examination covering the entire field of his honor work.

For candidates for a degree with honors the following courses only are prescribed: English A, History A, Mathematics A, Philosophy A, Physical Education; and in addition the ancient language prescription for A.B. candidates and that in modern languages for B.S. candidates.

If at the end of any term examination a student fails in any course in his honor subjects to attain a grade of A or B, he is rejected as a candidate for honors and given appropriate credit toward an ordinary degree.

Upon the satisfactory completion of an honor sequence and the corresponding honor courses and upon the recommendation of the officer in charge, the candidate is given a very general examination. This examination, partly written and partly oral, covers the class-room work of the three years and tests the extreme thoroughness of the assigned supplementary reading.

A grade of A in all subjects entitles the candidate to receive a Bachelor's degree with highest honors. A combination of A's and B's entitles him to a degree "with high honors," and uniform grades of B to a degree "with honors." For further details see the current *Announcement of Columbia College*.

For degree without Honors. — Unless the equivalents have been offered for admission, the following courses are prescribed for students who are candidates for a degree, but not for honors:

English A and B; History A; French or German A and B; Mathematics A; Philosophy A; Physical Education; and in addition:

For A.B. candidates. Latin A or Greek 5-6; Natural Science, involving laboratory work.

For B.S. candidates. Chemistry A and Physics A.

These prescriptions amount to a total of from 26 to 55 of the 124 points required for the degree, depending upon the student's offering at entrance and his college program.

Prior to graduation the student must have completed the equivalent of three years of sequential study, in courses aggregating at least 18 points beyond the elementary requirement for admission, in each of two departments. For A.B. candidates at least one sequence must be chosen from the following groups: Classical Philology, English, Germanic Languages and Literatures, History, Philosophy, or Romance Languages and Literatures; and for B.S. candidates at least one from among the following: Botany, Chemistry, Geology and Mineralogy, Mathematics, Physics, or Zoology.

The College offers a three-year program leading to the degree of B.S., with special reference to the professional courses in the Schools of Mines, Engineering and Chemistry and also a senior program for students planning to enter business. Full information regarding these may be obtained in the current *Announcement of Columbia College*.

Professional Options. — A student desiring to enter upon professional studies before graduation from the College, who has completed not less than 64 points in Columbia College and has no deficiencies in prescribed work, may exercise one of the following options:

- (a) Upon receiving 72 points' credit he may take the studies of the first year in any one of the following professional schools of the University, provided he can satisfy the stated requirements for admission thereto, and may receive the degree of A.B. or B.S. upon the satisfactory completion of two years' work in such professional course:

The College of Physicians and Surgeons
The School of Architecture
The School of Journalism

- (b) Upon receiving 94 points' credit he may similarly take and count towards the Bachelor's degree one year's work in any of the above schools and also in the School of Law.

It should be noted that in general no course for which credit is given toward a professional degree may be included in the preliminary credit requirement.

Students may also, under suitable circumstances, offer toward the Bachelor's degree courses given at the Union Theological Seminary or the General Theological Seminary, or if they are within twelve points of receiving the Bachelor's degree, they may take certain graduate courses in addition to their undergraduate programs.

Miscellaneous. — All students admitted with conditions are assigned for advice to the Committee on Admissions until such time as their entrance deficiencies or conditions be removed. All candidates for honors are assigned for advice to a representative of the department in which they first elect honor work. All other students are assigned to the Dean of the College, or to such officer of instruction or administration as he may designate.

The student's performance in a course is reported according to the following grades: A, excellent; B, good; C, fair; D, poor; F, failure.

A student who receives a mark of F in any prescribed course must repeat that course. In any half-year or Summer Session not more than one course, marked D, may be counted toward a degree. Students receiving D may for the purpose of satisfying the requirements as to prerequisites improve this grade by reexamination, but without change in point credit.

The mark A in any two courses completed in a half-year or Summer Session (no course being counted twice) entitles a student who has not fallen below the mark B to one point of extra credit.

Matriculated students whose record as to entrance conditions and the completion of prescribed courses is satisfactory to the Committee on Instruction, are classified in the University Catalogue as follows:

Freshmen, those who have less than 26 points
Sophomores, those who have completed 26 points
Juniors, those who have completed 58 points
Seniors, those who have completed 88 points

The following additional matters are dealt with in the current *Announcement of Columbia College* which may be had upon application to the Secretary of the University:

Description of Hamilton and Hartley Halls. Advice as to choice of studies. Regulations governing absences. Statement of courses which may be taken by College Students with their prerequisites. Personal relations of students. Probational standing. System of examinations. Records and Reports. Schemes of attendance and recommended programs for students having particular ends in view.

¹ In exceptional cases, students of high scholarship who have completed two years of college work elsewhere may satisfy the residence requirement by the completion of 34 points, not including Summer Session or Extension Teaching.

SCHOOL OF LAW

Delegates to the University Council (see page 4)

Purpose. — The Design of the School of Law is to afford a thorough, practical, and scientific education in the principles of: The common and statute law of the United States: The English and American system of equity jurisdiction: The Public law of the United States and Europe: The Roman law — ancient and modern: Theoretical and comparative jurisprudence.

Opportunity is given through short special courses (see page 129) for specializing in particular fields.

Application. — All applicants for admission must present satisfactory evidence of good moral character.

Admission to the School of Law as a matriculated student will be upon one of the following three conditions:

(a) Graduation from an approved college or scientific school of collegiate rank.

(b) The successful completion of three years of undergraduate study in an approved college or scientific school, which course of study must have included satisfactory courses in Economics and in English and American History.

(c) In lieu of either of the above, the presentation of satisfactory evidence of preliminary training obtained in higher institutions of learning, in this country or abroad, equivalent to that prescribed in either of the foregoing paragraphs (a) or (b).

(For detailed description of courses see page 129).

Advanced Standing. — Students complying with the above requirements for admission to the School, who have, in addition, successfully pursued the study of law for at least a year in an approved law school on examination giving satisfactory evidence of proficiency in the studies of the final year, may be admitted to advanced standing as members of the second-year class. Examinations are usually required in the more important first-year subjects. No one will be admitted to advanced standing beyond the second year except by special vote of the Faculty.

The examinations for advanced standing cover all the work previously done by the class to which admission is sought, and are held at the end of the half-year in which the respective subjects are given and during the week preceding the opening of the fall term. Examinations may be dispensed with and credit given on certificate for courses satisfactorily completed in an approved law school in cases where such courses are deemed by the Faculty equivalent to the corresponding courses given in this School.

Non-Matriculants. — Duly qualified persons not candidates for the degree of LL.B. may be admitted as non-matriculated students on presenting such evidence as the Faculty may require of their exceptional fitness to undertake with advantage the study of law. Applicants must usually have two years or more of College or Law School work to their credit and must be at least twenty-one years of age.

Examinations. — Written examinations are held at the end of each half-year on the subjects completed during that half-year and on the subjects of the first and second years during the week preceding the opening of the academic year.

¹ Absent on leave, 1915-16.

² Absent on leave, Winter Session.

All students, whether matriculated or non-matriculated, must, unless excused by the Dean, present themselves for examination in all the subjects for which they are registered at the first examination held therein, and, in case of excuse from any examination, must take the next examination offered in such subject. Students are not permitted to take examinations in courses for which they are not regularly registered.

At all stated examinations the standing of students will be indicated by the letters A, B, C, D, and F, representing Excellent, Good, Fair, Poor, and Failure, respectively. These grades will be part of the record of the students in the office of the Registrar, and will be reported to them as soon as possible after each examination.

No student will be admitted to the second-year class who is deficient in more than four hours of the work of the first year. No student will be admitted to the third-year class who is deficient in any subject of the first year, or in more than one full course or in more than two half-year courses of the second year.

No student failing in any subject will be permitted to take a second examination therein without having again taken the course in which such failure occurred, nor will any student failing a second time in any subject be allowed to continue in the School except by special vote of the Faculty.

No special examinations are given.

Bachelor of Laws. — The required work for the degree of Bachelor of Laws consists of 76 points, each point representing the satisfactory completion of work requiring attendance one hour a week for one half-year. This requirement is usually met by a program of fourteen hours per week in the first year and of twelve hours per week through the second and third years.

No student doing full work may take less than twelve nor more than fourteen hours per week in any half-year.

Students registered in the Law School will, on approval of the Faculty, be credited with law courses successfully completed by them in the Summer Session of the University.

Not more than one full course representing four points nor more than two half-year courses representing three points each in which the student receives a mark of D may be counted toward a degree in any one year.

No student failing in any subject on the final examination of his class will be admitted to the degree unless within two years of such failure he presents himself for re-examination and receives a mark of C, at least, therein.

Non-matriculated students who have been members of the School for at least two years may become eligible for the degree if they shall have attained an average of B in all the work prescribed therefor.

Master of Laws

Higher Degrees. — The degrees of Master of Arts and Doctor of Philosophy are also awarded for work done in part under the Faculty of Law. (See page 219.)

Scholarships and Prizes (see page 280)

Fees (see page 50)

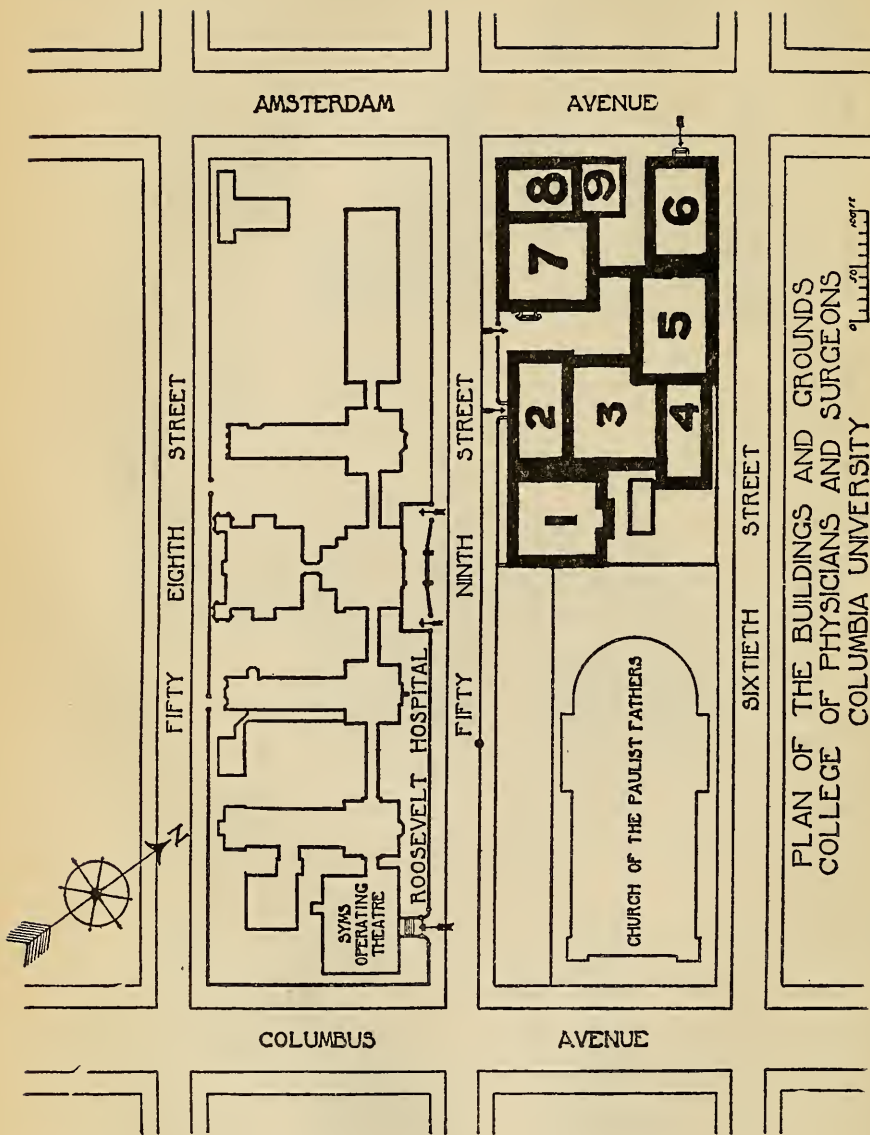

Library. — The Law Library has been greatly extended and improved, and now consists of upwards of 60,000 volumes, which have been carefully selected to meet the wants of students. It contains practically every reported decision of the American, English and British Colonial courts, and good working collections of American and foreign statute law, Roman and modern civil law, and jurisprudence. Lectures on legal bibliography and the use of law books are given by the Law Librarian.

Historical. — King's College — the original foundation of Columbia University — organized a Medical Faculty in 1767 and was the first institution in the North American Colonies to confer the degree of Doctor of Medicine in course. The first individuals to graduate in medicine from the College were Robert Tucker and Samuel Kissam, who received the degree of Bachelor of Medicine in May, 1769, and that of Doctor of Medicine in May, 1770, and May, 1771, respectively. Instruction in medicine was given from this time on until the work of the College was broken up by the War of the Revolution. In 1784 an act was passed making Columbia College in the City of New York the successor of King's College, and instruction was resumed in the academic department. Eight years later the Medical Faculty was re-established, and was continued until 1814, when the Medical Faculty of Columbia College was merged in the College of Physicians and Surgeons, which had received an independent charter in 1807. In 1860, by agreement between the Trustees of the two institutions, the College of Physicians and Surgeons became the medical department of Columbia College, and from that time on the diplomas of the graduates were signed by the President of Columbia College as well as by the President of the College of Physicians and Surgeons. The connection was only a nominal one, however, until 1891, when the College was definitely merged in the University.

Since 1769 the degree of Doctor of Medicine has been conferred by Columbia University on 7931 men, including many of the most eminent practitioners in the United States.

Location and Equipment. — The College of Physicians and Surgeons was first situated at 18 Robinson Street, from 1807 to 1809. From 1809 to 1813 it was at 12 Magazine Street; from 1813 to 1837 at 3 Barclay Street; from 1837 to 1856 at 67 Crosby Street; and from 1856 to 1887 at 101 East Twenty-third Street. It now occupies a group of buildings which stand upon thirty contiguous lots of land, bounded on the south, west, and north by Fifty-ninth Street, Amsterdam Avenue, and Sixtieth Street, respectively, and lying immediately opposite the Roosevelt Hospital.

Main Building. — The main College buildings have been designed to facilitate the combination of theoretical instruction with laboratory work, which is essential to a modern scientific training. In these buildings, which have a floor space of 100,000 square feet, are the lecture halls, the recitation rooms, and the laboratories, under the supervision of their respective professors, all thoroughly equipped for the routine work of the regular classes and for the special original and research work of the advanced students, instructors, and professors of the several departments; the administrative offices, the laboratories of physiology, bacteriology, anatomy, organic and biological chemistry, surgery, pharmacology and pharmacy, pathology and clinical pathology, the morphological museums and laboratory, a dissecting-room accommodating 400 students, and two large amphitheatres.

For a more detailed account of the equipment of each department, see the departmental statements.

Presbyterian Hospital. — The alliance brought about by the mutual action of the two boards of trustees between the College of Physicians and Surgeons and the Presbyterian Hospital permits the scientific and clinical direction by the University of the medical, surgical, and pathological services of the hospital. A clinic service in medicine and in surgery has been organized in the hospital and placed in the charge of the Professors of Medicine and of Surgery, respectively. These services contain about one hundred beds each and form an admirable ward hospital service for the Departments of Medicine and of Surgery. The Presbyterian Hospital contemplates the building of a new plant in which the present arrangements will be far surpassed, both in scientific facilities and in the number of beds.

The exceptional advantages of such an alliance between the College and the Presbyterian Hospital can scarcely be overstated. The system of sending fourth-year students to the various hospitals as clinical clerks has been strengthened and made more effective. The students will be sent to the other hospitals, which have admitted clinical clerks, as heretofore, but the wards of the Presbyterian Hospital, in so far as they have been designated for university purposes, offer a more thorough opportunity for the study of bed patients. The future development on these lines will place the College of Physicians and Surgeons in the position where its clinical facilities will be commensurate with the laboratory development which has taken place during the last ten years.

Library. — The libraries of the College of Physicians and Surgeons consist of a general reference library with reading-room, and the special libraries of various departments. The general reference library is located on the first floor of the main building. It is open during the day and is freely accessible to all students. It contains 5,400 volumes and 7,000 pamphlets, which include a collection of current text-books and monographs and the most important current medical journals. The books are classified according to the classification of the Library of Congress, and are catalogued with author, subject, and title entries. The catalogue will eventually become a union catalogue of

all books in the different libraries of the College. Books are loaned out over night for the convenience of students who wish to study at home. The special libraries are located in the rooms of the various departments. They consist largely of periodical literature, but include many monographs and other books relating to the subjects of the respective departments. They are of special interest to the investigators in these departments, but may be used by other students upon special request.

More than three hundred periodicals are received in the several libraries of the College. The number of volumes and pamphlets is as follows:

Anatomy, 1,700 volumes, 2,000 pamphlets; Biological Chemistry, 2,800 volumes, 8,000 pamphlets; Pathology, 5,700 volumes, 2,000 pamphlets; Pharmacology, 450 volumes; Physiology, 8,000 volumes, 9,500 pamphlets; Practice of Medicine (Janeway Library), 3,000 volumes, 3,300 pamphlets; Reference Library, 5,400 volumes, 7,000 pamphlets; Surgery (at the Presbyterian Hospital), 1,000 volumes, 1,000 pamphlets; total, 28,050 volumes, 32,800 pamphlets.

Crocker Fund. — This fund was established by a legacy from the late Mr. George Crocker for the purpose of conducting an investigation on the subject of cancer. The research laboratories of the Fund are situated on East Field, in a three story and basement, fireproof structure, measuring about forty by one hundred feet. The building is very completely equipped with the necessary apparatus for the experimental study of cancer, and contains a large collection of specimens, a very complete library, photographic and photomicrographic apparatus, etc.

While the immediate object of the Fund is the promotion of research in cancer, voluntary workers who have had suitable preparation in pathological histology and pathology are welcome, and will be given sufficient instruction to enable them to pursue in a satisfactory manner some phase of cancer research. Informal courses will also be offered by the staff in the biology, classification, and diagnosis of tumors.

Vanderbilt Clinic. — The Vanderbilt Clinic is a fully-equipped dispensary for the sick poor. It affords ample material for extended practical clinical instruction in the various departments of medicine and surgery, as the professors, with their clinical assistants, have the entire charge of its practice. The building is so arranged that each department has a room for the practical instruction of students in small sections, in addition to the rooms devoted to the treatment of patients; besides, there is a large theatre for clinical lectures and a small lecture hall. Modern appliances for the treatment of diseases have been introduced, so that students can learn thoroughly the use of methods in each of the special departments of medicine. During the year 1914, 32,980 patients were treated, making 112,911 visits to the Clinic. For detailed information as to the clinical lectures held here, see the departmental statements in this volume, or the current *Announcement of the College of Physicians and Surgeons*.

Sloane Hospital. — The Sloane Hospital for Women is under the direction of the Professor of Obstetrics and Gynecology in the College of Physicians and Surgeons, an Instructor in Obstetrics and an Instructor in Gynecology being the Resident Officers. The wards of the Hospital furnish one hundred and seven obstetrical beds, one hundred babies' cribs, and twenty-four gynecological beds. In addition there are forty-two private-room beds and accommodations for the house staff, students, and nurses. There are two large operating rooms, one for obstetrics and one for gynecology, each equipped with

modern appliances for dealing with these conditions, where weekly clinics are held throughout the year.

With the completion of the Gynecological Department of the Sloane Hospital, the operative material of the large gynecological service of the Vanderbilt Clinic is made available for teaching purposes, so that students of the College of Physicians and Surgeons receive on the college grounds practical instruction, not only in normal and complicated obstetrics and the care of young babies, but in the treatment, operative and palliative, of all diseases of the female pelvic organs.

Hospital Clinics. — The College is strongly represented on the staffs of most of the general and special hospitals of New York. In them both required and optional practical instruction is given by clinical lectures, in the dispensaries and at the bedside, all of which are prominent features of the curriculum. These hospitals are as follows: Roosevelt, Bellevue, Presbyterian, St. Luke's, German, Mt. Sinai, City, Lincoln, Hospital for the Ruptured and Crippled, St. Mary's Free Hospital for Children, Willard Parker, Scarlet Fever and Reception, New York Eye and Ear Infirmary, Foundling, the Babies' Hospital, Herman Knapp Memorial Eye Hospital, the Manhattan Eye, Ear and Throat Hospital, The Montiflore Home and Hospital, and the Woman's Hospital. For a detailed statement, see the current *Announcement of the College of Physicians and Surgeons*.

Plan of Instruction. — The prescribed period of study for the degree of Doctor of Medicine is four years. The requirements for admission are given elsewhere, but too much stress cannot be laid upon the desirability of a student fulfilling the spirit as well as the mere letter of those requirements. Physics, general inorganic chemistry, and biology are now required for admission, and the student of medicine will grasp the advanced subjects forming the groundwork of the course the more easily and with the better understanding in proportion to the breadth and completeness of his preliminary education. The attention of students is particularly called to the regulations of Columbia College (see page 183) which permit a student to obtain a thorough preliminary training and at the same time to complete the requirements for the degree of A.B. or B.S. and the degree of M.D. in six or in seven years.

In the arrangement of the different branches of the medical instruction a logical order of the main themes and a co-ordination in the work of each department have been sought after, enabling the student to concentrate his attention upon some one subject and to be so familiar with it that the allied subjects next to be taken up shall be readily understood. The salient features in the method of instruction are thorough laboratory training, frequent demonstrations, clinical teaching in the operating theatres and at the bedside as well as in the dispensaries, with recitations and didactic lectures to elucidate the many problems confronting the student.

In the first half of the first year the time of the student is devoted largely to anatomy. The instruction is carried on mainly by numerous demonstrations to sections and by long periods of uninterrupted work in the dissecting-room. Organic chemistry is taught by lectures, recitations, demonstrations, and laboratory exercises; a practical course in histology and embryology is given. In the second half of the first year physiology is begun, for which the students have been prepared by courses in anatomy. Physiology is taught by lectures, demonstrations, recitations, and practical work in the laboratory. Physiological chemistry is studied in the laboratory and by lectures, recitations, and demonstrations; anatomy is continued and the course in histology and embryology is completed.

In the first half of the second year anatomy and physiology are completed. The lectures, recitations, and laboratory courses in pharmacology and bacteriology are attended. As preliminary to the third and fourth years, recitations from text-books are held in obstetrics and surgery. Throughout the second year the students are assigned to the laboratory for work in pathology and gross pathological anatomy. In the second half of the year they study clinical pathology and are prepared for the study of medicine by an elementary clinic, and by instruction in the methods of physical diagnosis.

During the third year recitations in medicine and surgery are continued and those in gynecology, diseases of children, and therapeutics are begun. There are theoretical or clinical lectures in medicine, surgery, pharmacology and therapeutics, obstetrics, gynecology, neurology, genito-urinary diseases, laryngology, otology, ophthalmology, dermatology and syphilology, orthopedic surgery, and diseases of children. The class is divided into small sections for instruction in physical and medical diagnosis, and in the special branches of medicine and surgery at the various dispensaries and hospitals.

The student in the fourth year spends most of his time in the hospitals and dispensaries of the city. Consequently, although a few general and clinical lectures are still given, the work is almost entirely practical and bedside instruction. Divided into small groups, the students continue to come into personal contact with patients, under the supervision of the instructor. In this way they have the opportunity to become familiar with the history of a case, to make a complete physical examination, to form a diagnosis, to give a prognosis, to advise treatment, and to watch progress. In the course in surgery the witnessing of numerous major and minor operations is supplemented by an operative course in which the student himself performs on the cadaver many of the more common operations. For an obstetrical service, the unsurpassed facilities of the Sloane Hospital for Women and out-patient obstetrical department in connection with the Nursery and Child's Hospital offer excellent opportunities. Here the student is required to live for five weeks and personally attend a certain number of cases of labor. The course in diseases of children includes bedside instruction in the wards of the Babies' Hospital, where exceptional advantages are enjoyed by the students for studying all forms of acute disease in infants and young children. The course is rounded out by personal instruction in the more special branches of medicine. In these branches the student is taught how to use instruments of precision and to recognize and treat successfully many of the rarer forms of disease.

Clinical Clerks. — Courses in the wards of St. Luke's, Bellevue, Roosevelt, the Mt. Sinai, the Presbyterian, the New York, and the German Hospitals have been opened by those institutions to fourth-year medical students. These courses consist of work in the wards of the hospitals during which the students serve as clinical clerks both in medicine and surgery and become for the time being members of the regular staff. The courses are open for periods of two months' duration both during the summer and during the regular term.

Admission. — All candidates must present the medical-student certificate of the Regents of the University of the State of New York, based on the following qualifications: The completion of not less than two full years of study, or the equivalent, in an approved college or scientific school, which college course must have included at least one year's instruction in the elements of physics, inorganic chemistry, and biology and French or German.

Admission with Advanced Standing. — Candidates who have completed, without conditions, one or more years of study in a medical school rated in

class A or A+ by the Council on Medical Education of the American Medical Association and who apply for admission to the College of Physicians and Surgeons will be given credit for all courses satisfactorily completed therein, on presentation of proper certificates to the Committee on Admissions, covering the same; provided that the candidates before beginning the study of medicine have fulfilled the requirements for admission demanded by the College of Physicians and Surgeons. Application blanks will be furnished on request, and prospective students are requested to file their applications before September 1st to avoid delay in matriculating at the beginning of the season. It is essential that students offering themselves for admission to advanced standing should have had all the work presented in the curriculum of the College of Physicians and Surgeons.

Admission to the second year. — Students planning to enter the second year from other medical schools who have not had a course in physiological chemistry at their medical school of previous residence may make up that deficiency by a course in the summer session at Columbia prior to admission.

Admission to the third year. — The course in medical education divides itself logically into two parts, the first of which is scientific and consists of the first two years, and the second is clinical and consists of the last two years. It is found difficult to separate the work of the third and fourth years, and students who desire to obtain the advantages of the clinical opportunities offered in New York City, so far as they are represented by the College of Physicians and Surgeons, are recommended to transfer from their college of previous study at the end of their second year in medicine, and to take both the third and the fourth years at Columbia. Students who have finished the combined course leading to a bachelor's degree, of which the last two years have been taken in a regular medical school connected with their university, are eligible for admission to the third year at the College of Physicians and Surgeons, provided they have taken all the courses of its first two years. Those students, however, who are deficient in clinical pathology or pathology, may make up the deficiency, before admission, in the summer sessions. Those students who are deficient in physical diagnosis may make up this subject in a special course which is given at the Vanderbilt Clinic for two weeks before the session opens.

Admission to the fourth year. — The fourth year at the College is so eminently clinical that admission to it will be limited to students who have already secured the degree of doctor of medicine. It is believed that it will be found to be a valuable post-graduate year for many graduates of other institutions.

Special Students. — Students desiring to do special work at the College of Physicians and Surgeons may register at any time during the year as special students. Such applicants, however, cannot subsequently become candidates for graduation without full compliance with the terms of admission and graduation. Special students will be required to present to the Committee on Admissions before entrance evidence of an adequate preliminary education, and special fitness for the particular work they desire to pursue.

Graduation. — Every candidate in the four-year course will be required before admission to the degree of M.D.:

1. To present satisfactory evidence, as required by law, of good moral character, and of having attained the age of twenty-one years.
2. To present evidence of having complied with the requirements for admission.

3. To have attained to satisfactory standing in the required studies of the four years of the curriculum. (See table, page 196.)

4. A candidate who shall have been admitted to advanced standing will be required to have spent not less than four academic years at the studies referred to in the clause next preceding; and to have complied successfully with the requirements for admission to advanced standing.

No two academic years which shall have begun during the same calendar year will be held to satisfy the requirements of the preceding clause.

Scholarships, Fellowships, and Prizes (see page 280)

Detailed information as to the laboratories, collections, and other facilities for study will be found in the statements of the various departments of instruction, pages 61 et seq. and more fully in the current *Announcement of the College of Physicians and Surgeons*.

Summer Session. — A general statement of the work offered in the Summer Session will be found in connection with the statement of the Summer Session (see the Table of Contents of this volume), and a detailed announcement, showing the scope of each course, the conditions under which it is given, and the fee charged, will be sent upon application to the Secretary of Columbia University.

New Advanced Courses in Engineering

The Trustees of Columbia University, in accordance with the unanimous recommendation of the Faculty of Applied Science, determined in 1912 to raise the requirements for admission to the Schools of Mines, of Engineering and of Chemistry, and generally to elevate and strengthen the course of engineering and technical study, from and after July 1, 1914. These schools at that time became advanced or graduate schools, to which students of any branch of engineering, who have had a suitable preliminary training in a scientific school or college, may come for the highest type of professional instruction and for training in methods of research.

Candidates for admission to these new courses are required to present evidence of such preliminary general education as can ordinarily be had only by taking at least three years of study in a college or scientific school of high rank.⁴

The new arrangement need make no substantial change in the age of graduation from the professional school. The student who enters a college at sixteen or sixteen and one-half years of age, and who pursues a combined college and professional school course successfully, can be graduated under the terms of the new plan at about the same age as those students who formerly entered at eighteen and one-half years and followed the former four-year courses.

¹ Absent on leave, 1915-16.

² Absent on leave, Winter Session.

³ Absent on leave, Spring Session.

⁴ During the year 1915-1916, the last two years of the former four-year courses will be given in order to take care of students who entered before the new requirements went into effect. Students who have completed the equivalent of the first and second years of the former four-year courses may enter the third (Junior) year of these courses in September, 1915, on the presentation of satisfactory credentials. For further information see the current *Announcement of the Schools of Mines, Engineering and Chemistry*.

Beginning in 1915, the schools under the Faculty of Applied Science will offer the following courses:

The School of Mines. — Three-year advanced courses leading to the degrees of Engineer of Mines and of Metallurgical Engineer.

The School of Engineering. — Three-year advanced courses in Civil Engineering, Sanitary Engineering, Electrical Engineering, and Mechanical Engineering, leading to the degrees of Civil Engineer, Electrical Engineer, and Mechanical Engineer respectively.

The School of Chemistry. — Three-year advanced courses, leading to the degrees of Chemist and Chemical Engineer.

The courses are intended to meet the requirements of the several professions indicated; and many of them permit a certain amount of specialization, particularly in the third year. The work in the School of Mines is so arranged that the student can emphasize the engineering, the metallurgical, or the geological side of his profession.

Candidates for a professional degree who have some special end in view will be occasionally permitted to vary the regular program by substituting other subjects offered under the Faculty of Applied Science.

Requirements for Admission. — Admission to the Schools of Mines, Engineering, and Chemistry will be upon one of the two following conditions:

(a) The satisfactory completion of not less than three full years of study or the equivalent in an approved college or scientific school which course must have included adequate instruction in Chemistry, Mathematics and Physics and the first courses in Drawing, Mechanics, Mineralogy and Shopwork or

(b) In lieu of the above, candidates of mature years who may not be able to fulfill the requirements in every respect, but who have had a successful professional experience, may present such evidence as the faculty may require to prove exceptional fitness to undertake the study of engineering.

It is desirable that candidates for admission make application in the spring in order to ascertain whether it would be advisable to attend the Summer Session in July and August with a view of completing the requirements for admission.

Graduates of colleges and technical schools may be admitted to advanced standing by submitting evidence that they have satisfactorily completed courses required in the class or classes preceding the one for which application for admission is made.

Students who plan to do their college work elsewhere should apply without fail to the Secretary of the University for advice regarding the choice of their studies in order to make certain that they may be able to meet the new requirements for admission by the time their college work is completed.

Preparatory Courses in Columbia College. — The attention of students who wish to pursue a course in the Schools of Mines, Engineering, and Chemistry is directed to the course in Columbia College, especially arranged for study preparatory to the work in engineering. See the current *Announcement of Columbia College*.

Special Courses. — Graduates of the Schools of Mines, Engineering, and Chemistry, and of other institutions of equal grade may pursue any subjects taught in the schools for which they are properly qualified.

Persons of mature age who are not graduates, but who show special qualifications, are sometimes permitted to pursue special courses, but this permission is not given to others.

Registration and Fees (see page 50)

Fellowships and Scholarships (see page 280)

Rules. — 1. A student cannot be a candidate for more than one professional degree at the same time.

2. A candidate for a degree must comply with all requirements in force at the time said degree is conferred.

3. A student will be permitted to substitute one subject for another provided he obtains the consent of the Dean, the heads of departments concerned, and the head of the department giving the technical instruction leading to the degree.

4. A student absent from more than one-tenth of the required exercises will be debarred from examination in that subject. No student shall be exempt from this regulation except by action of the Committee on Instruction.

5. After examinations have been held, officers shall report to the Registrar the standing of all students who have attended their courses, in terms of the letters A, B, C, D, and F; A, B and C to be passing grades, D signifying a deficiency removable by reexamination, and F a complete failure. Reports of standing will be sent to students at the end of each term. Copies of all reports are at the same time sent to the Dean and to the Faculty adviser. They will be sent to the parent or guardian of students only on request.

6. Regular examinations shall be held at the end of the first half-year and at the end of the second half-year in all subjects offered during those respective periods. An examination may be held at the completion of any subject which does not extend throughout the given half-year.

7. Special examinations for students deficient at regular examinations shall be held during the two weeks in September preceding the opening of the next following academic year; and for members of the fourth class in subjects belonging to that year only, during the first week in May.

Students who have been debarred and students who have received a grade of F either during the regular term or in the Summer Session are excluded from such examinations in accordance with the terms of the following rule:

Any student who shall have been debarred from or shall have received a grade of F in any mid-year or final examination or in the Summer Session in any subject shall not be allowed to take a deficiency or make-up examination in said subject until he shall have repeated said course in class.

8. Failure to pass a Summer Session course, credit for which would be accepted as equivalent to a regular course in the Schools of Mines, Engineering, and Chemistry, shall be counted, in case a student registers for said course, as one of the three failures referred to in Rule 10.

9. The fee for special examinations is \$5 for each course, which must be paid when the application is made. For special examinations in the September series the maximum fee is \$25.

10. A student failing to pass in any subject at the regular examinations must present himself for special examination as provided under Rule 7.

Failing to pass the second examination, he must repeat the subject with the next class. Failing a third time to pass a satisfactory examination he may be dropped from the roll of the School.

11. Absence from any regular or special examination provided for in Rules 7 and 8 shall count as a failure unless excused by the Dean for reasons of weight.

12. No student having an entrance deficiency shall be permitted to register for any subject of the third or fourth year without the written consent of the Dean, and no student shall be permitted to register for any subject, the prerequisites for which have not been satisfied by him unless the Dean, for reasons of weight, grants him special permission.

13. Any student who shall have passed a satisfactory examination in Columbia College, in any subject forming a part of one of the professional courses in the Schools of Mines, Engineering, and Chemistry, will not be required to pursue that subject a second time.

14. During vacations following the close of each year, memoirs on assigned subjects must be prepared by the students in the courses of Mining, Metallurgy, Civil Engineering, Electrical Engineering, Mechanical Engineering, Chemical Engineering, and Chemistry. The time specified for the completion and handing in of memoirs will be as stated in the respective departmental announcements.

A student failing to hand in his memoir, drawings, or other summer work at the time specified by the department in which he is registered shall be considered to have failed; to have his work received later, he will be obliged to pay a fee of \$5, as for a special examination.

15. By permission of the Dean, and concurrence of the heads of departments concerned, a student may attend subjects not required for his degree, provided such attendance does not interfere with his regular work. He must fulfil all the requirements exacted from regular students in such course.

Application for each special examination, except as provided below, must be filed at the office of the Registrar at least one week before the examination is to be taken, and in September and May at least one week before the first day of the respective examination period (in 1915-16 not later than Monday, September 13, and Tuesday, April 25, respectively). For later application an additional fee of \$5 for any examination or series of examinations will be charged. Applications must be made on blanks (one for each course) to be obtained from the Registrar.

During the academic year students will be held responsible for the receipt of reports and other official communications sent to them at the University Post Office. During the summer vacation they will be held responsible for the receipt of such communications sent to their home address as given on their registration blank for the preceding academic year.

Equipment. — Detailed information as to the laboratories, museums, collections, libraries, and other facilities for study and research will be found in the departmental statements as follows: **Chemistry**, page 75. **Civil and Sanitary Engineering**, page 81. **Electrical Engineering**, page 107. **Geology**, page 114. **Mechanical Engineering**, page 136. **Metallurgy**, page 137. **Mineralogy**, page 139. **Mining**, page 140. **Physics**, page 157.

SUMMARY OF PROFESSIONAL COURSES OF STUDY

NOTE: Detailed tabular arrangements of each year of these courses will be found in the current *Announcement of the Schools of Mines, Engineering, and Chemistry*. For significance of course numbers see page 61.

Engineer of Mines

The instruction during the first year includes fundamental training in physics, mechanics, chemistry, mineralogy, geology and engineering, as outlined in the program of studies. Instruction in the second and third

202 SCHOOLS OF MINES, ENGINEERING, CHEMISTRY

years includes mining engineering, metallurgy, and advanced geology, and certain subjects in civil, mechanical, and electrical engineering. Laboratory instruction in all these subjects extends through three years.

The engineering, mining, and metallurgical laboratories are equipped to train the student in the making of scientific tests of engineering materials, and working tests of machines and processes of ore treatment, thus preparing him, as far as it is possible in the school, for work that he will be called upon to do as an engineer.

Practical instruction in summer classes in the field is made an important feature of the curriculum.

While much time is given to practical training in the laboratories, in the field, and at the mines and metallurgical establishments, care is taken to subordinate this instruction to a high standard of accomplishment in classroom work.

Metallurgical Engineer

This course, which covers three years, is intended for those who expect to follow metallurgical work and become trained metallurgists in any of the branches of the profession. During the first year attention is paid to a thorough training in fundamental subjects, especially in chemistry, physics, geology, mineralogy, and preliminary courses in engineering. In the second year instruction is given in metallurgy and in mechanical, electrical, and mining engineering, chemistry, mineralogy, and geology. The third year is devoted largely to advanced lecture courses and laboratory work in metallurgy, to important courses in mining engineering, and to the higher branches of engineering and chemistry.

In the summer schools, instruction is given in general surveying, geological field work, and visits are made to metallurgical works. In the eight weeks' summer courses at metallurgical works the students are required to study processes, make dimension sketches of furnaces and mills, and by observation and instruction become acquainted with metallurgical operations as conducted at the time.

Civil Engineer

The purposes set forth in the General Statement are accomplished by instruction in the following list of subjects, the earlier of which are more fundamental while those of the last year are more professional in their character and scope. The subjects are so chosen as to accomplish broad educational training in the various fields of civil engineering. It will be observed that the effort is made to emphasize and ground the student in fundamental principles, especially in their applications to the practical matters of engineering work. The range of subjects is sufficient to cover essentially the manufacture and use of power; any structural work in iron and steel, masonry, including reinforced concrete, timber, and those constructions involving the consideration of the pressure and carrying power of earth. It will also be noted that the important subject of hydraulics is amply provided for by suitable topics covering public water supplies, flow in streams, natural and artificial, and hydraulic motors.

Sanitary Engineering

The three-year graduate course in Sanitary Engineering aims to include the more essential subjects given in the Civil Engineering course, but provides a working knowledge of sanitary science and the sanitary arts. The course is a differentiation of Civil Engineering and leads to the same degree.

While mathematics, mechanics and physics are the theoretical basis for the work of the civil engineer in design, construction and management, the sanitary engineer adds to these the collateral sciences of chemistry and biology.

The sanitary engineer must not only be able to design and construct water purification plants and sewage disposal systems but he must understand the chemical and biological processes upon which the successful operation of these

Instruction is given by illustrated lectures, conferences and demonstrations supplemented by field and laboratory practice. The field work includes instruction in the use of transits, levels and plane tables, current meters, gauges and floats, and visits of inspection. The laboratory work in hydraulics consists of the measuring of weir and orifice discharge, the flow through open channels and closed pipes and general hydraulic investigations.

The actual curriculum including the various requirements which must be fulfilled in order to obtain the degree of E.E. are given in the following list of studies for each of the three graduate years, the character of each subject or requirement being explained more fully in the departmental statement referred

to. Before entering these three years of graduate study, the student is required to have a training in such fundamental subjects as mathematics, physics, chemistry, mechanics and drawing, as outlined in the requirements for admission.

The three years outlined below are intended to include the more specialized professional instruction. However, even in these later years more advanced theoretical subjects, such as thermodynamics and electro-mechanics, are included and given most careful attention.

Mechanical Engineer

All the subjects leading to the degree of Mechanical Engineer are listed in the following table, together with the year and term in which they are given. The first year is devoted to essential preparatory and introductory subjects so treated as not only to prepare for later work directly but to give a survey of all that is to come. In the second year there are developed the basic principles of thermodynamics, resistance of materials and hydraulics, which

are fixed in the mind of the student by drill, in the drafting room by design courses, in the laboratory by experiments and tests, and in class by analysis of standard mechanical and electrical machinery. The third year is devoted to a detailed treatment of gas, steam, and water power units and plants and to factory buildings, equipment, processes and management. Throughout the course the aim is to develop clear conceptions of underlying principles, habits of independent thought and orderly mental procedure applicable to any sort of mechanical engineering problems rather than to the memorization of isolated facts. The training given not only fits the student to take up the design of machinery and the perfection of processes of doing things by mechanical means, but also to take ultimately a leading place in the management of the manufacturing and transportation industries as engineer or executive.

Chemical Engineering

The courses of instruction leading to the degree in Chemical Engineering are carefully chosen with a view to training men to develop and direct those industrial and manufacturing operations and processes which are based upon the application of chemistry. A general knowledge of civil engineering is

obtained from courses in hydraulics and resistance of materials. Electrical applications are studied in the Direct and Alternating Current Laboratories with the electrical engineers. A study of steam and gas power machinery, pumps, turbines, blowers and hydraulic equipment in the mechanical engineering laboratories supplements the courses in general physics, thermodynamics and hydraulics.

In addition to the training in the fundamental engineering courses, it is sought to advance the students' knowledge of chemistry into the fields of physical chemistry, organic chemistry, and the more important special applications of industrial chemistry.

During the final year much attention is given to the development of the skill of the student in the application of the fundamental, engineering and chemical principles studied earlier in the course to the practical problems of the industry. The Chemical Engineering Laboratory is so equipped and managed as to develop the power of making direct application of previous training.

Graduates in Chemical Engineering obtain positions in works laboratories as assistants to superintendents of works, and assistants to designing and erecting chemical engineers, and in various other capacities calculated to develop the experience leading to the independent direction and management of manufacturing enterprises.

Chemistry

The graduate years include courses in all branches of chemistry. In view of the increasing use of electricity in industrial chemistry, this science is studied continuously during the first two years. In the third year the work is all elective, and it is concentrated in a few subjects each half-year, to the end that the student may devote himself to two or more branches of the science, and develop to the fullest extent his knowledge of the lines of work chosen. By means of preceptorial conferences, much attention is given to outside reading and to practicing the art of mastering all that is known about a given topic. The chemical courses furnish the student with technical knowledge of the methods of the science. The conferences enable him to recognize, to lay out, and to solve the problems which his professional work will constantly bring to him for solution.

The three-year course in chemistry prepares men for professional careers as analytical and consulting chemists, teachers of chemistry, research workers in the government, state, municipal and endowed scientific laboratories, and as chemists for the operating departments of railroads and of large industrial establishments which maintain separate chemical and engineering staffs, such as packing houses, sugar refineries, and other large food factories, fertilizer works, gas works, textile and dye works, and establishments where glass and ceramic products, explosives, illuminating and lubricating oils, metals and alloys, alkalis, acids, drugs, and innumerable other products are manufactured.

Problems arising in factories and in public and private undertakings, which do not constantly employ chemists, and special problems arising in factories which do employ chemists are constantly referred to analytical and consulting chemists.

The agricultural experiment stations, the federal and state food laboratories, the boards of health, the state and national geological surveys, and the many privately endowed institutions for scientific research employ very large numbers of chemists as workers and directors.

210 SCHOOLS OF MINES, ENGINEERING, CHEMISTRY

Many of the larger and more progressive manufacturing establishments maintain thoroughly equipped laboratories devoted entirely to experimental research for the purpose of improving present manufacturing processes and for devising new and better ones.

General Statement. — The Faculty of Political Science, established in 1880, has charge of the university courses of instruction and research in political and social science, including history, economics, public law and comparative jurisprudence. Any duly matriculated university student is at liberty to combine courses of study and investigation under this Faculty with courses offered by other Faculties of the University. Women who hold a baccalaureate degree are admitted to the School of Political Science as students in history, economics and social science and may become candidates for the higher degrees.

Students are received either as candidates for the degrees of Master of Arts and Doctor of Philosophy (see "Regulations for Higher Degrees," page 214, *et seq.*), or as "non-matriculated students," to pursue special or partial courses.

Courses. — For information regarding the courses offered during the current year, see statement under groups of subjects, as follows:

Foreign Service. — A system of courses has been inaugurated to prepare students for work in foreign countries, either in the service of the United States Government, in business enterprises, or as missionaries or scientific investigators.

The successful completion of the courses offered, which will normally occupy three years in the case of candidates for the consular service, and two years in the case of candidates for other foreign service in special fields, will entitle the student, on recommendation of the committee in charge of the course of studies, to an appropriate certificate. Subject to the rules of the institution, candidates for certificates are admitted to candidacy for the regular academic degrees.

The course of study is framed primarily for graduate students, but it is also open to specially qualified students who have not completed the full college course. Students are expected to have completed successfully at least two years of undergraduate work or to give proof of equivalent training.

Candidates for a certificate must prove their ability to read French or German, and must have completed the regular college courses on the general principles of economics, American history, and European history of the nineteenth century.

The program of studies includes seven divisions: (1) Languages, (2) Geography, (3) Ethnography, (4) History, (5) Religions, (6) Economics, (7) Law.

REGULATIONS FOR THE DEGREES OF MASTER OF ARTS AND DOCTOR OF PHILOSOPHY

Candidates for the degrees of Master of Arts and Doctor of Philosophy, known as the higher degrees, must hold a baccalaureate degree in arts, letters, philosophy, or science, or an engineering degree from an approved institution, or have an education equivalent to that represented by one of these degrees.

Students are advised to ascertain, by addressing the Director of University Admissions, before coming to the University, whether the college from which they have received their baccalaureate degree is upon the list of institutions whose degrees are accepted by Columbia University as entitling the holder to matriculate as a candidate for the higher degrees; or for a ruling upon an education claimed to be the equivalent of a Bachelor's degree.

A student who is graduated from a college which is not on the accepted list should submit an official transcript of his college record showing: (1) the grades received in the several courses; (2) a catalogue of his college in which he has marked (a) each of the subjects that he offers for admission, and (b) each course for which he has received credit toward the degree.

Each candidate for a higher degree must present to the Dean satisfactory evidence that he is qualified for the studies he desires to undertake.

Candidates for the degrees of Master of Arts and Doctor of Philosophy must pursue their studies in residence for a minimum period of one and two years, respectively; provided, however, that the period of residence may be proportionately extended in the case of students from institutions in which the course of study is not regarded as equivalent to that in Columbia College.¹ The year spent in study for the degree of Master of Arts is credited on account of the requirement for the degree of Doctor of Philosophy. Residence at other universities may be credited to a candidate. In certain cases and by special arrangement, time exclusively devoted to investigation in the field will be credited in partial fulfillment of the requirement of residence. No degree will be conferred upon any student who has not been in residence at Columbia University as a graduate student for at least one year. The satisfactory completion of work at four Summer Sessions or at two Summer Sessions, together with a half-year of the regular academic year, will be accepted as fulfilling the requirement of one year of university residence for the higher degrees.

Professional Schools. — Students holding the required first degree who are primarily registered in a professional school of Columbia University, or in an allied professional school, may, with the consent of the faculty of such school, be registered as candidates for the higher degree in the Faculty of Political Science, the Faculty of Philosophy, or the Faculty of Pure Science. In such a case the candidate must take his major subject under one of these Faculties, and must conform to all its rules as regards examinations, essay, and dissertation; but he may offer, as the equivalent of four full courses for the degree of Master of Arts and of the two minor subjects for the degree of

¹ In determining residence the following is the administrative procedure: attendance distributed over a period of at least one academic year, upon at least eight full courses from the list of graduate courses, as approved by the graduate faculties and the University Council, constitutes one year of residence for the higher degrees in Columbia University.

Doctor of Philosophy, such of his professional courses as may be approved for that purpose by the Dean of the Graduate Faculties.¹

Doctor of Philosophy. — Each student who declares himself a candidate for the degree of Doctor of Philosophy shall designate one principal or major subject and two subordinate or minor subjects. Candidates are expected to devote about one-half of their time throughout their course of study to the major subject, and about one-quarter to each minor subject. Except by vote of the Executive Committee of the University Council, upon the recommendation of the Dean and the head of the department concerned, no candidate may choose his major and both minor subjects under one department. Major and minor subjects may not be changed except by permission of the Dean, on the approval of the head of the departments concerned. Both the professor in charge of the major subject and the Dean must pass upon the student's qualifications for the course of study he desires to pursue, and approve his choice of subjects before registration can be effected.

The subjects from which the candidate's selection must be made are:

UNDER THE FACULTY OF POLITICAL SCIENCE

Group I. — History and political philosophy: (1) Ancient and oriental history; (2) medieval history and church history; (3) modern European history from the opening of the 16th century; (4) American history; (5) history of thought and culture.

Group II. — Politics, public law and comparative jurisprudence: (1) Politics; (2) Constitutional Law and Administrative Law; (3) International Law; (4) Roman Law and Comparative Jurisprudence.

Group III. — Economics and social science: (1) Political economy and finance; (2) sociology and statistics; (3) social economy.

A candidate for the degree of Doctor of Philosophy whose major subject lies within the jurisdiction of this Faculty must select one minor subject outside of the group which includes his major subject, and one minor subject within the group which includes his major subject. He must take, in his major subject, courses occupying at least four hours weekly during each required year of residence (provided that this number of hours be offered in the subject), and must also attend a Seminar during the period of residence. In each minor subject he must take courses occupying at least two hours weekly during each required year of residence.

UNDER THE FACULTY OF PHILOSOPHY

I. Major Subjects: (1) Philosophy; (2) psychology; (3) anthropology; (4) education; (5) linguistics; (6) comparative literature; (7) classical archæology and epigraphy; (8) Greek language and literature, and, incidentally, Grecian history; (9) Latin language and literature, and, incidentally, Roman history; and the following including in each case the study of both the language and the literature: (10) English; (11) Germanic; (12) Romance; (13) Sanskrit (with Pali) and Iranian; (14) Semitic languages; (15) Chinese. Nos. 1, 2, 3, 4, 6, 10, 11, 12, 13, 14, and 15 may each be offered as the equivalent of a major and one minor subject.

II. Minor Subjects: (1) Philosophy; (2) psychology; (3) anthropology; (4) education; (5) linguistics; (6) comparative literature; (7) Greek; (8)

¹ In accordance with this provision it is the custom of the Dean to approve two full years of professional work as the equivalent of four full courses for the degree of Master of Arts and three full years of professional work as the equivalent of the two minor subjects for the degree of Doctor of Philosophy, and to require students who are candidates for degrees under this provision to distribute their university work over a period of two and three years, respectively.

Greek archæology; (9) Latin; (10) Roman archæology; (11) Comparative Grammar of Greek and Latin; (12) Sanskrit; (13) Iranian; (14) English; (15) Anglo-Saxon; (16) Gothic; (17) Germanic philology; (18) German language and literature; (19) Scandinavian languages and literatures; (20) Romance philology; (21) French language and literature; (22) Spanish language and literature; (23) Italian language and literature; (24) Hebrew; (25) Arabic; (26) Assyrian; (27) Syriac; (28) Ethiopic; (29) Semitic epigraphy; (30) Turkish; (31) Armenian; (32) Chinese; (33) Coptic; (34) Celtic; (35) Comparative religion.

A candidate for the degree of Doctor of Philosophy may, with the consent of the Dean and of the departments concerned, select both minor subjects within the same department, and may divide a minor subject, taking parts of two subjects germane to his major subject.

UNDER THE FACULTY OF PURE SCIENCE

(1) Agriculture; (2) anatomy; (3) astronomy; (4) bacteriology; (5) botany; (6) biological chemistry; (7) chemistry; (8) civil and sanitary engineering; (9) electrical engineering; (10) highway engineering; (11) geodesy; (12) geology; (13) mathematics; (14) mechanical engineering; (15) mechanics and electromechanics; (16) metallurgy; (17) mineralogy; (18) mining; (19) paleontology; (20) pathology; (21) pharmacology; (22) physics; (23) physiology; (24) zoology.

No one of the subjects, chemical engineering, civil engineering, electrical engineering, mechanical engineering, metallurgy, or mining, may be offered as a subject of major interest except by a candidate who has already obtained the corresponding engineering degree. With the consent of the Dean and of the departments concerned, (1) the major and one minor subject may be taken under one department, (2) both minor subjects may be taken under one department and one minor subject may be divided.

Each student is given a registration-book in which to keep the record of courses attended. At the beginning and end of each course the professor in charge certifies the student's attendance by his signature. Before presenting himself for examination, the student shall submit his registration-book to the Dean in order that the Dean may satisfy himself that the residence requirements have been fulfilled.

Applications for the final oral examination for the degree of Doctor of Philosophy must be filed with the Dean at least two months before one of the three dates at which diplomas are issued (*viz.*, October, February, and June) in order to secure examination before that date.

Each candidate for the degree of Doctor of Philosophy shall present a dissertation embodying the results of original investigation and research on some topic previously approved by the professor in charge of the major subject. When such dissertation has been approved, it shall be printed by the candidate, and one hundred copies shall be delivered to the Registrar before the degree is conferred. For reasons of weight and on the recommendation of the department concerned, the Dean may suspend this requirement if the dissertation has been accepted by a reputable scientific journal and publication within a period of two years has been assured. The Dean may, when he deems it necessary, demand a financial guaranty of eventual publication. On the title-page of every such dissertation shall be printed the words: "Submitted in partial fulfillment of the requirements for the Degree of Doctor of Philosophy, in the Faculty of ———, Columbia University;" the full name of the author;

the full title of the dissertation; the year and place of imprint, and, if a reprint, the title, volume, and pagination of the publication from which it was reprinted. There shall be printed and appended to each dissertation, in the form of a vita, a statement of the place and date of birth of the author, of the educational institutions that he has attended, and a list of the degrees and honors conferred upon him, as well as the titles of his previous publications.

No candidate for the degree of Doctor of Philosophy is admitted to examination except on the recommendation of the professor who has approved the topic selected for the dissertation, indorsed by the professors in charge of the major and minor subjects. Every candidate must pass, besides such other examinations as the Faculty in charge of the major subject may require, an oral examination on all three subjects, and must defend the dissertation in the presence of that Faculty, or of so many of its members as may desire or as may be designated to attend.

In the Faculty of Political Science, the examination on the major and minor subjects and on languages, but not on the dissertation itself, may be held before the printed dissertation is submitted.

In the Faculties of Philosophy and Pure Science, the dissertation is not required to be printed until after the examinations of the candidate. Students should, however, at least three weeks prior to their examination deposit three typewritten copies in the Dean's office for the inspection of the examiners.

The general examination for the degree of Doctor of Philosophy will not be confined to the courses which the candidate has attended in Columbia University or elsewhere, or even to the field covered by such courses. The candidate is expected to show a satisfactory grasp of his major subject as a whole and a general acquaintance with the broader field of knowledge, of which this subject forms a part.

The ability to read at sight French and German, to be certified in each case by the Dean, is required by all the Faculties.

In the Faculty of Political Science, the candidate must also show that he is able to read ordinary Latin, unless it shall have been previously certified by the professor, or professors, in charge of the major subject that ability to use this language is not necessary for the proper prosecution of the candidate's researches. On application to the Dean, the candidate may be examined on the required languages one year before presenting himself for the general examination on his major and minor subjects. If no such application be made, he will be examined on the languages in connection with the general examination on these subjects.

In the Faculty of Philosophy, admission as a regular student or as a candidate for the degree of Master of Arts does not admit to candidacy for the degree of Doctor of Philosophy. Only those students are admitted to candidacy for the degree of Doctor of Philosophy who (1) are recommended for such candidacy by the departments in which their major and minor subjects of study lie; (2) are certified as to their ability to read French and German by those departments; (3) are certified as to their ability to read Latin by that department, provided that students whose major subject is philosophy, psychology, anthropology, or education, shall not be required to meet this test when it is certified by the professor in charge of their major subject that an ability to read Latin is not necessary for the proper prosecution of their researches. The examinations in Latin, French and German shall be passed at least one academic year before the candidate presents himself for the degree.

No student may continue to be a candidate for the degree of Doctor of Philosophy for a longer period than three years from the time he ceases to be in residence, nor for a longer period than six years from the time of his initial registration for a higher degree.

Master of Arts. — Each student who declares himself a candidate for the degree of Master of Arts shall designate a department under which he elects to do the major part of his work and shall arrange, in consultation with and under the advice of that department, and subject to the approval of the Dean, a curriculum comprising at least the equivalent of seven full courses of graduate rank together with an essay or the equivalent thereof.

No one of the subjects chemical engineering, civil engineering, electrical engineering, mechanical engineering, metallurgy, or mining, may be offered as a subject of major interest except by a candidate who has already obtained the corresponding engineering degree.

No curriculum for the degree of Master of Arts shall include more than four courses which the candidate offers for a professional degree, or for a certificate given in lieu thereof, in any professional school belonging to the University or affiliated with it.

Each candidate for the degree of Master of Arts must file a formal application for the degree on a blank provided for the purpose, to be had of the Registrar. Before this application is filed with the Registrar the title of the essay, if an essay is required, must have been formally approved by the professor in charge and the courses presented in satisfaction of the residence requirements must also have been approved by the department concerned. If the degree is to be conferred in February, the application must be filed with the Registrar on or before December 1; if in June, on or before March 1; if in October, on or before August 1. The last-named date applies to candidates who shall complete the requirements of residence and attendance in the Summer Session then in progress. Diplomas are issued on the third Tuesday in February, on Commencement day, and on the third Tuesday in October, corresponding, respectively, to the foregoing dates of application.

An essay or the equivalent thereof shall be required of candidates for the degree of Master of Arts by the department of major interest or by the Faculty to which said department belongs and shall be designed to occupy one quarter of the candidate's time for a half-year. If the essay is not required, the candidate arranges with the department for the equivalent of the essay. Such essay shall be submitted to the appropriate department at such time as the department may designate. If the essay is accepted, two typewritten or legibly written copies, together with a certificate of acceptance by the professor in charge, shall be deposited with the Registrar at least two weeks before the candidate expects to receive his degree. These copies must be written on "Paragon Linen," 11 x 8½ inches in size, 20-pound weight, 4½ wove, a space of one and one-half inches on the inner margin being left free from writing. The title page shall contain the words: "Submitted in partial fulfilment of the requirements for the degree of Master of Arts in the Faculty of ———, Columbia University."

With the approval of the appropriate departments the Dean may credit graduate work done at another institution, the courses to which such work is deemed equivalent being entered in the curriculum as "completed elsewhere," but at least five full courses of graduate rank must always be taken at Columbia University. This provision, however, shall not operate to reduce the requirement of one year's residence in this University, but will permit a

student to discharge this requirement by electing outside his curriculum such courses as may be approved by the department in charge.

An undergraduate who at the beginning of any half-year is within twelve points of a Bachelor's degree may be permitted, with the approval of the appropriate Deans, to take one graduate course with a view to counting it for a second degree; if within eight points, two; if within four, three. If such student afterwards matriculates as a candidate for the degree of Master of Arts, the graduate courses previously taken by him under this provision may be entered in his curriculum, without special permission, as "already completed."

On final certification by the Dean that all official regulations have been complied with, a candidate shall be recommended to receive the degree of Master of Arts for the satisfactory completion within a period of five years of an approved curriculum.

Master of Laws.—Any student who has been graduated from an approved college or scientific school of collegiate rank, or who has successfully completed three years of undergraduate study in an approved college or scientific school, such course of study including satisfactory courses in Economic and in English and American History, and who has also successfully completed three years of study in an approved law school, and who shall thereafter during one year of residence at Columbia University satisfactorily complete a course of study approved by the Deans of the Faculties of Law and Political Science, shall be entitled to be recommended for the degree of Master of Laws.

SCHOOL OF ARCHITECTURE

Administrative Board (see p. 7)

Delegate to the University council (see page 4)

The School of Architecture of Columbia University is a professional school for men and women designed to train its graduates for the active practice of architecture. Founded in 1881, under the direction of Professor William R. Ware, as a department of the School of Mines (now the Faculty of Applied Science), it was in 1902 made an independent School. It receives two classes of students: (1) Candidates for the degree of Bachelor of Architecture, who must give evidence of having completed the equivalent of two years of academic study in a recognized college (see page 221); (2) candidates for the Professional Certificate of Proficiency, who must pass entrance examinations (see page 221). The curriculum is identical for the two classes and is of indeterminate duration; in general it may be covered in four years.

Beginning with the year 1917-1918 the School of Architecture will admit only one class of students, namely, Candidates for the degree of Bachelor of Architecture. Such students must give evidence of having completed the equivalent of two years of academic study in a recognized college.

Building and Equipment. — In 1912, the School of Architecture took possession of its present quarters in Avery Hall, erected in memory of the late Samuel P. Avery, a benefactor of the University, and of his son, the late Henry O. Avery, an architect, to accommodate the Avery Architectural Library and the School of Architecture. Three floors of the building are occupied by the school.

The Avery Architectural Library, the richest collection of works on architecture and the allied arts in the country, occupies the ground floor of the building, and is open to the public daily from 9 A.M. to 6 P.M. and from 7.30 P.M. to 11 P.M. Its material is available at all times for the purposes of study and illustration in the School.

In addition to this the School possesses, in its own departmental library, a collection of about 18,000 photographs and a number of books chiefly the gift of Mr. F. A. Schermerhorn; a classified library of many thousands of prints and plates, and a large number of original drawings from various sources. The equipment of illustrative material furthermore comprises 10,000 lantern slides of architectural subjects, a fine collection of casts of architectural details, including a large number from ancient and modern Roman buildings, the gift of the late Charles F. McKim and several valuable models of buildings and of structural details. A smaller working library of books of constant reference, plates and periodicals is maintained in conjunction with the drafting rooms on the upper floors.

Occasional exhibitions of both student and graduate work are held by the School of Architecture. The current work of students in residence, illustrating progressive accomplishments during four years, is hung in the corridors of Avery Hall, and in the exhibition room on the fifth floor of the building.

Important collections of sculpture, painting, engraving and the minor arts are shown in the Avery Architectural Library and in addition there are frequent bibliographic and educational exhibitions in the University Library and at Teachers College.

The Willard collection of architectural casts and models in the Metropolitan Museum of Art is open every day and two evenings in the week, and is very useful for illustrating the historic styles. Sketching cards granting certain additional privileges in the Museum are issued to students on request.

The other collections of the Metropolitan Museum of Art and those of the American Museum of Natural History furnish much admirable illustrative material; while the building activity of the city forms a chronicle of architectural progress in design and construction, governmental, domestic, monumental, ecclesiastic, and commercial.

Admission. — Except by special action of the Committee on Admissions, regular students under eighteen are not admitted. For regulations governing admission for the certificate of proficiency and for the regulations for the course for the Bachelor's degree in Architecture (see below).

In general, all courses in the School of Architecture begin in September and run through the year, although the two terms are separately marked. It is therefore extremely difficult to make adequate arrangements for students who wish to enter in February.

Students desiring to enter with credit for courses pursued in other institutions must make application in writing to the Curator of the School of Architecture in time to reach him one month before the entrance examinations. The general regulations as to documents to be submitted and as to the acceptance of certificates are the same as for the Schools of Mines, Engineering, and Chemistry.

Fees (see page 50)

Fellowships and Scholarships (see page 280)

Examinations. — Regular examinations in each course are held at the end of each half-year. All other examinations, except examinations for admission to advanced standing, are special examinations, for which the statutory fee of \$5 is charged (see page 50). For the dates of the various examinations see the academic calendar. Absence from any regular or delinquent examination for which a student is registered is regarded as a failure. A student who fails to attend any mid-year examination will be excluded from the second term in that subject, except for reasons of weight. Those for whom exceptions are made will be required to take the corresponding deficiency examinations during the stated period beginning on the last Monday in March.

Students who do not pass or are debarred from a regular mid-year or final examination must remove such deficiency at the fall delinquent examinations, failing which they must repeat the course concerned. Students will be debarred from examinations for excessive absence from lectures or failure to complete collateral work. They may for the same reasons be excluded from any course at the middle of any term.

Materials and Drawings. — The School will furnish lockers and drafting tables, but it will, under no conditions, furnish boards, paper, mounts or other materials.

All work done in the School, drawings, designs, plates, essays or models, become the property of the School, to be preserved, reproduced, exhibited or returned at its will.

Bachelor of Architecture. — Candidates for admission to this course must give evidence of having successfully completed the equivalent of two years of academic studies in a recognized college. Mathematical studies pursued

in anticipation of those prescribed in the School of Architecture may be included in such collegiate preparation, and students are advised to carry these studies if possible through the Calculus. The required collegiate preparation must include the equivalent of the elementary French used for admission to Columbia College. Candidates must also show a practical knowledge of free-hand drawing.

In the case of studies pursued elsewhere than in a recognized college, and offered by the candidate as an equivalent for any part of the college preparation, the Administrative Board of the School will determine each equivalent upon its merits.

Through the coöperation of the Staff of the School of Architecture and the Committee on Instruction of Columbia College, a program for a combined course of six years has been arranged. Its object is to enable students in Columbia College to begin the study of architecture early in their college course and to obtain unbroken training in this field until they receive the professional degree. Upon completing the fourth year of this curriculum students receive the degree of Bachelor of Arts and at the end of the whole course, the degree of Bachelor of Architecture. The combined course has decided advantages in soundness of preparation and breadth of culture and it is earnestly commended to young men in preparatory schools who look forward to the study of architecture. Copies of this program may be obtained on application to the Curator of the School or to the Dean of Columbia College.

Program of Studies. — A student receives his degree or certificate when he has passed the courses scheduled below.

Courses indicated by odd and even numbers are assigned to first and second terms, respectively. Numbers in parentheses indicate rooms in Avery Hall. Hm. signifies Hamilton Hall.

Students finding conflicts in their schedules should consult the Curator.

SCHOOL OF JOURNALISM

Advisory Board (see page 9)

Administrative Board (see page 7)

Delegate to the University Council (see page 4)

Aims. — The aim of the School of Journalism is to train for and attract to the journalistic profession young men of character and ability, and to help those already engaged in the profession to acquire the highest moral and intellectual training. It is the object of the School to make better journalists, who will make better newspapers, which will better serve the public.

Building. — The building for the use of the School of Journalism is on the southeast corner of Broadway and 116th Street; the external dimensions are 208 feet 8 inches by 55 feet 10 inches, with a height of five stories and basement. The entrance is on the south front, consisting of three doors grouped under a portico of massive columns, and opening into a spacious vestibule, in which are placed medallions of distinguished journalists, a bust of the late Joseph Pulitzer, and a memorial inscription. The vestibule gives access to the administrative offices and a large lecture hall on the main floor; the library and newspaper reading-room are on the next floor; on the upper floors there are smaller lecture-rooms, class-rooms and studies, numbering about thirty in all, and affording a total seating capacity of about 2,200.

Admission. — Candidates for admission to the first year must be at least 17 years of age at entrance, and correspondingly older for advanced standing. A certificate of good moral character must be presented, and, in the case of students from other colleges, of honorable dismissal.

For detailed statement of the requirements, both prescribed and elective, and a description of the ground covered by the examinations (see p. 173).

Advanced Standing. — Candidates for admission to advanced standing, upon the basis of certificates of transfer from other colleges, should fill out the appropriate application blank, to be obtained from the Secretary of the University, and file it with the Director of University Admissions before September 1.

Non-matriculants. — Non-matriculated students may be admitted to the School at the discretion of the Director, if they submit evidence of maturity, experience in professional writing or marked fitness for it. If they take the work prescribed for the degree of Bachelor of Literature for two years and maintain an average grade of B, they may be admitted to advanced standing in candidacy for the degree. Such students are expected to conform to the same standards of attendance and scholarship as are required of matriculated students. Applications should be made before September 1 to the Director of University Admissions on blanks to be obtained from the Secretary of the University.

Language Test. — The ability of students to read a French or German newspaper will be tested on their entrance to professional studies at the beginning of the second year. All students, whether admitted on advanced standing or not, must satisfy this requirement before admission to the B.Lit. degree. In special cases, Spanish or Italian may be substituted with the consent of the Director.

Registration (see page 50)

Fees (see page 50)

Scholarships and Prizes (see page 280)

Program of Study. — The Program of Study for the degree of Bachelor of Literature in Journalism consists of 136 points, each point signifying the satisfactory completion of work requiring attendance one hour a week for one half-year. For significance of course numbers see page 61.

Candidates for the degree who wish to specialize in some branch of journalism or to continue particular subjects will be allowed to substitute courses of equivalent credit for any of those given below on submission to the Director of an approved program before May 1. In preparing such a program they will have the assistance and advice of the members of the staff of the School.

Subject to the foregoing regulations, the satisfactory completion of the following courses, together with the language test above mentioned, is required for the B.Lit. degree.

A.B. or B.S. Combined with B.Lit. — Students who can afford the time are strongly recommended to take the five-year course (A.B. or B.S. combined with B.Lit.). The degree of A.B. or B.S. may be obtained under this arrangement after completing four years' work and the degree of B.Lit. after five.

Stenography and Typewriting. — Courses in stenography and typewriting are provided in Extension Teaching and students are advised to acquire both as soon as they can. All professional exercises must be submitted in type-written form after the first half-year of the School Course.

Admission of Women. — The first two years of the curriculum are offered for duly qualified women students at Barnard College; the professional courses of the third and fourth years will be given in the School building and will be open to women on the same conditions as to men.

¹ May be taken for graduate credit.

General Statement. — In 1883 the Trustees of Columbia College offered degrees to women who should be able to pass the necessary examinations, without, however, providing instruction for them. The resulting system, called The Collegiate Course for Women, proved unsatisfactory to both parties. Barnard College was therefore organized in 1889 to provide instruction for women which should be identical with or equivalent to that provided by Columbia for men.

For eleven years it duplicated for women as far as possible the curriculum of Columbia College, and also registered for graduate work under the University Faculties women who held the bachelor's degree from institutions of good standing. Its instructors were members of the University staff. Examina-

tions for entrance, those given in course, and those for degrees, were conducted by Columbia University. During the first three undergraduate years separate instruction was given to women; in the senior year they were admitted to certain courses in the University. Graduate students attended many courses at the University under the Faculties of Philosophy, Political Science, and Pure Science, the laboratory work in science being done at Barnard College.

The numerical growth of Barnard College made inappropriate, however, the informal arrangement for instruction which was the natural method at the outset, and it became necessary to recognize formally the status which had gradually come into existence. An agreement was accordingly entered into in January, 1900, by which Barnard was included in the University system. Barnard is now an independent college for women with a corporation and a faculty of its own vested with all the powers commonly belonging to such bodies. At the same time, it shares the library, the instruction, and the degrees of Columbia University.

A more exact idea of the relations between Barnard College and Columbia University and also of the relations between Barnard College and Teachers College is to be found in the current *Announcement of Barnard College*. This may be obtained without charge upon application to the Secretary of Barnard College.

Admission. — In addition to the requirements for admission (see page 173), the following has been adopted by Barnard College:

In September, 1915, and thereafter all candidates for admission to the A.B. and B.S. courses at Barnard College, except those who offer the complete elementary requirements in both Latin and Greek, will be required to offer at least three (3) units in modern foreign languages. To meet this requirement a student may offer Elementary and Intermediate French, or Elementary and Intermediate German, or the elementary examinations in any two of the following modern languages: French, German, Italian, Spanish. (For the change in the modern language requirement in college work see page 178.)

Probation. — A candidate for admission who has not secured the prescribed 15 units may be admitted to the freshman class with conditions, if in the judgment of the Committee on Admissions she is qualified to undertake the work of the class. General deficiency in any prescribed subject will disqualify for admission. Except for reasons of weight, a student who has failed to complete a course in a good high school or preparatory school will not be admitted with conditions.

A student admitted conditionally or by credentials from another college or from the State Education Department will be held under probation during the first half-year of residence. For a detailed statement regarding the conditions of probation, see the current *Announcement of Barnard College*.

Advanced Standing. — See the "Requirements for Admission to Advanced Standing in Columbia College," page 173.

In addition, the credits granted in any subject to a student admitted with advanced standing may be withdrawn or diminished in amount, if, in pursuing such subject after admission to Barnard College, the student proves that the granting of the credits was wholly or in part unwarranted by her previous work.

No student may receive a degree who has resided less than two full half-years at Barnard College.

No applicant will be allowed to enter the senior class as a candidate for a degree after October 15 in any year.

Special Students. — Candidates for admission as special students must make application in writing at least one week before the first day of the entrance examinations in September or in January. Proper blanks for this purpose may be obtained from the Secretary.

Special students in Barnard College are of two classes: matriculated and non-matriculated.

Matriculated special students are women who wish, without taking a degree, to make a serious study of some subject or group of subjects. They must pass the regular examinations for admission to the freshman class and have full credit for fifteen (15) units of the entrance requirements. (See page 173.) They may, therefore, in event of a change of plan be credited with such of their courses as may coincide with the courses leading to a degree.

Non-matriculated special students must be women of mature age who wish to pursue chiefly advanced courses of special study. They may be admitted at the discretion of the Committee on Admissions without passing formal entrance examinations; but must furnish proof that they have at some time pursued the studies included in the matriculation examinations and must satisfy the requirements of the department that they desire to enter. Candidates desiring to pursue merely elementary courses, as in languages, etc., will not be admitted as non-matriculated special students. Ordinarily no work done by a non-matriculated special student may count toward a degree.

Information regarding the regulations governing the election of studies, amount of work, attendance, examinations, etc., of special students is contained in the current *Announcement of Barnard College*.

Matriculation, Registration, Fees. — Detailed information regarding matriculation, registration, and fees will be found in the current *Announcement of Barnard College*.

Dormitory (see page 58)

Program of Studies. — Upon completion of a curriculum arranged on one of the plans to be described below, the student is recommended by the Faculty of Barnard College for the degree of Bachelor of Arts or Bachelor of Science.

Bachelor of Arts. — Unless the equivalents are offered for admission, the following courses are prescribed:

English A and B.....	12 points
History A.....	6 "
Latin A or Greek 5-6.....	6 "
Mathematics A.....	6 "
Modern Languages (see below)	
Philosophy A ¹	6 "
Physical Education A and B.....	4 "
Economics A.....	6 "
Chemistry 5-6 or Physics 1-2.....	6 "
Botany, Chemistry, Geology, Physics, Psychology (Experimental), or Zoölogy: two half-year courses in addition to Physics 1-2 or Chemistry 5-6 or any course in science that may have been offered for admission.....	6 "
Major subject.....	18 "
Free electives to complete the total of.....	124 "

¹ Or, on recommendation of the department, Philosophy, 61-62.

No modern language course in college is prescribed for the degrees of Bachelor of Arts and Bachelor of Science. Before being registered as seniors, all students, except those who have offered the complete requirement in Elementary Greek at entrance or who have taken Greek 1-2 and 3 in college, must satisfy the departments of Romance Languages and Germanic Languages that they have a working knowledge of French and German. In special cases, with the consent of the Committee on Instruction, Spanish or Italian may be substituted for French.

As a rule, the departmental test will take the form of an oral examination in translation at sight. It may be taken at any time during the college course and must be taken before May 1 of the junior year.

A student who offers the complete requirement in Elementary Greek at entrance or who takes Greek 1-2 and 3 in college will be obliged to stand the test in only one of the modern languages.

Students whose preparation in a modern language is inadequate for this test should elect, under the advice of the department, special courses that are designed to prepare for this examination.

Bachelor of Science. — Unless the equivalents are offered for admission, the following courses are prescribed:

English A and B	12 points
History A	6 "
Mathematics A	6 "
Modern Languages (see above)	
Philosophy A ¹	6 "
Physical Education A and B	4 "
Grouped work in science amounting to at least	70 "
which must include:	

A major subject of at least 28 points in one of the following natural sciences: Astronomy, Botany, Chemistry, Geography, Geology, Mineralogy, Physics, Experimental Psychology, and Zoölogy, or in Mathematics: and

Two minors of at least 12 points each, one in a subject allied to the major and one in a diverse subject, both to be chosen from the foregoing list with the addition of Anthropology, which should, as a rule, be taken only in connection with Botany or Zoölogy as a major.

Free electives to complete the total of..... 124 "

Two Years' Course. — This general course, which does not lead to a Barnard degree, is designed to furnish the collegiate foundation for professional work in other schools of the University. It comprises from 62 to 74 points of work. The courses prescribed depend upon whether the candidate intends to transfer to the School of Architecture, School of Practical Arts, or the School of Journalism. Full particulars will be found in the announcements of Barnard College and the professional schools concerned.

University Courses. — Certain courses in the School of Architecture and the Department of Music and in Teachers College are open to regular students registered in Barnard College. Certain graduate courses in Columbia Univer-

¹ Or, on recommendation of the department, Philosophy, 61-62.

sity under the Faculties of Political Science, Philosophy, Pure Science and Education, and other courses in the Union Theological Seminary and the New York School of Philanthropy are open to specially qualified Barnard seniors.

After two years of collegiate work in Barnard a student may transfer without examination to the School of Architecture as a candidate for the degree of Bachelor of Architecture, to Teachers College as a candidate for the degree of Bachelor of Science in Practical Arts, or to the School of Journalism as a candidate for the degree of Bachelor of Literature.

Detailed information in regard to these opportunities will be found in the announcements of Barnard College and the other schools concerned.

Delegates to the University Council (see page 4)

General Statement. — Teachers College, founded in 1888, and chartered by the regents of the University of the State of New York in 1889, became, in 1898, a part of the educational system of Columbia University. The President of Columbia University is President, *ex-officio*, of Teachers College and the College is represented in the University Council by its Dean and representatives elected from its two Faculties. The College meanwhile maintains its separate corporate organization, and its Board of Trustees continues to assume entire financial responsibility for its maintenance. In 1912 the Trustees reorganized the faculty of Teachers College, establishing a Faculty of Education and a Faculty of Practical Arts. By this reorganization Teachers College now consists of two Schools, the School of Education and the School of Practical Arts.

The buildings of Teachers College occupy the block directly north of the University Campus, bounded by 120th and 121st Streets, Amsterdam Avenue, and Broadway.

The Main Building, containing equipment for administration and instruction, and the Bryson Library — the educational library of the University — is adjoined by the Milbank Memorial Building, housing a number of academic and technical departments and containing the Memorial Chapel; by the Macy Manual Arts Building, with its exceptional equipment for work in Fine Arts

and Industrial Arts; and by the Household Arts Building. The Frederick Ferris Thompson Memorial Building for the department of Physical Education connects the Milbank Building on the west with the building of the Horace Mann School. On the east of it is Whittier Hall, the residence for the women students of the College. The building of the Speyer School is a short distance north of the College, on Lawrence Street, near Amsterdam Avenue.

School of Education. — The School of Education affords opportunity for the advanced study of educational psychology and sociology, the history and philosophy of education, educational administration, and the various aspects of secondary, elementary, and kindergarten education. It also provides professional training, both theoretical and practical, for teachers of both sexes for secondary, grammar, and primary schools, and kindergartens; and the preparation of advanced students for work as principals, supervisors, and superintendents of schools; as heads of academic or educational departments in normal and teachers' training schools, and of educational departments in colleges and universities. The School of Education is thus a professional school of Columbia University for the study of education and the training of teachers, taking academic rank with the Schools of Law, Medicine, Mines, Engineering, and Chemistry.

New Requirements. — Since July 1, 1914, the School of Education has been organized on a graduate basis offering only graduate curricula for advanced students leading to the Teachers College diplomas in teaching and to the degrees of Master of Arts and Doctor of Philosophy with a major subject in education. Such curricula provide work in educational psychology, the history and the philosophy of education, educational sociology, educational administration, secondary education, elementary education, and in research in the methods of teaching the various academic subjects, supplemented by courses in other parts of the University. Teachers College diplomas are awarded to those who demonstrate professional fitness as instructors in Education in colleges and universities, as supervisors, principals, and superintendents of schools of all grades, as heads of academic or education departments in normal and teachers' training schools, and as teachers in secondary schools. Courses in education may also be counted as minor subjects toward the advanced degrees, by students primarily registered in some other part of the University.

The Horace Mann Schools and the Speyer School, maintained by Teachers College as schools of observation and experiment, include kindergarten, elementary, and secondary classes and neighborhood work, and offer exceptional advantages for the study of the practical work of teaching and for the investigation of educational problems. These schools have now an attendance of some thirteen hundred pupils.

School of Practical Arts. — The School of Practical Arts was established to provide in the University system a new type of collegiate education, uniting liberal with technical training, and to prepare special teachers of such technical subjects as household arts, industrial arts, fine arts, music, physical education, and nursing.

The School offers to both men and women, who have completed a secondary school course, a program of study four years in length, equivalent in standards of admission and graduation to the traditional college course in letters and science. It includes in its program general cultural subjects, by which any particular curriculum may be enriched and extended, and offers,

therewith, a broad and generous technical training, based on adequate instruction in science or the arts by which the student may receive a high type of vocational preparation in the varied fields falling within the scope of the School — in industrial arts, household arts, dietetics, institutional work, public health, fine arts, the art industries, music, and physical training.

The School of Practical Arts is organized as a School of full University grade, parallel to the Colleges of the University; it enjoys all the privileges of University membership, and its graduates receive the credentials of the University.

Admission. — Students holding a diploma of graduation from an approved high or secondary school are admitted to the School of Practical Arts on certificate from the principal, provided the high-school course has covered four years' work and has included certain fundamental courses in English, history or foreign languages, and mathematics or science.¹ Application for admission should be made as far in advance of the desired time of entrance as is practicable, and must include statements from responsible persons that the candidate possesses the qualities of health, character, scholarship, and serious purpose required for successful work in the School of Practical Arts. The application should be made on a blank form which will be sent on request. Candidates, similarly vouched for, may also be admitted on examination of the College Entrance Examination Board or the University Committee on Admissions of Columbia University, or on credentials from the Department of Education of the State of New York.

The School reserves the right to restrict admission to the freshman year to the number of one hundred and fifty, and to select these according to merit.

Advanced standing may be granted to students who have completed, in a college, technical school, normal school or training school, courses in advance of high-school graduation. An application for admission to advanced standing should be made on a blank form which will be sent on request. For further information in reference to the requirements for admission see page 173.

Program. — The courses of study leading to the bachelor's degree occupy four years of work (124 points), for which the usual secondary school education is a required preparation. During the four years of study, approximately one-third of the student's time must be spent in general academic subjects (45 points), approximately one-third in technical subjects and technical training (45 points); the remainder (except for four required points in hygiene and physical training) of the 124 points needed for the degree must be distributed, according to the needs of the student, in either the general or the technical field. The program of study thus requires of all students a certain amount of fundamental general training in academic studies, but allows a freedom of election beyond the minimum requirements; it offers freedom of election in the choice of a group of studies of major interest, but requires systematic and progressive study in the group elected. A two-year professional curriculum leading to the degree of Bachelor of Science in Education and preparing for teaching the Practical Arts is also offered to students who enter with two years of professional, technical, or collegiate training beyond high school. For detailed information, see the *Current Announcement of the School of Practical Arts*, which may be had from the Secretary of the University.

Degree and Certificates. — The successful completion of the four years' course of study is recognized by the conferring by Columbia University of the

degree of Bachelor of Science in Practical Arts or Bachelor of Science in Education.

Matriculated students who may be admitted to pursue a more limited course of vocational training, of at least two years, may receive a Departmental Certificate from the School.

Graduate students in the field of practical arts are received into the various departments of Teachers College as candidates for the degree of Master of Arts or Doctor of Philosophy.

Delegates to the University Council (see page 4)

General Statement. — The College of Pharmacy of the City of New York, founded in 1829, chartered in 1831, and recognized in 1879 by the Regents as part of the University of the State of New York, became a member of the educational system of Columbia University on July 1, 1904. The President of the University is *ex-officio* President of the College of Pharmacy, and the College is represented in the University Council by its Dean, who is appointed by the Trustees of the College of Pharmacy on the nomination of the President. The College, however, maintains its separate corporate organization, and its Trustees continue to provide for its financial support.

The College is situated at 115 West 68th Street, near Columbus Avenue, in an especially well-equipped building erected in 1894.

The College of Pharmacy is thus the professional school of Columbia University for Pharmacists, Pharmaceutical Chemists, Bachelors of Science in Pharmacy and Doctors of Pharmacy and, as well, a valuable addition to the University's resources for teaching and research in botany, chemistry, and materia medica.

Admission. — Candidates for admission will be examined either at the Regents' examination, or at the January and September entrance examinations of Columbia University, or of the College Entrance Examination Board, held in June of each year (see page 173).

College Course. — The College Course of two years, leading to the degree of Graduate in Pharmacy is open only to persons holding the Qualifying Certificate for a Pharmacy Student, granted by the State Education Department for 15 Regents' counts or their equivalent.

University Course. — The University Course of three years, leading to the degree of Pharmaceutical Chemist is open only to persons who have completed a four-year course in a registered high school or who have passed the Entrance Examinations of Columbia University or of the College Entrance Examination Board.

¹ Absent on leave Spring Session

Graduate Course. — The Graduate Course, leading in one year to the degree of Bachelor of Science in Pharmacy and in three years to the degree of Doctor of Pharmacy, is open to pharmaceutical chemists of this or other schools of equal grade or those holding equivalent degrees.

Food and Drug Course. — The Food and Drug Course is open to all graduates of this College, and to others whose training has qualified them to perform the necessary work.

Program of Study. — 1. A College Course, consisting of a junior and senior year, leading to the degree of Graduate in Pharmacy, conferred by the College independently of the University, and qualifying the graduate to meet any examination for the position of licensed pharmacist.

The work undertaken is as follows: Junior year: physics, general and pharmaceutical chemistry, analytical chemistry, practical pharmacy, dispensing pharmacy, botany, pharmacognosy, physiology, toxicology, and pharmaceutical accounting. Senior year: organic chemistry, inorganic and organic pharmaceutical chemistry and analytical chemistry, practical pharmacy, dispensing pharmacy, materia medica, toxicology, macroscopical pharmacognosy, microscopical pharmacognosy.

2. A University Course of three years leading to the degree of Pharmaceutical Chemist, conferred by the University. The work undertaken in this course differs from that of the College Course in being of a somewhat more advanced character, and in being pursued through the full academic year. It includes instruction in general biology and a laboratory course in physics, in addition to the studies of the College Course.

3. A third or Graduate Course leading to the degrees of Bachelor of Science in Pharmacy and Doctor of Pharmacy.

Beginning with the session of 1915-1916, the Graduate course of this College, leading to the degrees of Bachelor of Science in Pharmacy, and Doctor of Pharmacy, have been based on the degree of Pharmaceutical Chemist or an equivalent degree, conferred for at least three years' work of not less than 600 hours each, following high school graduation.

The work of the Graduate Course, occupying three days weekly, covers three years of not less than 600 hours each. At the end of the first year successful candidates will receive the degree of Bachelor of Science in Pharmacy, and at the end of the course that of Doctor of Pharmacy.

The purpose of this course is the training of men and women for the higher duties of pharmaceutical and allied service, such as pharmaceutical and commercial analysis, food and drug inspection and commissionship, health board

This baccalaureate degree, secured on equal terms with that conferred in other professions, confers equal privileges therewith, except as to the number of units of work performed. A holder of this degree desiring to transfer his activities to another profession, or to study for a higher degree, will be credited in such course with the number of units pertaining to his Bachelor of Science in Pharmacy Course, and his standing, up to this point, is the same as that secured in other baccalaureate departments.

4. A course of one year in the microscopical and chemical analysis of food and drugs. A Summer Preparatory Course of twelve weeks is provided for those who, for any reason, require training in special subjects as a preparation for the Food and Drug Course.

Evening courses of instruction are offered for the benefit of special students, and for any of our regular students who for any reason may desire the instruction. These courses cannot, at least for the present, take the place of any

instruction of the regular course, leading to any of our degrees. Certificates will be awarded to those who successfully pursue these evening courses.

6. A number of special courses of instruction have also been established partly for the benefit of those regular students who desire, for any reason, to specialize in certain lines of work, and partly to provide instruction in individual departments for those who do not desire to take the full course. Certificates, but not diplomas, are awarded to such students. These special courses of instruction are in pharmacognosy, chemical analysis, advanced inorganic and organic chemistry, and practical pharmacy.

Method. — During the junior and senior years the instruction occupies three days of the week, the alternate days being free for practical experience in the pharmacy. This arrangement provides a means of paying the expenses of a majority of students.

Many students, under the advice of the Faculty, prefer to devote the entire time of the second year to college work. For those so desiring, additional instruction is provided.

In addition to lectures and laboratory work a series of recitations or quizzes, by a corps of qualified instructors, is given to the classes, in small sections.

¹ The registration by years in Columbia College is according to the technical classification, deficient students being required to register with a class lower than that to which they would normally belong.

² The total 2074, does not include 91 college graduates, in Law (62), Medicine (3), Applied Science (21), Architecture (2), and Journalism (3), who are also candidates for the degree of A.M. or Ph.D. It likewise does not include 868 candidates for the higher degrees enrolled in the Summer Session who did not return in either of the succeeding half-years. For classification by faculties see Table IV.

³ Exclusive of college students also registered under the professional faculties (in the exercise of a professional option), as follows: 8 Seniors in the Schools of Mines, Engineering, and Chemistry (Faculty of Applied Science); 29 Seniors in the School of Law; 27 Juniors and 17 Seniors in the School of Medicine; 4 Seniors in Teachers College; 2 Juniors and 3 Seniors in the School of Architecture; 1 Senior in the School of Journalism.

⁴ Of the total, 612 are Teachers College students, 548 enrolled in the Faculty of Philosophy as candidates for the higher degrees (287 men and 261 women) and 64 special non-candidates (22 men and 42 women); 19 are Columbia College students who graduated in February and subsequently enrolled in some other school of the University, and 20 are students who transferred during the year from one school of the University to another.

⁵ Summer Session students who returned for work at the University.

⁶ Attendance at the University (excluding 761 matriculated students and 187 students also registered in the Summer Session) 2463; attending away from the University, 842.

⁷ In the School of Education 75 and in the School of Practical Arts 1758.

SUMMER SESSION

General Statement. — The sixteenth Summer Session of the University opened July 6, 1915, and closed August 13. The registration days for the Summer Session were July 2, 3, and 5. Examinations were held on August 13.

Courses were offered to men and women on equal terms in agriculture, anthropology, architecture, assaying, astronomy, biology, bookkeeping, and accounting, botany, chemistry, comparative philology, commercial arithmetic, classical archæology, corporation finance, folk Latin, domestic art, domestic science, economics, education, elocution, engineering, English, fine arts, freehand drawing, French, geography, geology, German, German for medical students, Greek, history, history of religion, household arts, industrial arts, Italian, kindergarten, Latin, law, library economy, manual training, mathematics, mechanical drawing, mechanics, medicine, metallurgy, mineralogy, music, philosophy, physical education, physical geography, physics, physiology, politics and public law, psychology, public speaking, religion, Romance languages, Russian, social science, Spanish, stenography and typewriting, and zoölogy.

Evening courses were also offered in the following subjects: bookkeeping, commercial arithmetic, economics, English, French, German, mathematics, mineralogy, Portuguese, Spanish, stenography and typewriting.

Each course consisted of thirty-one lectures or other exercises, or their equivalent in laboratory or field work. Credit for such courses in the Summer Session as are accepted by the several Faculties of the University in partial fulfilment of the requirements for degrees, or for diplomas in teaching, is given upon the satisfactory completion of the course, including the final examination.

Fees (see page 51)

The tuition fee for the Summer Session is estimated on the basis of \$6 per point. Each student is required to register for a program of at least four points. In addition to this fee the student is charged a University fee of \$5, so that the minimum tuition for attendance at the Summer Session is \$29.

For the current *Announcement* of the Summer Session which will open July 10 and offer a wide range of courses, or for information regarding dormitory accommodations, or board and lodging, address the Secretary of Columbia University, New York.

Registration 1915. — Copies of the separately printed *Directory of the Summer Session, 1915*, may be had upon the payment of twenty-five cents, plus postage. Application should be made to the Secretary of the University. In this catalogue, at the close of the Register of Students under each Faculty, will be found a list of the Summer Session students of 1915 who matriculated under that Faculty, but who did not return to register in September.

EXTENSION TEACHING

General Statement. — The statutes of the University define Extension Teaching as instruction given by University officers and under the administrative supervision and control of the University, either away from the University buildings or at the University, for the benefit of students unable to attend the regular courses of instruction.

Students. — Courses in Extension Teaching are planned for two classes of students: (1) men and women who can give only a portion of their time to study and who desire to pursue subjects included in a liberal education of the character and grade of a college or professional school, but without any reference to an academic degree; (2) those who look forward to qualifying themselves to obtain in the future academic recognition, involving acceptance of the work which they may satisfactorily complete in Extension Teaching.

Students who are duly admitted to Extension courses but are not candidates for a degree or diploma are termed non-matriculated students. Students who have completed the requirements for admission and have been formally admitted by or in behalf of the Faculty concerned as candidates for a degree or diploma are termed matriculated students.

Courses of Instruction. — Under the direction of the University Council courses are offered in Extension Teaching which count toward the degree of Master of Arts.

Regular courses of instruction are offered in Extension Teaching which, in many instances, are coördinated so as to form at least the first years of collegiate and professional work, thus providing in the evening at Morningside Heights, and elsewhere, courses in subjects which are generally offered in the Freshman, Sophomore and Junior years of college, so that students may qualify themselves for admission with advanced standing to Columbia College and Barnard College or other institutions as candidates for the degrees of Bachelor of Arts and Bachelor of Science.

There are also offered at Morningside Heights in the evening subjects which are required of students in the Schools of Mines, Engineering and Chemistry, so that a student may pursue some special line of scientific study or prepare himself for advanced study in these schools. Courses in these schools are open only to those who have had a preliminary course of three years in Columbia College or the equivalent. This preliminary collegiate course may be taken in part or in full in Extension Teaching in the evening by students engaged in business during the day.

Evening courses are offered in architecture at Morningside Heights which correspond to the courses of the Columbia University School of Architecture.

Day and evening courses in commerce, accounts, and finance, forming a three-year course leading to a certificate in commerce and preparing for the State examination for the certificate of Certified Public Accountant, are given at Morningside Heights.

A series of courses intended to equip students for the position of secretary is also offered. The completion of these courses require three years for high school graduates and at least one year for college graduates.

Many courses are offered which aid a student to prepare for the Schools of Law, Medicine and Journalism or to complete his preparation for Columbia College.

A two-year course in practical optics is offered in coöperation with the Department of Physics for the special training of those who expect to become optometrists.

Courses are offered in agriculture for those who desire special work in that subject.

A large number of other courses in varied subjects is given late in the afternoon and on Saturday which repeat those in liberal studies offered in the Colleges of the University. These are given in the same manner and often by the same instructors as the regular courses. In many instances university credit is granted.

Numerous courses are given at various centres. These are either regular courses of collegiate grade or short lecture courses without academic credit.

Lecture-study courses in certain subjects forming fifteen or thirty lectures alternating with quiz or conference hours are given at Morningside Heights and at centres when requested.

Centres for the study of choral music are maintained at Morningside Heights, and Brooklyn, and choral concerts are given during the year.

Registration. — Students who expect to attend at Morningside Heights are required to register at the office of the Registrar, University Hall. A student in Extension Teaching registers for one half-year and is required to renew his registration in person at the beginning of the second half-year.

Matriculated students in the various schools of the University will be allowed to attend courses in Extension Teaching in accordance with the regulations of the several schools; they must, however, register and pay the fees in the same way as other students in Extension courses.

Fees. — All students, matriculated or non-matriculated, admitted to Extension courses, must pay at the time of registration the fees determined by the Administrative Board. The fees for Extension courses are determined, as a rule, at the rate of \$6 per point, *i.e.*, for one hour per week of class-room work, or two hours of laboratory or drawing-room work, through a half-year. All Extension students must pay a University fee of \$5 for each year or any part thereof. Students taking six points each half-year have the privileges of the Library and, in the case of men, the University Gymnasium. The privilege of residence in the dormitories is limited in the case of Extension Teaching men students to those in good standing pursuing programs aggregating not less than ten points each half-year. Women students in Extension Teaching may reside in Whittier Hall under certain conditions determined by the amount of work taken.

Courses in Extension Teaching, approved by the Committees on Instruction in Columbia, Barnard and Teachers Colleges are credited for matriculated students toward the degrees of A.B. and B.S., toward the diplomas in Teachers College, and toward degrees in other professional schools in accordance with the regulations established by the various faculties. The credit given for the various courses will be found in the *Announcement of Extension Teaching*.

Courses in Extension Teaching, approved by the Executive Committee of the University Council, will count toward the degree of Master of Arts.

Admission. — No examination is required for admission to courses offered in Extension Teaching but students must satisfy the instructors concerned that they can pursue the courses with advantage. It is expected that prospective students in all collegiate and professional courses shall have had a full secondary school education. The courses are open, unless it is otherwise stated, both to men and women.

Location. — Collegiate and professional courses will be given at Columbia University, 116th Street and Broadway; Mount Vernon, N.Y. (60 South Third Avenue); Stamford (High School); Bridgeport (Shelton School); Jersey City (William L. Dickinson High School); Paterson (Paterson High School); Passaic (Passaic High School); Trenton (School Administration Building); and wherever classes of sufficient numbers may be gathered.

For detailed information as to the places and hours for these courses, the qualifications for admission, the regulations for registration, candidacy for degrees, diplomas, attendance, and examinations, the fees prescribed, and for a statement of each course offered, see the current *Announcement of Extension Teaching*, which may be obtained without charge upon application to the Secretary of the University.

Institute of Arts and Sciences. — The Institute of Arts and Sciences is a division of the Department of Extension Teaching. The aim of the Institute is to provide a popular late afternoon and evening program consisting of university extension lectures, addresses and other events of a cultural nature.

The program is planned for busy men and women. The scope includes single lectures and short series of lectures on history, literature, art, music, geography, science and on current economics and social problems; it comprises also illustrated travel lectures, recitals, dramatic readings and vocal and instrumental as well as chamber music concerts.

The annual dues are \$10 payable in advance with an enrollment fee of \$5 payable only once provided the enrollment does not lapse.

A member of the Institute will be entitled to admission for himself and one other person to all the lectures and other events on the regular evening program, but in the afternoon only one person will be admitted on the ticket. The ticket will be transferable. Altogether the membership tickets will include admission to approximately 250 lectures, readings, recitals, etc., throughout the season. A member will be entitled also to reduced rates for reserved seats to the special or more costly events offered in addition to the regular events. The program will continue from October to April.

A special pamphlet describing in detail the program of the Institute will be mailed upon request.

FELLOWSHIPS, SCHOLARSHIPS, AND OTHER PROVISION FOR THE ASSISTANCE AND REWARD OF STUDENTS

(For awards see page 296)

NOTE. Unless otherwise provided, all stipends of Fellows and Scholars are paid in equal semi-annual instalments on the second Wednesday of each half-year. Before being entitled to receive the instalment of his stipend, each Fellow and Scholar is required to report himself in writing to the Registrar as in residence, on or before the opening day of each half-year. Failure so to report may operate to vacate the Fellowship or Scholarship.

Fellows and Scholars are required to pay the University, tuition, and degree fees, as they are prescribed by the Statutes.

General Regulations

The following regulations apply, unless the contrary is specifically stated, to the award of all fellowships and scholarships:

In each case application in writing, on a blank prepared for the purpose, must be filed with the Secretary of the University; for fellowships and University scholarships on or before March 1, for other scholarships on or before May 1. Applications and documents received in support thereof later than these dates, or not distinctly indicating the name of the candidate and the fellowship or scholarship for which he applies, may fail of consideration. As an evidence of graduation, a printed certificate is preferable to the formal diploma itself, as there is risk that the latter may be lost or injured in transit.

The appointment is in each case for one year dating from July 1. Candidates will be notified as promptly as possible as to the success of their applications. If the applicant wishes the documents which he has submitted returned to him by mail he should enclose postage for the purpose, otherwise they will be held until called for. Documents will not be preserved for more than one year from the date of application.

All Fellows and Scholars, except, as hereinafter provided, shall reside in New York City or its vicinity during the academic year, unless permission be granted to study elsewhere. No Fellow or University Scholar may pursue a professional or technical course of study during his term.

The conditions under which the appointment may be granted are indicated in the following paragraphs:

University Fellowships

Twelve fellowships, known as "University Fellowships," of the value of \$500, and in addition thereto the sum of \$150, or so much thereof as is necessary to pay the University and tuition fees, are awarded annually by the University Council at its stated meeting in April, to those graduates of colleges and scientific schools, not over thirty years of age, who show themselves especially fitted to pursue courses of higher study and original investigation. The candidate must give evidence:

(a) of a liberal education, such as a diploma from a college or scientific school of good repute;

(b) of decided fitness for a special line of study such as an example of some scientific or literary work already performed;

(c) of upright character, such as a testimonial from some instructor.

A Fellow may be reappointed for reasons of weight, but not for more than two terms of one year each. Vacancies will be filled in the same manner in which original appointments are made.

These fellowships are awarded as honors, and those who are so disposed, for the benefit of others or for any other reason, to waive the pecuniary emolument, may do so, and still have their names retained on the list of Fellows. In such cases additional University Fellows may be appointed. Each Fellow is expected to perform such duties as may be allotted to him in connection with a course of study leading to the degree of Doctor of Philosophy. He is expected to devote his time to the prosecution of special studies under the direction of the department in which his major subject lies, and before the close of the academic year to give evidence of progress by the preparation of a thesis, the completion of a research, the delivery of a lecture, or by some other approved method. No Fellow shall be allowed to accept remunerative employment or to give instruction or assistance in any department of the University except by permission of the President, and the acceptance of any such employment, without such permission, shall operate to vacate the fellowship.

Special Fellowships

Unless otherwise specified, the regulations as to the mode of application for the following fellowships, and the conditions governing their award and tenure, are the same as those for University fellowships. Candidates should indicate clearly upon their application blanks the fellowship for which they are applicants.

Adams. — The Ernest Kempton Adams Research Fellowship, founded by Edward Dean Adams, in memory of his son, Ernest Kempton Adams, E.E. '97, A.M. '98, is of an annual value of \$1250. The appointment may be made from among the teaching staff, alumni, or students of the University. The incumbent shall prosecute researches either at Columbia or elsewhere, in the physical sciences, in psychology, or in their practical applications. The results of these investigations are published and distributed by the University under the title of "Researches of the Ernest Kempton Adams Research Fellows of Columbia University."

Alumni Association (Medicine). — Provision is made annually by the Alumni Association of the College of Physicians and Surgeons for a fellowship, tenable for one year and of an annual value of \$650, open to graduates who have shown special aptitude for scientific research in the Department of Pathology. Appointments are made upon the nomination of the Executive Committee of the Alumni Association from candidates presented by the Professor of Pathology. Incumbents of this fellowship are expected to devote themselves to scientific research either at Columbia, where they enjoy free tuition and the privileges of the laboratories, or in other institutions either here or abroad at their own expense, and at the end of the year's work to present to the Association a thesis containing evidence of independent or original work.

Archæology. — The University maintains an annual fellowship in the International School of American Archæology and Ethnology in Mexico.

Barnard. — The Barnard Fellowship for Encouraging Scientific Research, endowed by the bequest of the late President Barnard, and of the annual value of \$412.50, is awarded upon the joint recommendation of the Faculties of Columbia College, Applied Science, and Pure Science to a graduate of any one

of them who, having shown decided aptness for physical investigation, is disposed to devote himself for some years continuously thereto. The appointment is for the term of one year, but the incumbent shall be eligible to reappointment. It is the duty of a Barnard Fellow to devote himself to the investigation of some subject in physical science at this University, or at some other in this country or abroad, under the supervision of some known physicist approved by the Department of Physics. He shall make a report certified to by the physicist superintending and directing him, giving an account of the work in which he has been engaged.

Bridgham. — The Samuel Willard Bridgham Fellowship is awarded annually by the University Council on the recommendation of the Faculty of Applied Science, in accordance with the usual regulations governing University Fellowships. The Fellow is entitled to receive the net annual income of the capital sum of the Samuel Willard Bridgham Fellowship Fund, amounting to \$20,000.

Class of '70. — The "Class of '70 Fellowship" has an annual value of \$500. It is filled by the University Council, subject to such regulations as may be prescribed.

Columbia. — The Columbia Fellowship in Architecture, established in recognition of the gifts of F. Augustus Schermerhorn, E.M. '68, to the School of Architecture, is open every third year, beginning with 1915-16, to all graduates of the School within the three years following graduation and to all matriculated students who have completed the requirements for the Thesis. The Fellow is entitled to receive the net income accruing during a period of three years of the endowment fund of \$13,000. The holder of the fellowship is required to devote the income thereof to foreign study and travel in accordance with plans approved by the School of Architecture.

Curtis. — The George William Curtis Fellowship is awarded for a term of two years upon the recommendation of the Faculty of Political Science in every third year, the next award being for 1916-17. The Curtis Fellow is entitled to receive the net income of the endowment of \$10,000, accruing during a period of three years, and proportionately for any part of the term. Candidates shall submit an essay or address on the "Immediate Duty of the American Citizen." The Fellow shall devote himself to the study of the science of government, with a special view to its application to the then existing condition of the United States or to the State or City of New York; and at or before the conclusion of his second year he shall publish (a) a monograph satisfactory to the Faculty of Political Science on some subject relating thereto, and (b) a brief sketch of George William Curtis as a citizen and orator, showing that he has familiarized himself with the life and character of the man whose memory is to be perpetuated by the fellowship which he has enjoyed.

Cutting. — The William Bayard Cutting Traveling Fellowships, founded by Mrs. William Bayard Cutting, in memory of her husband, William Bayard Cutting, LL.B. '71, A.M. '72, are awarded annually by the Trustees to graduate students who have given evidence of ability to make contributions of value to letters, science, law, medicine, or the fine arts. The fellowships are open to men who have been in residence as graduate students and candidates for a higher degree under the Faculties of Political Science, Philosophy, or Pure Science, for at least one academic year, and to graduates of Columbia University in Law, Medicine, Applied Science, or the Fine Arts who have had at least one year of additional study as graduate students in the University. In addition, not more than two members of the senior or graduating class in

Columbia College may be appointed to such fellowships in any one year. Holders of these fellowships are required to pursue their studies either in the United States or in foreign countries under such direction as may from time to time be prescribed. The stipend of each fellowship will be fixed at the time of its award and will depend upon the requirements and purposes of individual Fellows. The normal minimum stipend is \$1,000. Appointments are made by the Trustees at their stated meeting in June of each year, and the fellowships are available from July 1 following.

Drisler. — The Henry Drisler Fellowship in Classical Philology, established in commemoration of the semi-centennial in the service of the University of Professor Henry Drisler, A.B. '39, is of the annual value of \$650. It is open to Bachelors of Arts of this University, or some other institution of equivalent standing, who have studied Greek and Latin throughout their undergraduate course, and who have an adequate knowledge of French and German. The appointment is made by the Council on the recommendation of the Department of Classical Philology. Reappointments may be made for not more than two terms of one year each. The Fellow must study at this University under the direction of the Department of Classical Philology, unless permitted by the Council to spend a year in some foreign university, or in the American School of Classical Studies at Athens, or in the American School of Classical Studies at Rome.

Dubois. — The Abram Dubois Fellowship is open to a graduate of the School of Medicine who shall have satisfactorily completed a term of one year or more, the whole or greater part of which shall have been devoted to the diseases of the eye as interne in a hospital in New York, or elsewhere, approved by the Committee on Award. The award is made annually, but the holder may be continued in the fellowship, if no equally worthy candidate presents himself. The incumbent is restricted to clinical and laboratory study of the subject of diseases of the eye in foreign or American universities.

Emmons. — The Emmons Geological Fellowship, established as a memorial to Samuel Franklin Emmons, is awarded annually by the University Council upon recommendation of the Committee of Award who also prescribe in each particular case the amount of the stipend. Applicants for this fellowship must be qualified by proper geological training and experience to undertake the investigation of some problem in or related to Economic Geology. With the approval of the Committee this investigation may be carried on at any place or institution which may be approved by the holder of the fellowship, who must give his whole time to the problem selected, unless otherwise authorized by the Committee of Award. If for any reason the fellowship shall not be awarded in any given year, the Committee may nominate two fellows for the succeeding year or may otherwise dispose of the unexpended income of the fund for such year as it deems best, in accordance with the terms of the gift.

Garth. — The Granville W. Garth Fellowship in Political Economy is awarded each year by the Council on the recommendation of the Faculty of Political Science. The Fellow is entitled to receive the net annual income of the Granville W. Garth Memorial Fund of \$16,250.

Gilder. — Two or more Gilder Fellowships are awarded annually by the Council on the recommendation of the Faculty of Political Science to graduates of any college or university, or to students having exceptional qualifications. The Fellows shall devote themselves to the investigation of political and social conditions in this country or abroad; to the examination and analysis

of the practical working of legislation enacted for the purpose of improving civic conditions or to practical civic work, in accordance with plans approved by the Professor of Politics and the Professor of Sociology. It shall be the duty of each Gilder Fellow to make a written report at least semi-annually to such professors, giving an account of the work on which he has been engaged. Each of such Fellows shall receive such portion of the income of the Richard Watson Gilder Fund for the Promotion of Good Citizenship as the Trustees may from time to time determine, provided that a portion of the income of the fund may be set aside to meet the cost of publishing the results of the investigations and studies of such Fellows, and such publications shall bear the title of the fund. A fellow may be reappointed for two additional years.

Goldschmidt. — The Samuel Anthony Goldschmidt Fellowship in Chemistry is awarded each year by the Council in the same manner as University Fellowships are awarded and subject to the same regulations. The Fellow shall be entitled to receive the annual net income of \$16,250, the gift of George B. Goldschmidt, as a memorial to Samuel Anthony Goldschmidt of the Class of '71.

Gottsberger. — The Gottsberger Fellowship, awarded every second year, is open only to candidates who, having first taken a degree in Columbia College, have been, for not less than two years, resident graduate students at Columbia, taking also the Degree of Master of Arts. The holder may, with the consent of the professor in charge of his major subject of study, pursue his studies abroad. The Fellow is entitled to receive the net income for two years of the Cornelius Heeney Gottsberger Scholarship Fund of \$9,500.

McKim. — The McKim Fellowship in Architecture, endowed by gift of Charles F. McKim, is open every third year, beginning with 1916-17, to all graduates of the School of Architecture within the three years following graduation and to all matriculated students who have completed the requirements for the Thesis. The Fellow is entitled to receive the net income accruing during a period of two years of the endowment fund of \$20,000. The holder of the fellowship is required to devote the income thereof to foreign study and travel in accordance with plans approved by the School of Architecture.

Mitchell. — The William Mitchell Fellowship is awarded annually by the Trustees, on the nomination of the Faculty of Columbia College, to a graduate of the College who purposes entering upon a course of advanced study in letters or science. In determining the appointment, preference is given to members of the graduating class and to graduates of not more than three years' standing. The Fellow is entitled to receive the net income of the fund of \$10,000, bequeathed by Benjamin D. Silliman, and he is permitted to study at Columbia or elsewhere.

Mosenthal. — The Mosenthal Fellowship, established in memory of the late Joseph Mosenthal, is designed to aid talented students of musical composition, either men or women, in the study of their art. The stipend is the net income for two years of the capital sum of \$7,500. It is awarded every even year by the Council upon the recommendation of the Department of Music, and is tenable for one year. Applicants are required to show a thorough knowledge of harmony and of counterpoint and some ability to compose, by submitting a number of original compositions in support of their applications. The holder must devote himself to the study of musical composition at Columbia, or, with the approval of the department, abroad. In the former case, he shall be required, in addition to his studies in Music, to pursue such other studies in at least two departments of the University as the Department

of Music may direct. The Fellow shall submit, at such times as may be designated, the results of his work in musical composition.

Perkins. — The Perkins Fellowship, established by the bequest of Willard P. Perkins, is open every sixth year, beginning with the year 1902, to all graduates of the School of Architecture within the three years following graduation, and to all matriculated students who have completed the requirements for the Thesis. The Fellow is entitled to receive the net income accruing during the previous five years of the endowment fund of \$5,700. The holder of the fellowship is required to devote the income thereof to foreign study and travel in accordance with plans approved by the School of Architecture.

Plaut. — The Isaac Plaut Fellowship for the encouragement of graduate study and original research in Pharmacy, established by Albert Plaut in memory of his father, is of an annual value of \$500. It is open to that Bachelor of Science in Pharmacy of the College of Pharmacy who shall have shown among the members of his class during his course of study the greatest taste and aptitude for original investigation. The appointment is made by the University Council upon the nomination of the Trustees of the College of Pharmacy. The Fellow shall attend a foreign institution to be selected by himself and approved by the Faculty of the College of Pharmacy, and shall pursue a course of study approved by the Faculty. At the close of his incumbency he shall present to the Faculty a written report of his work.

Proudfit (Letters). — The Alexander Moncrief Proudfit Fellowship in Letters for the encouragement of the study of English Literature, established by the bequest of Alexander Moncrief Proudfit, is open to any son of native-born American parents who shall have taken the degree of Bachelor of Arts after three years' residence in Columbia College, and who shall, while enjoying such fellowship, remain unmarried. The appointment is made by the Council upon the recommendation of the Department of English. The Fellow is entitled to receive the net income of the sum of \$13,875. He shall carry on his studies and research at Columbia, or elsewhere, under the direction of the department named.

Proudfit (Medicine). — The Maria McLean Proudfit Fellowship, endowed by the late Alexander Moncrief Proudfit, A.B. '92, for the encouragement of advanced studies in medicine, is open to any son of native-born American parents, a graduate in medicine, who shall pursue advanced studies in internal medicine under the direction of the Medical Faculty of the University, and who shall, while enjoying such fellowship, remain unmarried. The appointment is made every four years by the University Council on the recommendation of the Faculty of Medicine, upon terms designated by the Faculty. The Fellow shall carry on his studies under the direction of the Faculty of Medicine.

Schiff. — The Schiff Fellowship in Political Science, the gift of Jacob H. Schiff, is of an annual value of \$600. The appointment is made by the Council upon the recommendation of the Faculty of Political Science, which recommendation is based upon the provision that on or before April 1 of each academic year the Faculty of Political Science shall propose to Jacob H. Schiff, while living, the name of a suitable person for nomination by him. The conditions to govern the nomination after Mr. Schiff's death will be found in the University Statutes.

Schurz. — The Carl Schurz Fellowship for the study of the German Language and Literature is awarded, in every even-numbered year, by the Council, upon the recommendation of the Department of Germanic Languages and Literatures. The Fellow is entitled to receive the net income for two years

of the capital sum of \$10,000, constituting the endowment contributed by citizens of New York, in commemoration of the seventieth birthday of Carl Schurz. The appointment may be renewed for reasons of weight for a further term of one year, but without additional stipend. The holder of the fellowship must remain at Columbia under the direction of the department unless permitted by the Council to study at some German university.

Trowbridge. — The William Petit Trowbridge Fellowship in Engineering is awarded annually by the Trustees on the recommendation of a Committee consisting of the President of the University and the heads of the Departments of Mining, Civil, Mechanical, and Electrical Engineering. The Fellow so appointed is entitled to receive the net annual income of the sum of \$10,000, comprising the Trowbridge Fellowship Fund, and is to be governed by such regulations as the Committee shall prescribe. If, for good and sufficient reasons, the fellowship is not awarded at any given time, the income may be expended for the advancement or encouragement of engineering research, as determined by the Committee of Award.

Tyndall. — The Tyndall Fellowship for the Encouragement of Research in Physics, endowed by Professor John Tyndall, and of the annual value of \$648, is awarded upon the recommendation of the Department of Physics either to a graduate of the University or to a student in it, who may have shown decided talent in physics, preferably to one who shall express the determination to devote his life to the advancement of theoretic science and original investigations in that department of learning. It is the duty of a Tyndall Fellow to devote himself fully to the investigation of some subject in physical science at this or some other university, under the supervision of some known physicist approved by the Department of Physics. He shall make a report, certified to by the physicist superintending and directing him, giving an account of the work in which he has been engaged.

Annual Fellowships

The Treasurer may receive gifts of money for fellowships for one year or more, provided that no fellowship shall be created for less than \$500 per annum. Such fellowship shall be filled by the University Council, subject to such regulations as may be prescribed.

University Scholarships

Twenty University Scholarships, of the value of \$150 each, are awarded annually by the University Council at the stated meeting in April, under the following regulations:

These scholarships are open to all graduates of colleges and scientific schools, not over thirty years of age, whose course of study has been such as to entitle them to be enrolled at Columbia as candidates for one of the higher degrees. They are tenable for one academic year, with a possibility of renewal for one year longer. In the awards preference will be given to those candidates for University fellowships who have failed of appointment after having been recommended by any faculty or department. University Scholars will be required to enroll themselves as candidates for a higher degree and to pursue a regular course of study leading thereto. A University Scholar may relinquish the income thereof without waiving his right to be thus designated.

President's University Scholarships. — Eight University Scholarships, known as the President's University Scholarships, are awarded by the Uni-

versity Council, under the regulations governing the University Scholarships.

Curtis University Scholarships. — Four University Scholarships, known as the Curtis University Scholarships, are awarded annually to women students under the Faculties of Political Science, Philosophy, and Pure Science, under the same regulations as those governing the University Scholarships.

Special Scholarships

Aldrich. — The scholarship known as the James Herman Aldrich Scholarship, established by James Herman Aldrich, of the Class of '63, by a gift of \$5000 in commemoration of the fiftieth anniversary of his graduation, is awarded annually to such persons as the President may designate, with the approval of the Trustees.

Alumni Association (College). — Four Alumni Association Scholarships have been established in the College by the Trustees in recognition of the interest that the Alumni Association has always shown in the affairs of the College, and are open only to Freshmen who complete the requirements for admission before matriculation.

Alumni Competitive (College). — Four Alumni Competitive Scholarships were established in the College by the Trustees in 1890. One is awarded annually by the Committee on University Admissions to those qualified Freshmen who pass in June the best entrance examinations in subjects aggregating the 15 units requisite for admission. The examination may be taken at any point where examinations are held by the College Entrance Examination Board. No applications are required from candidates for first appointment. Reappointments are made under the general regulations of the Committee on Scholarships.

Beck (College). — The Beck Scholarship was established in the College in recognition of the liberality of Charles Bathgate Beck, A.B., '77, LL.B. '79, and is awarded to applicants whose record for ability and scholarship obtained either before or after matriculation gives evidence of special fitness for the course of study they wish to pursue. Students not in need of financial aid cannot be considered as applicants, nor can those who, through physical, mental or moral weakness, give little promise of future usefulness.

Beck (Law). — The Charles Bathgate Beck Prize Scholarship is awarded to the first-year candidates who pass the best examination in the subject relating to Real-Estate Law. The holder shall, provided he remains a member of the School of Law, receive one year's income of the prize fund established by the will of Charles Bathgate Beck in equal semi-annual instalments, during the two years following the award. If two or more students pass examinations of equal merit, the income of the fund may be divided.

Benefactors. — Sixty-three scholarships of tuition value were established by the Trustees in 1899 in recognition of the liberal gifts for the purchase of the site of Morningside Heights received from J. Pierpont Morgan, Cornelius Vanderbilt, A. A. Low, R. Fulton Cutting, Alfred Corning Clark, Samuel Sloan, Henry Parish, Jacob H. Schiff, and others. These scholarships have been assigned to different faculties as follows: Columbia College, 20, open only to Freshmen; Applied Science, 27, open only to students who have been in the University at least one year; Law, 16, open to students who have been in the School of Law at least one year.

Blumenthal. — A scholarship, or scholarships, open to qualified candidates, is maintained in the College of Physicians and Surgeons by the

income of the George Blumenthal, Jr., Scholarship Fund. An annual award is made to a student, or students, to cover the cost of tuition or for other purposes, in amounts not less than \$250 nor more than \$500 to any one student in any one academic year.

Brooklyn. — Twelve Brooklyn Scholarships were established in the College by the Trustees in 1895, in recognition of ex-President Low's gift of a memorial building for the University Library. Three are open for competition annually to residents of Brooklyn trained either in the public or the private schools of that borough, on the same basis as the Alumni Competitive Scholarships.

Burgess. — Two scholarships were established by the bequest of Annie P. Burgess known as the Dr. Daniel M. Burgess and the Annie P. Burgess Scholarships and are to be awarded annually by the President and Trustees to two worthy and deserving young men of good habits and Christian character, who may be unable to pay their own expenses while pursuing their studies in the University. The value of these scholarships is the income of the two distinct sums of \$5,000 each.

Butler. — The Richard Butler Scholarship, tenable for one academic year, with the possibility of renewal for each of two years more, for the benefit of male students born in the State of Ohio, is open for competition to qualified candidates who propose to enter any college or school of the University, except Teachers College or the College of Pharmacy. The annual value (to be applied to tuition charges) is the income of a fund of \$5,000, given for the establishment of the scholarship. Applications should be made under the same regulations as those for University Scholarships.

Campbell. — Two Campbell Scholarships were established in the College by gift from Miss Maria L. Campbell and Miss Catharine B. Campbell, in memory of Robert B. Campbell of the Class of '84, and Henry P. Campbell of the Class of '47. The scholarships are awarded on the same basis as the Beck Scholarships.

Clark. — By the will of the late Alonzo Clark, M.D., LL.D., for many years President of the College of Physicians and Surgeons, and Professor of Pathology and Practical Medicine, a scholarship has been established with an income of \$575 a year, for the purpose of promoting the discovery of new facts in medical science.

Class of '48. — The Class of 1848 Scholarships were established in the College by an anonymous gift and are awarded on the same basis as the Beck Scholarships.

Class of '85. — The Class of 1885 Scholarship was established by the Class of '85, School of Mines, in memory of the 25th anniversary of graduation, by a gift of \$10,000. The scholarship is open to duly registered students in the Schools of Mines, Engineering and Chemistry.

Daly. — The Marcus Daly Scholarship of the annual value of \$1,000, maintained by Mrs. James W. Gerard in memory of her father, is open to that worker or descendant of a worker in the Montana mines who passes the best competitive entrance examinations to the course in Mining Engineering. The winner of the scholarship shall hold the same throughout his course in mining engineering, subject to the same conditions of reappointment as those imposed upon the holders of Competitive Scholarships in Columbia College.

Devendorf. — The Devendorf Scholarship, established by a gift of \$6,500 from Mrs. Lodema W. Devendorf in memory of her husband, Davis M. Devendorf, of the Class of '61, is open to a qualified candidate for the degree

of M.D. In making the award preference shall be given to a student from the county of Herkimer, in the state of New York, and preferably to a student from the town of Herkimer.

Doughty. — A scholarship, known as the Francis E. Doughty Scholarship, of \$400, or so much thereof as the income of the Francis E. Doughty, M.D., Scholarship Fund will suffice to pay, is awarded annually to such person as the Faculty of the College of Physicians and Surgeons may appoint, in accordance with the rules to be made by them with the approval of the Trustees.

Faculty. — The Trustees have established a series of scholarships known as the Faculty Scholarships which are allotted among the several faculties as follows: College 6, Law 4, Medicine 4, Science 8, Architecture 4.

General Theological Seminary. — A scholarship is awarded in the General Theological Seminary of the Protestant Episcopal Church by the Trustees of Columbia University upon the following conditions: All candidates shall comply with the requirements for admission to the General Theological Seminary, and as candidates for the ministry of the Protestant Episcopal Church, and must have taken the degree of Bachelor of Arts and have been graduated with honors. Candidates shall report themselves to the Education Committee of the Society for Promoting Religion and Learning in the State of New York at least three months previous to the examination to be held by the Faculty of the General Theological Seminary for the purpose of awarding such scholarship.

Harsen. — The income of a fund established by the late Jacob Harsen, M.D., in 1859, for the purpose of "promoting the study of Medical and Surgical Practice," has been made available for the award of five scholarships to students in the College of Physicians and Surgeons, in lieu of the Harsen prizes heretofore awarded. Two of these scholarships may be awarded to students taking the second year in the medical course; two to students in their third year, and one to a student in his fourth year, provided that the aggregate of the stipends of such scholarships shall not exceed the income earned by the fund during the preceding year.

Harper and Hewitt. — Four Scholarships known as the Harper and Hewitt Scholarships endowed, two by the gift of Abraham S. Hewitt, LL.D., of the Class of '42, and two by the bequest of Joseph W. Harper, A.M., of the Class of '48, are open annually for competition to graduates of New York City high schools, on the same basis as the Alumni Competitive Scholarships.

Hartley. — A scholarship, known as the Frank Hartley Scholarship, of a value not to exceed the annual income of the Frank Hartley Scholarship Fund, is awarded annually to a student in the Medical School in accordance with the general regulations of the Medical Faculty governing scholarships.

Jones. — The Wawepex Society makes annual provision for a scholarship amounting to \$200 and including the use of a table at the biological laboratory at Cold Spring Harbor, L.I. The award is made by the Council upon the recommendation of the Department of Zoölogy.

McClymonds. — The Louis K. McClymonds Scholarships (2) of the annual value of \$650, maintained by Mrs. Annie K. McClymonds in memory of her late husband, are open to those candidates for the degree of A.B. or B.S. who shall have satisfactorily completed the requirements for admission, and who, in the judgment of the Faculty of Columbia College, shall be deemed most deserving of appointment. Preference shall be given to sons of American-

born parents who have no other means of providing for their tuition and living expenses during the academic year.

Moffat. — Two Moffat Scholarships, endowed by William B. Moffat, A.B., '38, M.D., '42, are awarded on the same basis as the Alumni Association Scholarships.

Pulitzer. — Through the generosity of the late Mr. Joseph Pulitzer, male graduates of the public high schools of the city of New York, not to exceed forty at any time, are awarded scholarships upon competitive examination. Each scholarship so awarded may be held for a period of four years in the College or in any department of the University except the Medical School, Teachers College, and the College of Pharmacy. The scholarship will be withdrawn if at any time the holder fails to maintain a satisfactory standard in his academic work. During his term the scholar receives the sum of \$250 a year over and above the cost of his tuition.

Religion and Learning. — Eight Scholarships of the Society for Promoting Religion and Learning have been founded and are awarded on the nomination of this Society.

Schermerhorn. — Five Schermerhorn Scholarships, endowed by John Jones Schermerhorn, A.B., '25, are open only to Freshmen in the College. The requirements for admission must be completed before matriculation. They are awarded on the same basis as the Alumni Scholarships.

Stuart. — Two Stuart Scholarships were established in the College by the gift of Mrs. Cornelia A. Atwill, in memory of her grandsons, Sidney Barcula Stuart, of the Class of '80, and Eugene Talman Stuart, of the Class of '81. They are awarded on the same basis as the Alumni Association Scholarships.

Vanderbilt. — In recognition of the liberal gifts of William H. Vanderbilt to the College of Physicians and Surgeons, four scholarships, to be known as the William H. Vanderbilt Scholarships, have been established. These are open to students of any class.

Wheeler. — A scholarship, known as the John Visscher Wheeler Scholarship, in memory of John Visscher Wheeler of the Class of '65, of a value not to exceed the annual income of the fund of \$12,000 bequeathed to the University by Mrs. Susan E. Johnson Hudson, is awarded every four years, or oftener if a vacancy shall occur, to a student entering Columbia College. In awarding this scholarship, preference shall be given to candidates nominated by alumni associations and clubs, and among such candidates to the sons of alumni of Columbia College. The holder of the scholarship shall reside in Hartley Hall. The scholarship shall be held for four years unless sooner vacated by the operation of the general rules governing scholarships.

Annual Scholarships

The Treasurer may receive gifts of money for scholarships for one or more years, provided that no such stipend shall be less than the annual tuition fee of the college or of the school in which it is provided.

Foreign Students

Beginning with 1910, exemption from the regular tuition fees is granted for a period of ten years to advanced students from Scandinavian universities, not exceeding three students in any one year, who may be nominated by their respective universities and recommended by the American-Scandinavian Society.

Beginning with 1910, exemption from the regular tuition fees is granted for a period of ten years to students from Turkey, not exceeding three students in any one year, who may be nominated by the Turkish Government and recommended by the American Ambassador at Constantinople.

Beginning with 1912, exemption from tuition fees is granted to duly qualified students from China, not exceeding four in any one year, who may be nominated for the privilege by the Chinese Government.

Loan Funds

There are six funds (the Schiff, the Shoemaker, the Payne, the Class of 1879 School of Mines, the Class of 1885, and the Class of 1887 School of Mines Funds) available for short-term loans to needy students, which may be drawn upon by permission of the President.

MEDALS AND PRIZES

Essays submitted in competition for any of the following should, unless otherwise indicated, be submitted to the Secretary of the University not later than May 1, in the year of award. The essays should be signed fictitiously and should be accompanied by a sealed envelope containing the author's name and address. The awards are announced at Commencement and, unless otherwise indicated, are annual.

Alumni Association (Architecture). — The Alumni Association of the School of Architecture offers an annual medal for proficiency in advanced design.

Alumni Association (College). — A prize of \$50 in money or its equivalent "to the most faithful and deserving student of the graduating class" was established in 1885 by the Association of the Alumni of Columbia College. The graduating class selects the incumbent from three names submitted to it by the Faculty; or if, ten days prior to Commencement, the class should notify the President of the University of its failure to make a selection, the award may be made by the Faculty.

Alumni Association (Medicine). — The Alumni Association Prize of \$500 is awarded biennially to an alumnus of the College of Physicians and Surgeons for the best medical Essay submitted upon any subject that the writer may select. Essays should be sent to the Secretary of the Alumni Association of the College of Physicians and Surgeons on or before April 1 of the year of award.

American Institute of Architects. — The American Institute of Architects offers an annual medal to that student of the School of Architecture who has during his course maintained the best general standard in all departments of his work.

Barnard. — A gold medal of the value of \$200 established by the provisions of the will of President Barnard and endowed by him, known as the Barnard Medal for Meritorious Service to Science, is awarded quinquennially to such person, if any, whether a citizen of the United States or any other country, as shall within five years next preceding have made such discovery in physical or astronomical science or such novel application of science to purposes beneficial to the human race, as in the judgment of the National Academy of Sciences of the United States shall be esteemed most worthy to such honor.

Bennett. — A prize established through a gift of \$1,000 from James Gordon Bennett may be awarded by the Faculty of Political Science for the

best essay upon some subject of contemporaneous interest in the domestic or foreign policy of the United States. The competition is open to students not holding a baccalaureate degree who pursue courses amounting to six hours a week in the School of Political Science.

Bunner. — The H. C. Bunner Gold Medal, established by the friends of the late Henry Cuyler Bunner, or its equivalent in cash, is awarded to the candidate for a Columbia degree who shall present the best essay on an assigned subject in American literature. The award will be made by a committee to be appointed by the President.

Butler. — The Nicholas Murray Butler Medal is awarded in gold at the Commencement of 1915 and each fifth year thereafter, in accordance with such rules and regulations as the Trustees may from time to time establish, for the most distinguished contribution made during the preceding five-year period anywhere in the world to philosophy or to educational theory, practice or administration. The medal is also awarded in silver or bronze at the Commencement of 1915 and each year thereafter, in accordance with such rules and regulations as the Trustees may from time to time establish, to that graduate of Columbia University in any of its parts who has, during the year preceding, shown the most competence in philosophy or in educational theory, practice or administration, or who has during that time made the most important contribution to any of these.

Cartwright. — The Cartwright Prize of \$500 was endowed by a bequest of \$10,000 by Benjamin Cartwright, and is offered for competition in alternate years with the Alumni Association Prize. It is awarded on the same terms as the latter, except that it is open to general competition.

Chanler. — By the bequest of J. Winthrop Chanler, A.B., '47, the income of \$1,000 is awarded annually, at Commencement, to the member of the graduating class of Columbia College, who, in the judgment of the Faculty, shall be the author of the best original manuscript essay on the history of civil government in America, or some other historical subject, to be determined by the Faculty.

Class of 1889 Medal. — A prize, to be known as the "Class of 1889 Medal," is awarded to a graduate of the School of Mines, or of any of the Schools of Applied Science, or of the School of Architecture, who shall have distinguished himself in any sphere of human effort. The Jury of Award shall be the President of the University, the President of the Alumni Association of the Schools of Science, the senior Alumni Trustee who is a graduate of the School of Mines or of one of its allied schools, and a representative of the Class of 1889, appointed by the Class. Presentations of the medal are made at three-year intervals dating from 1914.

Convers. — A prize, known as the E. B. Convers Prize, the annual income of the sum of \$1,000, has been established in the School of Law in memory of E. B. Convers, of the Class of '66. This prize is awarded annually to such member of the graduating class in the Law School as may write the best original essay on some legal subject to be chosen from a list of ten subjects prepared each year by the Faculty of Law or on any other legal subject approved by the Faculty.

Curtis. — An endowment fund of \$1,000 established by the late Samuel Putnam Avery, an associate of George William Curtis in the work of civil service reform, provides for the award of two medals of gold and silver, or the equivalent in cash, to students in Columbia College for excellence in public delivery of English orations. Competitors must be either third- or fourth-

year students in regular standing, or in exceptional cases, and with permission of the Dean, special students taking corresponding courses amounting to not less than 12 hours a week. The Department of English publishes about November 1 a list of subjects for the competition. Subjects not on the list may be chosen with the consent of the department provided that application be made not later than December 1. The contestants will be selected by the department at a preliminary competition which will not be open to the public. The award will be made by judges appointed by the President.

Darling. — The Edward A. Darling Prize in Mechanical Engineering, the income of \$1,000, bequeathed by Edward A. Darling, formerly Superintendent of Buildings and Grounds, is awarded annually to the most faithful and deserving student of the graduating class in Mechanical Engineering. The recipient of the prize is to be chosen by ballot, by members of the graduating class in the course in Mechanical Engineering, from among three names to be chosen by the Faculty of Applied Science.

Earle. — A prize of \$50 established in memory of Mortimer Lamson Earle, Instructor in Greek in Barnard College from 1889 to 1895 and from 1898 to 1900, and Professor of Classical Philology from 1900 to 1905, is open for annual competition to all candidates for the degree of Bachelor of Arts. It will be awarded partly on the basis of the regular work of the year in Greek and in Latin, partly on the basis of a special examination held in May or June. The special examination will cover specified portions of Greek and Latin literature, sight-reading in Greek and in Latin, and prose composition in Greek and in Latin.

Einstein. — A prize known as the Einstein prize in American Diplomacy was established by Dr. and Mrs. Charles Waldstein in memory of Mr. and Mrs. D. L. Einstein. The prize is awarded annually at Commencement to that student who having been regularly enrolled in the University as a candidate for a degree for not less than two academic years shall be deemed by the Department of Public Law to have done the best and most original work in American Diplomacy.

Elsberg. — A prize to be known as the Albert Marion Elsberg Prize, established by Mrs. Albert Elsberg in memory of her son, Albert Marion Elsberg, of the Class of '05, shall be awarded annually to that student who, having been regularly enrolled in Columbia College as a candidate for a degree for not less than one academic year, shall be recommended by the Department of History for excellence in Modern History. The prize shall consist of a medal and, at the option of the winner, \$50 or books having that value.

Green. — The Albert Asher Green Memorial Prize of \$50 in gold, established by Mr. and Mrs. Asher Green in memory of their son, a member of the class of 1914, is awarded annually at Commencement to that member of the Senior Class who, having been for at least three years a student in good standing in Columbia College, has, in the judgment of the Faculty, made the best record in scholarship during his undergraduate course.

Illig. — A bequest of \$2,000 left by William C. Illig, E.M., '82, provides for the annual award of medals at Commencement to the student, or students, in the graduating class of the Schools of Mines, Engineering, and Chemistry, who shall, in the judgment of the Faculty, have merited the same by commendable proficiency in their regular studies.

Loubat. — Joseph F. Loubat has endowed two prizes of \$1,000 and \$400, respectively, for the best works published in the English language upon

the history, geography, archæology, ethnology, philology, or numismatics of North America. Competition is open to all persons, whether connected with Columbia University or not, and whether citizens of the United States or of any other country. No treatise shall be eligible for the purposes of the competition except such as relate to the topics involving antiquarian research, or that refer to events prior to 1776. In order to insure consideration of their works, authors are invited to send copies to the President of Columbia University not later than April 1 of the year in which the prize is to be awarded; but the competition will not be restricted to works thus submitted.

Ordronaux. — A prize to be known as the Ordronaux Prize in Law is, by vote of the Faculty, awarded annually to the candidate for the degree of Bachelor of Laws of at least one year's standing on the basis of general proficiency in legal study.

Rolker. — A prize to be known as the Charles M. Rolker, Jr., Prize, to be publicly awarded on Class Day, is provided for by the gift of Mrs. C. M. Rolker in memory of her son, Charles M. Rolker, Jr., of the Class of '07. The income of the fund is to be awarded to the member of the graduating class of Columbia College deemed by his classmates the most worthy of special distinction as an undergraduate student, because of scholarship, participation in student activities, pre-eminence in athletic sports, or in any combination of these.

Seminary. — The Protestant Episcopal Society for Promoting Religion and Learning in the State of New York have established two prizes, known as the Society's Greek Seminary Prize of \$30, and the Society's English Seminary Prize of \$20, with the stipulation that notice shall be given every year of the conditions of the prizes under the old regulations and applications be invited. Wherever the conditions of the preceding competition show that one or both of the prizes have not been taken for lack of applicants, notice shall at the same time be given of the competition for the prize or prizes thus open under the new regulations set forth each year in the current *Announcement of Columbia College*.

Smith. — The Smith Prize was established by the relatives, friends, and pupils of Dr. Joseph M. Smith, as a memorial of his services as Professor in the College of Physicians and Surgeons from 1826 to 1866. Under the provisions of the trust an annual prize of \$100 is awarded for the best essay on the subject of the year, presented by an alumnus of the College of Physicians and Surgeons. The competing essays should be sent to the Dean of the College of Physicians and Surgeons on or before March 10.

Squires. — The Grant Squires Prize, the income for five years of a fund of \$1,000, established by Grant Squires, A.B. '85, LL.B. '87, is awarded at the close of every quinquennial period, to such graduate conducting an original investigation of a sociological character as shall be adjudged most worthy by a Committee of Award, consisting of the President, the Professor of Sociology and one of the Professors of Political Economy appointed by the Faculty of Political Science. Such award shall be deemed to be a recognition of scientific ability and achievement, as well as an encouragement of research.

Stevens. — The Stevens Triennial Prize, value \$200, established by the late Alexander Hodgdon Stevens, M.D., formerly President of the College of Physicians and Surgeons, is open for universal competition. The Dean of the Medical Faculty, the President of the Alumni Association of the College of Physicians and Surgeons, and the Professor of Physiology are, *ex officio*, the

administrators of the prize. Essays must be in the hands of the first named on or before January 1 of the year of award.

Stokes. — A prize of \$40, to be known as the Caroline Phelps Stokes Prize, is awarded annually to that student who having been regularly enrolled in Columbia College, or Barnard College, or Teachers College as a candidate for an academic degree for not less than one academic year shall be deemed to have written the best essay upon the Rights of Man as the committee of selection shall determine.

Toppan. — A prize known as the Robert Noxon Toppan Prize, the income of an endowment of \$4,000, in memory of Robert Noxon Toppan, LL.B., '61, is awarded annually to the member of the School of Law or of Political Science who shall pass the best written examination upon a paper prepared by the Professor of Constitutional Law.

Van Amringe. — A prize known as the Professor Van Amringe Mathematical Prize was established by George G. Dewitt of the Class of '67 by a gift of \$5,000. The annual income of the fund is awarded at Commencement to that student who, having been regularly enrolled in Columbia College as a candidate for an academic degree for not less than one academic year and a half, and not more than two academic years, shall be deemed most proficient in the mathematical subjects designated during the year of award for Freshmen and Sophomores in the College. The examinations for the prize shall be held annually under the direction of the Department of Mathematics.

Van Buren. — A prize known as the John Dash Van Buren, Jr., Prize in Mathematics was established by Mrs. Louis T. Hoyt in memory of her nephew, John Dash Van Buren, Jr., a member of the Class of '05. The annual income of \$5,000 is awarded to the candidate for an academic degree who passes the best examination in analytical geometry, differential and integral calculus, and in such additional subjects as the Department of Mathematics may prescribe.

THE ALUMNI FEDERATION

The plan of organization of the alumni was completely changed in 1913, when the Alumni Council, a deliberative body of fifteen, representing the alumni of the College, the School of Mines, the Law School and the Medical School, and of the Doctors of Philosophy, constituted itself the Board of Directors of a new central unit with administrative functions, thereupon embracing all organized alumni with the Alumni Federation. The purposes of the Federation are to advance the interests and promote the welfare of Columbia University — by cultivating and fostering mutual relations among all alumni; by encouraging and assisting efficient organization of alumni bodies; by forming new associations and clubs; by disseminating among alumni and the general public through an efficient publication or otherwise accurate information about alumni and University affairs; by providing a recognized channel of communication between students, alumni, and University officers; by keeping the alumni informed with respect to undergraduate life and activities; by providing an alumni public keenly interested in them; by maintaining at the University a central alumni office; and by providing the machinery to nominate alumni trustees.

All members of the alumni associations of the various schools maintained by the Trustees of the University are eligible for School Membership in the Federation and any alumnus may become a General Member. A payment of one hundred dollars (\$100), or a multiple thereof, toward the Endowment Fund entitles an alumnus to be an Endowment Member, which carries life privileges and a life subscription to the *Alumni News*. In 1915 the following were Endowment Members:

Benjamin B. Lawrence, '78 Mines
William Fellowes Morgan, '80, '84
Mines
Robert M. Olyphant, '42
Henry Kraemer, '95 Mines
Nicholas Murray Butler, '82
Willard V. King, '89
Charles F. Hoffman, '78

John C. Richardson, '83 Mines
George F. Butterworth, '74
A. M. Huntington, '08 Hon.
Norton Perkins, '01 L.
Herbert L. Satterlee, '83
A. H. Elliot, '81 Mines
F. L. Stetson, '69 L.
Edmund E. Wise, '83

There is a special class of Endowment Membership which provides for additions to the Endowment Fund of five hundred dollars (\$500) or over by individuals. An alumnus thus contributing is named a "FUNDOR." There is one Fundor — Charles Elihu Slocum, '69 P. and S. — and his contribution to the Endowment Fund is known as "The Charles Elihu Slocum, '69 P. and S. Alumni Federation Fund of Five Hundred Dollars." A class may become a "Fundor" upon payment of \$250.00. The Class of 1905 assigned to the Federation the income for one year of its Decennial Fund and is the first class to become a Fundor although for but one year.

The Federation also sets in motion the machinery which places in nomination before the University Trustees the candidates for alumni trusteeship.

The Alumni Trustees in office in 1916 are: William Fellowes Morgan, '80, '84 Mines; James Duane Livingston, '80; Walter Mendelson, '79 M.; George L. Ingraham, '69 L.; Ambrose Dyer Henry, '84; and Arthur Smith Dwight, '85 Mines.

The Federation maintains an office in Room 311 East Hall which serves as a clearing house for all alumni activities. It publishes the *Columbia Alumni News*, the official alumni publication.

Circular of Information as to Entrance Examinations and Admission.

Announcements of the several divisions of the University are issued in the spring, and contain full information concerning the work of the coming year, or years, in those divisions. These circulars comprise Ancient and Oriental Languages; Biology; Chemistry; Geology, Geography, and Mineralogy; Music; History, Economics, and Public Law; Mathematical and Physical Sciences; Modern Languages and Literatures; Philosophy, Psychology, and Anthropology.

Publications of Barnard College:

Announcement of Barnard College: contains full information concerning admission, expenses, courses of instruction, and requirements for the degrees of Bachelor of Arts and Bachelor of Science.

Report of the Dean: issued annually.

These publications are distributed without charge upon application to the Secretary of Barnard College.

Publications of Teachers College:

Teachers College Record: founded in 1900. Published bi-monthly. \$1.50 per year (5 numbers January, March, May, September, November); 40 cents per copy, devoted to the practical problems of elementary, secondary, and higher education. Sections on alumni and college activities. The **Household Arts Review** has been incorporated since January, 1915.

Contributions to Education: established in 1905, continues the educational issues of the Columbia University Contributions to Philosophy, Psychology, and Education, and presents the results of research by officers or advanced students of the College in the history and philosophy of education, in educational psychology, in kindergarten, elementary, and secondary education, in educational administration, and in related fields. The series includes 73 volumes to date.

Teachers College Bulletins: a series of pamphlets published fortnightly, including the **Dean's Report** (issued in November), **Announcements of School of Education** and **School of Practical Arts** (issued in

the spring), special announcements of departments, which are free of charge. The series also includes the **Technical Education Bulletins**, certain articles on special subjects and reports on school practice, to which a price is attached.

Unclassified Publications: a group of publications not lending themselves to the conditions of the foregoing series, notable among which are Thorndike's **Educational Psychology** text-books.

Teachers College Syllabi: this series consists of outlines of study, bibliographies, and references, which are published at irregular intervals by Teachers College.

Circulars of the Horace Mann Schools: two schools fully equipped with kindergarten, elementary, and secondary classes, maintained by Teachers College as schools of observation.

These circulars may be obtained without charge upon application to the Superintendent of the Horace Mann School.

For details in regard to any of these publications consult the Bureau of Publications, Teachers College.

II. COLUMBIA UNIVERSITY PRESS

The Columbia University Press was organized with the approval of the Trustees of the University and was incorporated June 8, 1893, for the purpose of promoting the publication of works embodying the results of original research. The Press is a private corporation, related directly to Columbia University by the provisions that its Trustees must always be officers of the University, and that the President of the University shall be the President of the Press.

DIRECTORY OF STUDENTS

The italic letter following the name indicates the school in which the student is primarily registered — as follows:

<i>a</i> School of Architecture	<i>j</i> School of Journalism
<i>b</i> Barnard College	<i>l</i> School of Law
<i>c</i> Columbia College	<i>m</i> School of Medicine
<i>ed</i> School of Education (Teachers College)	<i>pa</i> School of Practical Arts (Teachers College)
<i>gr</i> Graduate Faculties	<i>phar</i> College of Pharmacy
<i>s</i> Schools of Mines, Engineering and Chemistry	

The numbers 1, 2, 3, and 4 preceding these letters indicate the class. The abbreviation *gr* indicates a graduate student in the professional schools, *sp* a special matriculated student, *nm* a non-matriculated student.

The names of women are indicated by a dagger (†).

"Hartley," "Livingston," "Furnald," "Brooks," and "Whittier" refer to the University Residence Halls.

For names of students not in Directory, see Class lists in Annual Catalogue, and for addresses consult card index in Office of Registrar.
